Base year	2024
Inventory year	2025
Reporting period	1 st January 2025 to 31 st December 2025
Criteria	The Greenhouse Gas Protocol: A corporate accounting and reporting standard ISO 14064-3:2019 Greenhouse gases Part 3: Specification with guidance for the verification and validation of greenhouse gas statements

Objective: The objectives of this audit were to:

- To determine the extent of conformity of FPS FLEXIBLE PACKAGING SOLUTIONS GHG emissions report with the applicable verification criteria ISO 14064-3 – Scope 1, Scope 2, including the principles and requirements of GHG Protocol.
- To assess the completeness of the organization's GHG inventory of GHG emissions
- Evaluate the organization's GHG information system and its controls/management in preparing emission report
- Confirm whether the GHG assertion is without material and whether the verification activities provide the level of assurance agreed to at the beginning of the verification process.

Level of Assurance Achieved:

Conclusion on the GHG assertion, including any qualifications or limitations (hypothetical, projected and/or historical in nature)

Whether there is

(-) evidence that the GHG assertion is materially correct and fair representation of the GHG data and information or that it has been prepared in accordance with the related international standard on GHG quantification, monitoring and reporting or to relevant national standards or practices.

(+) no evidence that the GHG assertion is materially correct and fair representation of the GHG data and information or that it has not been prepared in accordance with the related international standard on GHG quantification, monitoring and reporting or to relevant national standards or practices.
