

## Unitized Transdisciplinary Care™ (UTC) Model

The UTC Program is the heart of our mission: holistic, integrated care that empowers patients to restore their lives. By coordinating across disciplines, we ensure comprehensive care that supports both physical and mental well-being.

### 60% Reduction in Patient Risk Scores

 **Lifekind**  
SURGERY CENTER

Lifekind is a full-service wellness organization; our Surgery Center streamlines care for your patients by providing direct referrals and coordinated treatment for pain and orthopedic procedures. Its integration ensures faster access, fewer handoffs, and better continuity across the care journey.

### Patient Evals in less than a week

Our UTC program offers a collaborative, whole-person approach that addresses both the physical and behavioral aspects of chronic pain. Patients receive coordinated care across multiple modalities including behavioral health, physical reconditioning, chiropractic care, and traditional medicine— all under one roof.

With a focus on equity, compassion, and proven outcomes, we build personalized care plans that meet patients where they are because healing is a journey, not a one-size-fits-all solution.
