# Setting Up Your Creative Rendering Chrome Extension

REQUIREMENTS

- Inbox Monster account
- SendGrid account
- Email creative or template ready for QA

Don't have an Inbox Monster account? Get in touch at sales@inboxmonster.com.

INSTRUCTIONS FOR INSTALLATION

1. Download Inbox Monster's Chrome extension by visiting the Chrome Store.
2. Click "Continue to Install."

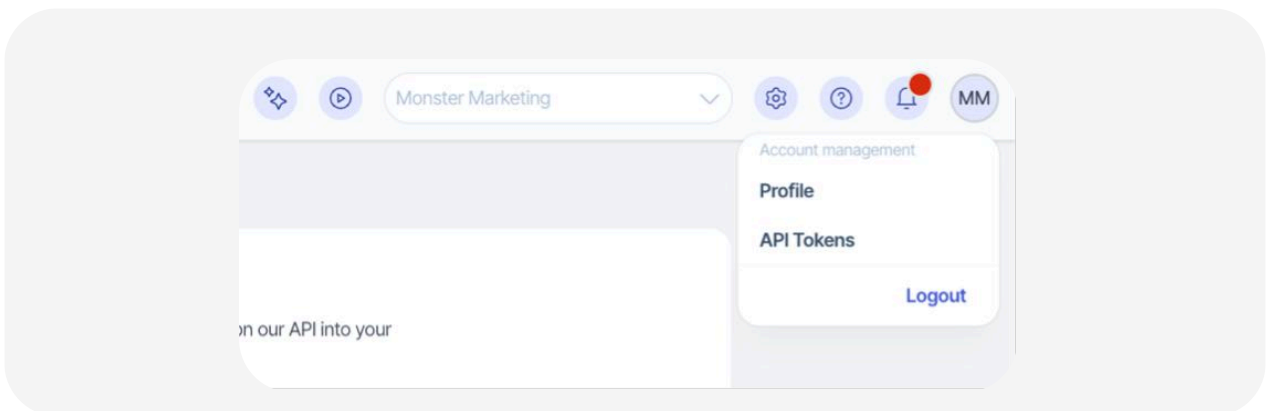

3. Click "Add Extension."

The Chrome extension has been installed in your browser. If you experience any technical challenges, please contact your tech team to inquire about Chrome permissions and restrictions.

4. Log into your SendGrid account.
5. Click on Design Library > click Edit on an existing email.
6. Click on the Chrome extension icon and select the Inbox Monster extension.

Questions? Get more information at inboxmonster.com or reach out at sales@inboxmonster.com

7. Copy your Client ID and API key from your Inbox Monster account.
8. Log into your account at app.inboxmonster.com. If you don't have an account please send an email to sales@inboxmonster.com.
9. Click on the initials icon in the upper right > API Tokens.

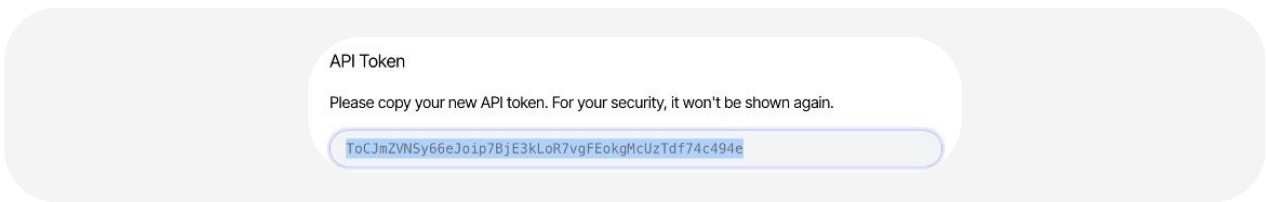

10. Copy the number associated with your Client ID and return to your SendGrid page to paste the Client ID.

11. Copy the API token prior to closing the token window.

12. Return to Inbox Monster > initials icon > API Tokens to Create your API token.
13. Name the token > check Create, Delete, and Update > click Create.

14. Return to SendGrid and paste the API Token > click Save.
15. You are now ready to run a full suite of device previews for the template you have selected. When you are ready, click Create in the Chrome extension and Inbox Monster will generate your device previews.
