

CLOUDTECH CUSTODY

Simplified Security for a Complex World

Re-imagining Custody for the Digital Era

As digital assets gain wider acceptance, the demand for secure and user-friendly storage rises. Our custody solution lifts the complexities of self-custody while ensuring users maintain full control.

Built for Institutions, Backed by Experience

As one of Australia's first regulated digital asset custodians, we deliver enterprise-level protection and scalable infrastructure supported by decades of financial expertise.

Control, Without Compromise

With intuitive access controls, flawless integration, customised transaction policies and security preferences, we make digital asset management simple and safe.

CloudTech Custody

As digital adoption grows, so do the challenges

“Digital assets are no longer fringe - they are foundational.”

GROWTH

The rise of tokenised real-world assets is creating unprecedented demand for robust, scalable custody solutions.

THREATS

Rising security threats are exposing weaknesses in legacy infrastructure.

REGULATION

Regulatory complexity demands clarity - Australia's evolving framework offers a unique head start.

EASE OF USE

Institutions need security that doesn't sacrifice usability or accessibility.

Why CloudTech Custody?

Confidence, control and compliant.

Security

Enterprise-grade MPC-CMP technology eliminates single point of compromise while allowing for maximum operational efficiency

Access

Seamless integration with a true plug-and-play experience

Compliance

Operating at the highest Australian regulatory standards

Segregation

Client assets are held in segregated wallets and never co-mingled

Control

Customizable policy engine to manage wallet access and transaction controls

Support

Dedicated technical and operational assistance when it matters most

Who CloudTech Custody Serves

Crypto Exchanges

Secure, licensed custody of operational or client assets held off-platform with full segregation and compliance oversight.

Fund Managers

Policy-driven custody with auditable workflows, flexible portfolio segregation, and governance-ready infrastructure.

Family Offices

Tailored access controls, transaction automation and custom alerts and notifications.

SMSFs

Segregated wallets with no co-mingling of assets, configurable transaction limits.

Unparalleled Security Technology

01

Powered by Fireblocks using MPC-CMP - cutting-edge cryptographic security.

02

Multi-layer protection with key material distributed across secure, global locations.

03

High-performance platform enabling fast, reliable access to wallets.

04

Automated policy engine for granular control over access and approvals.

05

User-friendly web interface for intuitive operation without sacrificing power.

06

Certified & Tested: SOC 2 Type II, ISO-compliant, and regularly penetration-tested.

07

Scalable & programmable, ready to grow with your business.

08

Web2 + Web3 ready: Built to bridge legacy systems and decentralized platforms.

CloudTech Custody is built for institutional-grade protection, with compliance and control at its core. From setup to scale, every feature is designed to protect, perform, and adapt.

Security & Control

Segregated wallets – no co-mingling of client assets

Customisable approval workflows with advanced policy engine

24/7 secure infrastructure with 99.9% uptime

Efficiency & Compliance

Plug-and-play onboarding for rapid deployment

Compliance analytics to support regulatory compliance

Transaction automation for efficiency and precision

Coverage & Support

Full key backup to ensure operational continuity

Multi-network compatibility – supports all major digital assets

Peace of mind with cyber and fraud insurance coverage

Dedicated service support for responsive, expert assistance

Key Features

Security Features

CloudTech Custody delivers purpose-built security grounded in global best practices, designed to withstand threats and earn long-term trust.

Fireblocks MPC-CMP algorithm – advanced multi-party computation for key security

SOC 2 Type II certified platform for robust data protection

Regular third-party audits to uphold industry-leading standards

ISO 27001, 27017, 27018, and 22301 certifications ensuring full-spectrum compliance

Comprehensive business continuity & disaster recovery to safeguard your operations

Single Vault

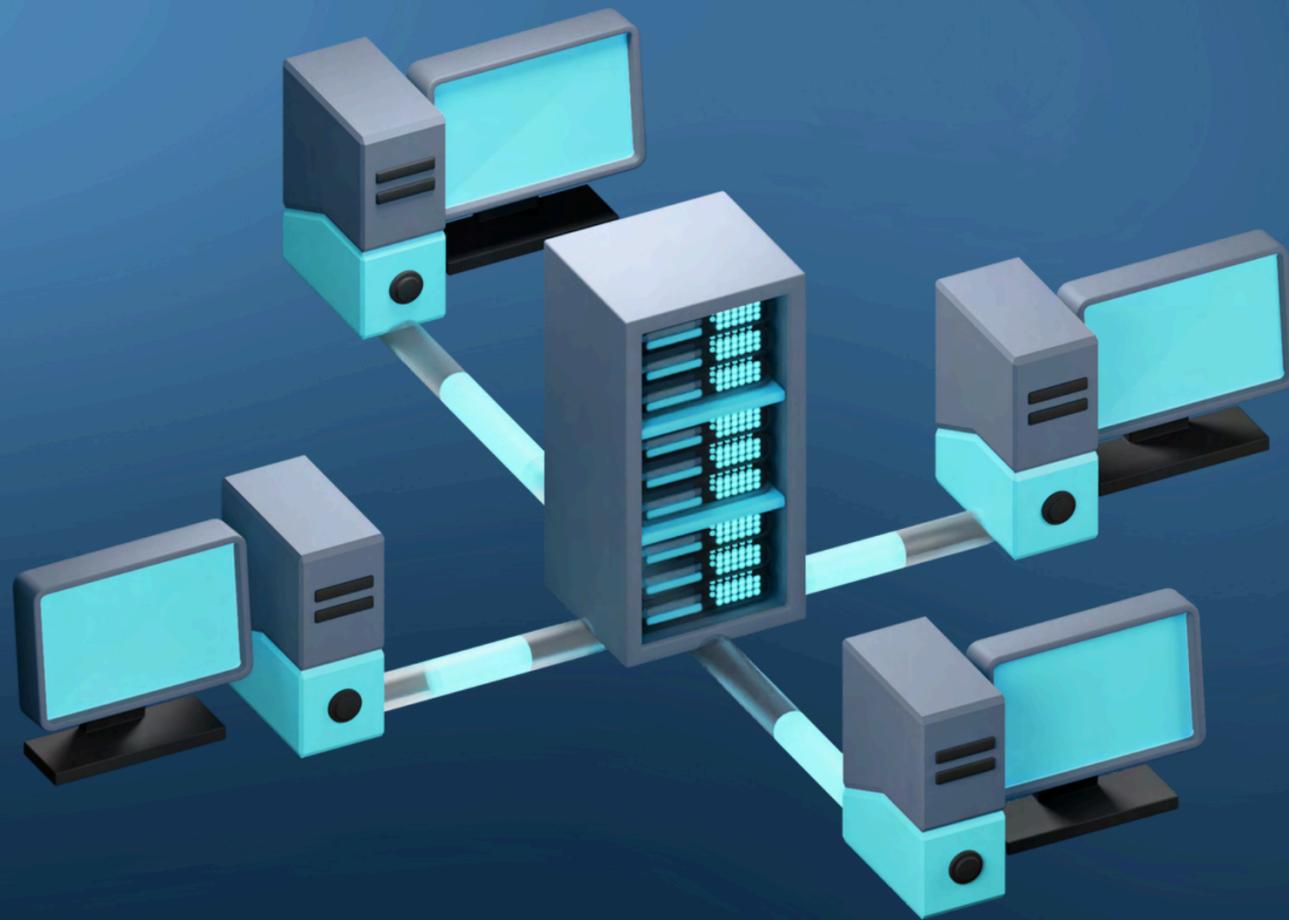

For those looking for secure storage of their long-term digital asset holdings

Dedicated Workspace Management

Direct access to dedicated workspace to initiate transactions and manage your investment portfolio

Active Portfolio Manager

Suited to active managers of multiple portfolios requiring greater control and sophisticated features

Flexible options to suit your business
