

You bring the problem. We bring the AI.

AI that works quietly in the background, so your people can focus on moving the business forward.

OUR BIGGEST DIFFERENCE

Built into the systems you already run.

We design, build and integrate custom AI into your ERP, CRM, documents and everyday tools. No rip-and-replace. Nothing new for your teams to learn.

AI should solve business problems. Not create new ones.

Every enterprise has friction: work that takes too long, information trapped in systems, decisions that need chasing, and processes more complex than they need to be.

Too much manual work

Automate what shouldn't be manual.

Too much information

Unlock what's trapped in systems and documents.

Too many decisions

Give teams the intelligence to act faster.

Too much coordination

Connect people, systems and processes.

It adds up fast. Here's what you could save

\$200K / year

If your teams lose 44.5 hours a day to repetitive work, cutting that by 60% frees up over 7,000 hours a year.

FLOW.**

WHEN OFF-THE-SHELF AI ISN'T ENOUGH

We build around your business.

Your processes

Your systems

Your data

Your rules

Your people

OUR BELIEF

We don't start with AI. We start with your business.

Four ways we put AI to work.

Built into the tools your teams already use.

Automate work

Make repetitive work disappear.

Document AI

Workflow Automation

ERP Automation

Agentic Automation

Unlock intelligence

Turn information into answers.

Knowledge AI

Enterprise Search

ERP AI

Document Intelligence

Improve decisions

Give teams the intelligence to act.

Decision Intelligence

Operational Intelligence

AI Insights

Predictive Analytics

Transform experiences

Make interactions simpler.

Customer AI Agents

Employee Copilots

Conversational AI

Service Automation

REAL IMPACT

Real problems. Real AI. Real impact.

95%

Less manual invoice processing

AI-powered invoice processing eliminated manual effort for a manufacturing workflow.

10x

Faster ERP information access

Conversational AI made critical ERP information faster and easier to access.

300%

Higher order volumes

A WhatsApp AI Agent helped automate small orders and increase order volumes.

45%

Higher sales

AI-powered lead qualification helped improve sales performance.

FREE ROI SAVINGS CALCULATOR

What could AI give back to your team?

Estimate the hours your team spends on repetitive work, what that time costs, and how much capacity AI could free up.

- 1 Map your repetitive work
- 2 See what it costs
- 3 Pick a realistic scenario
- 4 See the time and money saved

What you could save

\$200K / year

If your teams lose 44.5 hours a day to repetitive work, cutting that by 60% frees up 7,049 hours a year. That's about 3.3 full-time people.

Calculate your own savings

From business problem to AI in production.

It starts with a conversation. From there, a practical, outcome-focused path to AI in production.

Business first, not technology first.

Practical execution, not just strategy.

Measurable impact, not just activity.

AI is easy to demo.

Making it work is hard.

Cimplify.AI combines design thinking, strategy, technology and execution. We design around the people who will use the solution, so the AI gets adopted and keeps working.

WHAT YOU CAN COUNT ON

🎯	Problem-led	We start with the business problem, not the technology.
🔧	Practical	Built for how your teams actually work.
🔗	Integrated	Works with your existing systems and data.
📊	Measurable	Tied to clear business outcomes.
↗️	Scalable	Evolves with your business.

Invisible by design.

AI shouldn't create another system for your employees to learn. It should quietly make the systems they already use better.

Trusted by teams like yours.

We work with teams across manufacturing, enterprise operations, business services and more.

You focus on what you do best.
We take care of the rest.
