

Preliminary information:

1. Is the imported supplement already on the market in any country? Please provide the countries.
2. Were the supplements approved for marketing in India, or is it only produced there?
3. Have the supplements been tested by an accredited laboratory:
 - a. in terms of food substances and ingredients
 - b. for contaminants, presence of heavy metals
 - c. microbiological tests?

Tests are carried out to check whether the product meets legal requirements in a given market in terms of, among others, contamination content and/or limits of active substance content.

4. Please send the product specification.
5. Is the product label made (if so, please send it, if not, should we prepare it)?
6. Has the product been verified for substances prohibited in the European Union (EU)?
7. Is the translation and verification of labels into Polish and German done?
8. It may also be necessary to translate the product specification in further proceedings.
9. Are marketing texts, promotional materials, website descriptions already prepared?
10. Manufacturer's data
11. Supplier's data

After the initial verification of the above points, the following should be done:

Poland:

1. Notification to the Chief Sanitary Inspectorate (GIS)
 - a. Submission via the website <https://e.sanepid.gov.pl/>, account creation or submission of documents at the headquarters of the Chief Sanitary Inspectorate in Warsaw is required.
 - b. A file with the label should be attached

Germany:

1. Notification to the Federal Office of Consumer Protection and Food Safety (BVL)
 - a. online
 - b. A file with the label should be attached

BVL does not verify the notification, it only forwards it to the appropriate food supervision authorities BML

It is recommended to first submit the notification to one of the countries and receive acceptance, and then submit to another country referring to the acceptance in another EU country

After reviewing the above points, please inform us to what extent you are interested in support:
