Tigua Technology Services Inc.

Tigua Technology Services, an SBA 8(a) certified small business and subsidiary of Tigua Inc., specializes in technological innovation, operations support, and mission-driven solutions for federal agencies and commercial clients. Leveraging the financial strength, proven past performance, and industry expertise of our parent organization, we maintain the agility and responsiveness of a small business. Our expertise in professional, scientific, and technological services enhances mission readiness, operational efficiency, and lifecycle asset management across DoD, federal, and commercial environments. With a highly skilled team of engineers and subject matter experts, we deliver cost-effective, professional, scientific, and technological solutions that provide a strategic edge in the DoD space.

8(a) Sole-Source & Set-Aside Advantage

Ability to receive direct 8(a) sole-source contracts up to \$100M (DoD) and \$25M (civilian) without J&A.

Big Company Resources Small Business Agility

Backed by Tigua Inc., we offer financial stability, scalability, and deep industry expertise.

Technology-Infused Engineering Services

Demonstrated success in providing highly specialized staff augmentation services for critical contracts, including support at the US Naval Observatory (USNO) and the Joint Intermediary Forces Capability Office (JIFCO).

Our Core Competencies

Project Management and Technical Coordination

We excel in managing and coordinating complex engineering projects, ensuring timely execution, budget adherence, and seamless integration of technical requirements.

Technical Testing, Analysis, and Validation

Our team provides rigorous testing and technical analysis to ensure systems, structures, and products meet industry standards, safety requirements, and client specifications.

Technical Talent Acquisition and Staffing

We specialize in identifying, recruiting, and hiring highly skilled technical personnel to support projects that require specialized expertise and critical technical work, ensuring the right talent is in place to meet project demands and deliver successful outcomes.

Process Optimization and Efficiency Improvement

We specialize in analyzing and refining engineering processes to enhance operational efficiency, reduce costs, and improve performance, ensuring that systems and workflows are optimized for maximum effectiveness and sustainability.
