

# DAC

NOT YOUR DATA, NOT YOUR ASSETS™

## WHAT THIS IS

- The Digital Asset Checklist (DAC) is a quick self-assessment designed to help you gauge your awareness and preparedness when it comes to digital asset ownership. It's not about perfection, it's about seeing where you stand and knowing what steps to take next. This is the first step toward financial sovereignty in the digital age.

## WHY THIS MATTERS

- Digital assets offer freedom , but also carry risk. Every year, people lose access to wallets, fall for scams, or mismanage keys. This checklist helps you spot those blind spots early. If you can't confidently answer these questions, it's time to learn. Better now than after something breaks.

## SELF CHECK: HOW READY ARE YOU?

### 1. Wallet Security

- Do you use a non-custodial wallet?
- Do you understand the difference between hot and cold wallets?
- Have you safely backed up your recovery phrase (seed phrase)?
- Have you verified your backups actually work?

### 2. Personal Security

- Do you use a password manager?
- Is 2FA enabled across your crypto accounts?
- Do you understand phishing and impersonation risks?
- Have you tested your setup with a security audit?

### 3. Access Management

- Do you have a plan if your phone or computer is lost?
- Can a trusted contact recover your assets if something happens to you?
- Do you have a cold storage plan for long-term holdings?

### 4. Asset Understanding

- Do you know what tokens or coins you own and why?
- Do you understand the risks of stablecoins, meme coins, or new projects?
- Have you checked the legitimacy of the assets you hold?

### 5. Next Steps

- Do you want help setting up a cold wallet?
- Do you need help with token migration, bridge use, or platform exits?
- Would you like a personalized security consultation?

## NEXT STEPS

If you felt uncertain answering any of those questions, you're not the only one. Most people are figuring this out for the first time. But you don't have to do it alone.

You're ready for the next step. Choose what fits best:

### **Get the Digital Asset First Aid Kit (\$45)**

This guide walks you through everything you need to feel secure, from setting up your wallet to avoiding scams.

### **Want personal support? Book a 1-on-1 consult**

We'll meet you where you're at and help you get clarity and confidence with your setup.

## FINAL NOTE

Whether you're just getting started or already deep into the space. Your setup is only as strong as its weakest link. Let's strengthen it together. This isn't the finish line. It's where things truly begin.

Stay secure. Stay Trustless.
