

Orbus iServer Lean Accelerator

The Lean Accelerator, a structured toolkit to improve your business processes - available as part of Orbus iServer.

Features

- A preconfigured iServer repository integrated with the iServer Business Process Analysis (BPA) solution
- Full integration with TOGAF 9.1 and ArchiMate 2.1
- Comprehensive support for BPMN 2.0
- Project-based structured approach built around DMAIC
- A complete set of business process modeling templates, Lean templates, and organization/project templates
- iServer Business Process Improvement (BPI) metamodel and custom attributes

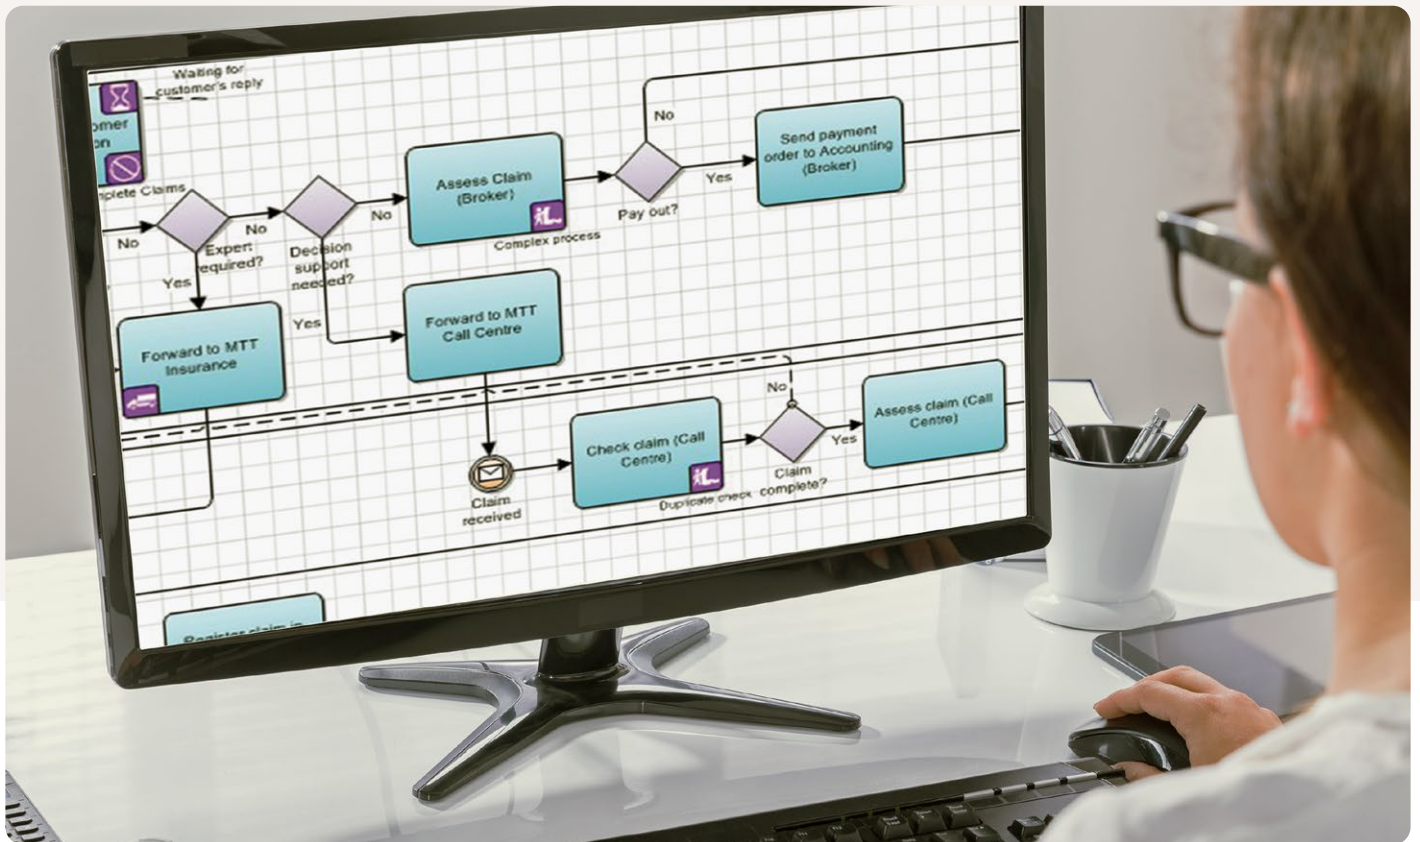

Benefits

- Structured approach to BPI and Lean initiatives
- Ability to integrate your BPI efforts within a single repository with enterprise architecture, in order to improve organizational performance
- Helps to reduce lead times and operation costs

The Lean Accelerator comprises a preconfigured repository built around the DMAIC process improvement methodology, integrated with Orbus Software's Business Process Analysis solution. It is based on the de-facto standard in process modeling, BPMN 2.0, and can be integrated with enterprise architecture standards such as ArchiMate 2.1 and TOGAF 9.1.

The Lean Accelerator supports multiple business process notations and includes a set of Lean templates such as SIPOC, Value Stream Map, and Ishikawa. Business process extensions can be used to visualize Lean Wastes, Value, and improvement opportunities on your process diagrams. The solution also comprises templates to manage your team and stakeholders, and dynamic project templates to prioritize and track BPI initiatives.

About Orbus Software

Orbus Software is a leading global provider of enterprise transformation solutions. We aim to empower customers with a strategic decision-making platform to successfully manage complex change.
