

iServer IT4IT Accelerator

The IT4IT Accelerator provides a Value Chain based approach to help organizations structure and manage their IT landscape - leading to improved efficiency of IT operations and lower cost of IT functions.

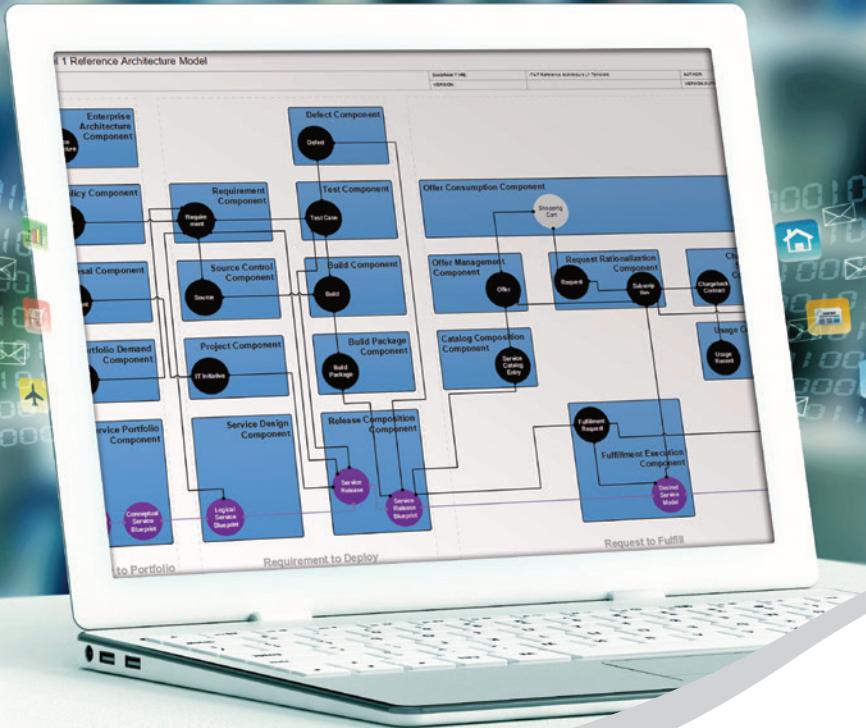

Features

- IT4IT Reference Architecture in the form of pre-defined Visio templates and stencils
- Example diagrams describing IT4IT concepts
- The IT4IT Value Chain, with drill down capability into Value Streams and Components
- Full support for ArchiMate notation to model the details of IT4IT components

Benefits

- Improved efficiency of IT operations
- Best practice compliance
- Improved IT delivery times
- Improved cost efficiency
- Improved customer satisfaction

iServer product suite

iServer's IT4IT Accelerator uses a Value Chain approach to help organizations standardize their IT landscape documentation and modeling by using The Open Group's IT4IT modeling notation. This creates a consistent and understandable architecture, while helping architects understand the role technical components play in supporting the business. In the case of existing architecture, IT4IT can be used to gain more insight into the design by assessing the technical components in terms of the IT Value Chain. For new 'green-fields' architecture designs, IT4IT offers prescriptive and practical guidance on best practice IT management.

The IT4IT Accelerator enables you to build process-agnostic best practices into your architecture and business process repository. These guiding principles and concepts for IT management enable you to build on the processes that are already in place, leveraging the value of existing frameworks such as COBIT or ITIL to create a synergistic, holistic view of the organization. This in-turn, will result in better architecture and change management throughout the IT function and organization.

Orbus has a global reach which means we can serve and support customers in every major global region. Headquartered in London, UK, we also have regional offices in the USA, Australia and South Africa.
