OrbusSoftware

ORBUSINFINITY GOVERNMENT

Complete visibility. Total control.

Meet mandates. Reduce costs. Deliver better citizen experiences. Align IT spend to mission with the clarity to act and confidence to scale.

A proven, **FedRAMP® Certified** EA platform that connects your entire portfolio across applications, technology, capabilities, and strategy in one SaaS solution. Built for US Government.

The Current Challenges	With OrbusInfinity® Government
You can't modernize what you can't see Your technology landscape is incomplete or outdated.	**Create a single source of truth that stays current** Replace fragmented spreadsheets and tribal knowledge with a living architecture.
Mandates and audits consume your team Compliance requires weeks of manual effort and scrambling for data.	**Automate compliance reporting** Map mandates to your portfolio, generate audit ready docs, and reduce your prep time by up to 80%.
Your application portfolio is bloated with redundancy Shadow IT, tech debt, and duplicate applications drain budget, block efficiency, and create risk.	**Rationalize with confidence** Identify redundancy, cut costs, and retire what no longer serves the mission.
Transformation initiatives lose momentum No one understands the dependencies, and the path forward is unclear.	**Visualize dependencies and roadmap change** Anticipate risks and keep modernization on track.
Citizen expectations have outpaced government delivery They expect seamless and modern services, not siloed frustration.	**Align technology to citizen outcomes** Connect services to the systems that deliver them and modernize what matters most.

The capabilities you unlock

- Always-on visibility into applications, infrastructure, data and business alignment
- Confidence in compliance and regulatory requirements
- Faster decisions backed by real data, not assumptions
- A platform that outlasts political cycles and snap mandates
- A foundation to deliver citizen services that meet expectations
