iServer product suite

The Lean Accelerator comprises a preconfigured repository built around the DMAIC process improvement methodology, integrated with Orbus Software's Business Process Analysis Solution. It is based on the de-facto standard in process modeling, BPMN 2.0, and can be integrated with Enterprise Architecture standards such as ArchiMate 2.1 and TOGAF 9.1.

The Lean Accelerator supports multiple business process notations and includes a set of Lean templates such as SIPOC, Value Stream Map and Ishikawa. Business process extensions can be used to visualize Lean Wastes, Value and improvement opportunities on your process diagrams. The solution also comprises templates to manage your team and stakeholders, and dynamic project templates to prioritize and track business process improvement initiatives.

Orbus has a global reach which means we can serve and support customers in every major global region. Headquartered in London, UK, we also have regional offices in the USA, Australia and South Africa.
