

SEPTEMBER 2026

Newsletter

As we step into September, Belmond Villas continues to take shape with significant progress across the development. From the completion of key infrastructure and the transformation of the main entrance to the advancement of the clubhouse and villas, each milestone brings the vision of this ultra-luxury community closer to reality.

Here's a look at the latest developments at Belmond Villas:

A Grand Entrance- Landscaping & Arch, **Completed**

The grand entrance of Belmond Villas is now complete, with the entrance arch and landscaping works successfully finished. Designed to create an impressive arrival experience, the entrance establishes the distinctive character of Belmond Villas from the very first step into the community.

With its architectural detailing complemented by carefully planned landscaping, the entrance is now beginning to reflect the refined and elegant experience envisioned for Belmond Villas.

Internal Roads

Work in Progress

The internal road development is progressing steadily across the project. With the road network taking shape, connectivity within the community is becoming increasingly defined, creating the foundation for a seamless and well-planned movement experience throughout Belmond Villas.

The ongoing works are steadily transforming the master plan from design into a tangible, finished environment.

Clubhouse

Nearing Completion

The brickwork for the entire clubhouse is nearing completion, marking an important milestone in the development of one of Belmond Villas' key lifestyle destinations.

As the structure takes shape, the scale and presence of the clubhouse are becoming increasingly visible. The upcoming stages will further bring to life the architectural character and lifestyle experience envisioned for this central amenity.

Core Infrastructure & Services, **Completed**

A major infrastructure milestone has been achieved with the completion of several essential services across the development. Stormwater pipelines, underground drainage, communication cabling and streetlighting have all been completed, establishing the critical infrastructure required for a well-integrated and future-ready community. The completion of these services represents an important step towards the overall development of Belmont Villas.

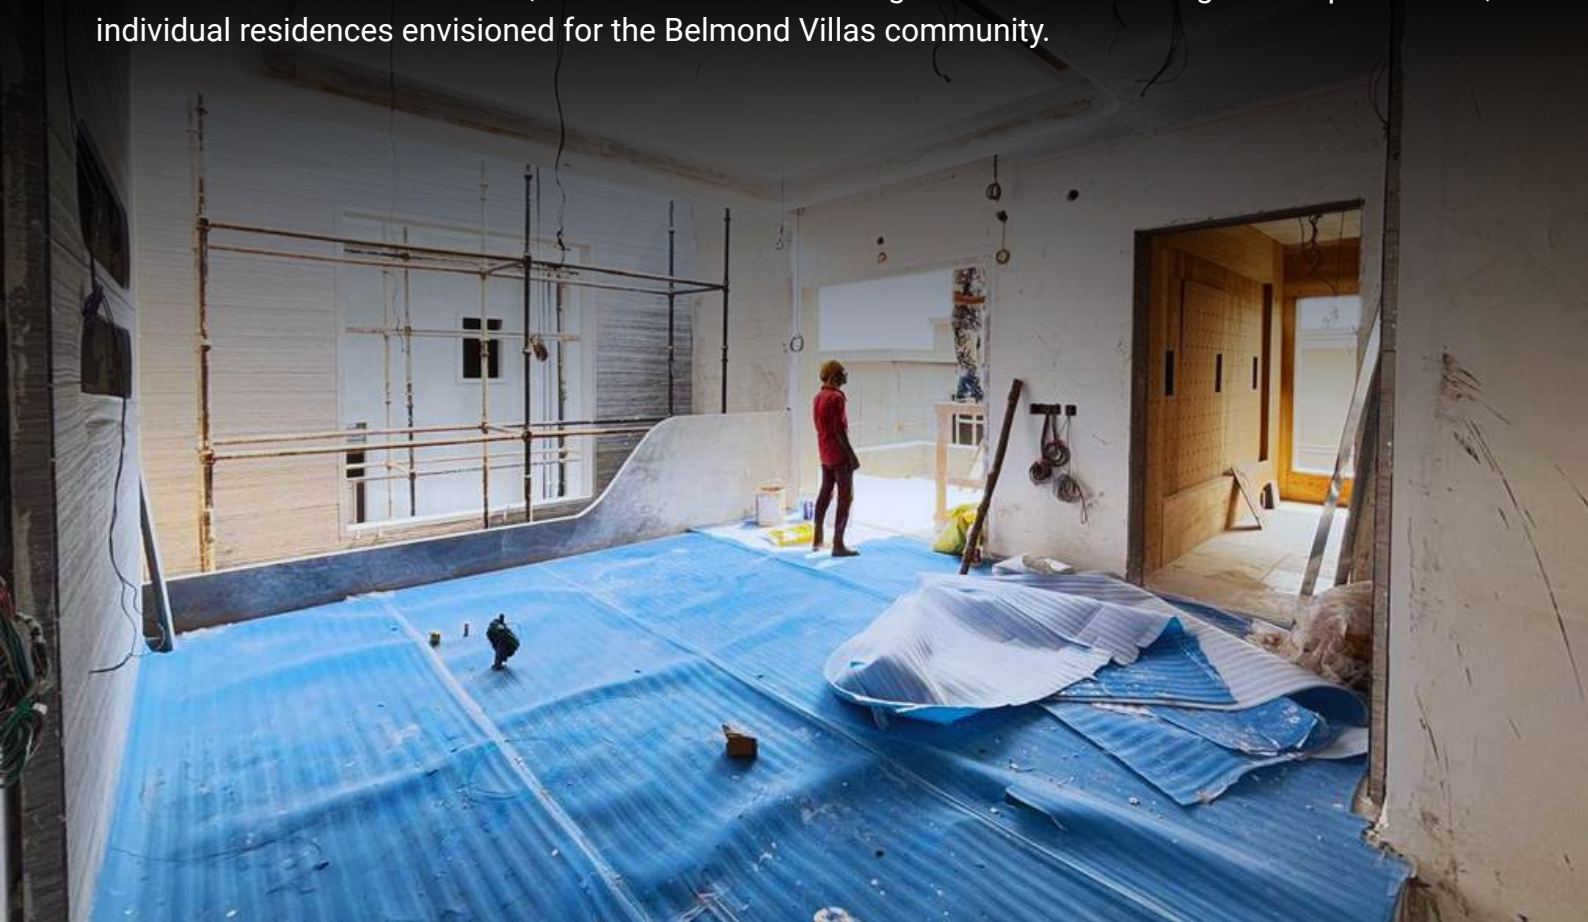

30% of Villas Handed Over

For Interiors

The project has reached another significant milestone, with 30% of the villas now handed over for interior works.

This marks an exciting transition from construction to the creation of personalised living spaces. As interior works commence, these villas are moving closer to becoming the sophisticated, individual residences envisioned for the Belmond Villas community.

Model Villa

Completed

The Model Villa is now complete, offering an immersive representation of the design philosophy and living experience envisioned for Belmond Villas.

From its spatial planning and architectural detailing to its premium finishes, the Model Villa showcases the ultra-luxury living experience that defines the development. It provides a tangible glimpse into the quality, aesthetics and attention to detail that future residents can look forward to.

A Community

Taking Shape

With every completed milestone, Belmond Villas continues to move closer to its envisioned form. From infrastructure and landscaping to villas and lifestyle spaces, the development is steadily coming together to create a distinctive ultra-luxury residential community.

CRAFTED WITH INTENTION.
PROGRESSING WITH PURPOSE.

Moving Closer to Completion

Mar 2027

Thank you

Our team is committed to maintaining quality, speed, and efficiency as we move forward. Stay tuned for more updates as we bring this dream project to life!
