

Corporate Profile

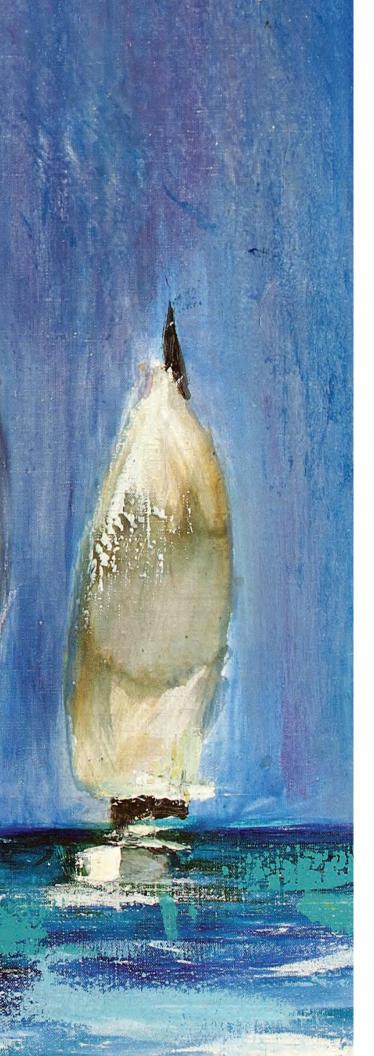

Bermuda Commercial Bank Limited ('BCB') is Bermuda's most innovative digital bank. Aside from our state-of-the art APIs and developer portal, we offer personal service to our customers through our Bermuda based relationship management team. We offer tailored financial solutions to Bermuda-based and international business customers, individual clients and service providers. Since 1969, we have provided outstanding personal service to all our clients. We offer competitive banking products and services as well as direct API access, internet and mobile banking, consumer and commercial lending, and global custody and brokerage services.

Core Values

The BCB Board has established a set of values that guide how we engage with clients, stakeholders and the community. These values are:

- Deliver superior value for our stakeholders and the community
- Differentiate products and solutions through customer experience and innovation
- Maintain a well-capitalised and liquid balance sheet
- Be accountable and always compliant in line with our Code of Conduct
- Promote respect and diversity

History of Bermuda Commercial Bank

EVOLUTION OF THE BANK

- 1969 The Bank is created by an Act of Parliament.
- **2010** Majority shareholding in BCB purchased by an investor group through Permanent Investments Limited.
- **2012** BCB became a wholly-owned subsidiary of Somers Limited and delisted from the Bermuda Stock Exchange.
- **2016** BCB moved into its new owned premises at 34 Bermudiana Road, Hamilton.
- **2019** BCB celebrated its 50-year anniversary.
- **2021** The investment company, Base Financial Limited, purchased BCB from Somers Limited.
- **2022** Divested the trust and corporate services business together with two minor operational subsidiaries.

Chairman's Statement

I took over as Executive chair in February 2025, and as CEO from April 2025.

2025 FINANCIAL PERFORMANCE

We aim to be the digital bank for fintech and digital asset businesses. We already bank the majority of the Bermuda registered digital asset community and are expanding our international customer base on a daily basis.

There has been pleasing progress across the business, particularly in the second half of the year. Significant growth in customer relationships has increased revenue against a flat cost base, moving BCB from material operating losses to a small monthly operating profit from August onwards.

LEADERSHIP

We have made significant improvements to our leadership bench strength, adding talent across BCB, particularly in change and technology where we have brought in expert leaders across Product, Change and Technology, and their impact is already being seen in the delivery of new and innovative solutions to our customers.

REGULATORY ENVIRONMENT

We continue to operate with a strong compliance posture and a collaborative relationship with the Bermuda Monetary Authority. As regulatory expectations for digital assets evolve, we are committed to leading through disciplined governance, financial crime controls and operational resilience. Our technology investment has been matched by enhancements in transaction monitoring, cyber security and oversight, ensuring growth is balanced with safe scale and regulatory confidence.

PEOPLE

We have deployed state of the art tools to support performance management and people development. It was pleasing to see a material turnaround in staff engagement during the year, with net promoter score increasing by over one hundred points in the second half. We have promoted several of our Bermuda-based team during the year, and with the substantially improved financial performance, it was pleasing to be able to return to paying staff bonuses this year.

We remain committed to developing local talent and contributing to Bermuda's financial services ecosystem, with a clear focus on skills, progression and long-term community participation.

TECHNOLOGY

Historically BCB has outsourced its technology management and relied on out-dated tooling. We have established a fully-fledged technology function across service management, software engineering and product. We have delivered a range of improvements across BCB ranging from deploying Microsoft 365 and enabling the use of Copilot AI, to the delivery of our digital onboarding journey, API suite and Virtual account solution.

In parallel with these upgrades, we enhanced our operational resilience framework, including business continuity, cyber protection and modernised control tooling across AML/CTF, allowing us to scale digital services responsibly and securely.

CUSTOMER PROPOSITION

We developed and launched a full API suite and continue to make ongoing improvements to our API offering and developer portal. Our developer experience is by some distance the best in our local market and stands comparison with the best in the world. We aim to deliver the world's best developer experience and have further improvements planned for 2026 to ensure that we do just that.

During the year we built and launched a state-of-the art digital customer on-boarding tool which supports same day account opening, a material improvement vs the norm in our local market. We have launched a full suite of API integrations, web-hooks and attendant developer portal, which have been well received by our tech-first target customers. "Digital Banking" is no longer about websites and apps!

LOOKING FORWARD TO 2026

As we move into 2026, the first customers are going live with our "virtual account" solution, which allows customers to open and manage accounts on behalf of their underlying customers via API. The first users are digital assets businesses that need a fiat currency on/off ramp, although we expect a broader range of use cases. Feedback from customers is very positive, the product is unique in Bermuda, and we believe compares well with the best offerings of our international competitors.

We will completely replace our online banking portal with a new inhouse built solution in 2026 and upgrade our order management and execution capability for our investment's customers.

We expect the first AI and automation use cases to deploy during 2026, allowing us to continue our impressive growth rate, without a commensurate increase in operating cost, driving profitability and increasing ROE.

Financially we expect to be profitable for the full financial year and to begin to self-generate capital.

It has been a pleasure to lead BCB in FY2025, and I am excited by our plans for the upcoming year.

ANDY MIELCZAREK, EXECUTIVE CHAIR AND CEO BERMUDA COMMERCIAL BANK DECEMBER 19 2025

Environment, Social and Governance (ESG)

Bermuda Commercial Bank has played a critical role in Bermuda's financial services industry since 1969 and recognises that strong Environmental, Social and Governance (ESG) practices are fundamental to sustainable value creation, risk management, and long-term stakeholder trust. Our ESG framework is embedded within our strategy, operating model, and decision-making processes, reflecting our commitment to responsible banking and inclusive economic development.

ENVIRONMENTAL STEWARDSHIP

We are acutely aware of the environmental challenges facing Bermuda, particularly the warming of our oceans and the associated increase in hurricane intensity and climate-related risk. In response, we are committed to actively managing our environmental footprint and strengthening climate resilience through:

- Supporting financing for projects that enhance marine resilience, climate adaptation, renewable energy, and sustainable infrastructure.
- Continuous monitoring and reduction of our operational carbon footprint through energy efficiency, responsible procurement, and digital transformation.
- Consideration of physical climate risk, including hurricane exposure and climate stress scenarios, within our risk management framework.
- Alignment with international best practices and emerging climate risk disclosure standards.

Through these measures, Bermuda Commercial Bank aims to play a constructive role in safeguarding the island's environmental future while supporting sustainable economic development.

SOCIAL RESPONSIBILITY

Our social strategy focuses on supporting people, communities, and inclusive economic growth, with a particular emphasis on addressing Bermuda's cost of living challenges:

- Promoting financial inclusion and access to banking services for underserved segments with a strong focus on customer protection, transparency, and service delivery.
- Supporting affordable home ownership by offering highly competitive mortgage products designed to ease the cost burden on local families and first-time buyers.

- Commitment to fair employment practices, together with investment in employee development, wellbeing, and professional growth.
- Active community engagement through targeted social initiatives and partnerships.

This commitment reflects our belief that accessible housing finance is a cornerstone of social wellbeing and sustainable economic participation in Bermuda.

GOVERNANCE EXCELLENCE

We maintain robust governance structures to ensure accountability, transparency, and regulatory alignment:

- Independent Board oversight with clearly defined roles and responsibilities.
- Strong risk management framework increasingly integrated with ESG considerations.
- Strict compliance with regulatory, AML/CFT, and ethical standards.
- Transparent reporting and disclosure practices.
- Regular review of governance policies to align with evolving regulatory and industry expectations.

OUR ONGOING COMMITMENT

BCB continues to refine its ESG framework through policy development, data-driven monitoring, and alignment with global standards. We are committed to evolving our ESG practices in step with regulatory developments, stakeholder expectations, and the long-term sustainability of the communities we serve.

.

Board of Directors

ANDY MIELCZAREK (CHAIR)

Mr. Mielczarek has over 30 years of experience in financial services. He founded and led Chetwood Bank, growing it from start-up to a multi-billion institution, and previously held senior roles at HSBC, including Deputy Head of UK Retail Banking and leadership positions across Continental Europe. A Chartered Accountant, he also served as CFO of Marks & Spencer Bank and worked with MBNA and Charles Schwab.

CHRIS MAYBURY (DEPUTY CHAIR)

Mr. Maybury is the founder and Chairman of Beacon Events. Chris has an extensive business background having held several senior positions. He also serves on the board of several charities and research organizations.

ANDREW BROOK (SENIOR INDEPENDENT DIRECTOR)

Mr. Brook is an experienced non-executive director and was formerly the Asset Management and Banking Leader at PwC Bermuda. Mr. Brook has over thirty years financial services experience as a director of financial institutions and in audit and advisory work, incorporating off-shore and on-shore regulatory expertise.

GREGORY GILMAN

Gregory Gilman is a financial executive with over 20 years of experience in banking, fintech, and digital assets. He is the Founder and CEO of Protego Holdings and Protego Trust, and co-founder of Science Inc. and RxVantage. With expertise in law, investment, and technology, he has driven innovation across the financial sector and serves on multiple corporate boards.

JEANNE ATHERDEN

Mrs. Atherden is a long-standing member of the board and brings over thirty years of accounting, finance and trust experience in management roles in several different business sectors in Bermuda. She is a Fellow of The Chartered Professional Accountants of Bermuda and a member of The Institute of Directors.

JASON WOODY

Mr. Woody is a Senior Managing Director at Palm Ventures specializing in private equity investments. He previously worked as an associate at Dubilier & Company and as an analyst in acquisition finance at Chase Securities. He holds a B.S. from Cornell University, an MBA from Babson College, and serves on several private company boards.

RICHARD CROOK

Richard Crook is a seasoned technology leader with over 25 years in investment banking technology. He drives innovation in crypto and digital assets, delivering client-focused solutions for leading financial institutions. His career includes leadership roles at UBS, NatWest, LAB577, and BCB Group, where he specialized in optimizing client experience and service delivery.

Management's Discussion & Analysis

The MD&A is provided to enable users to assess the Bank's results and performance for the year ended September 30, 2025 and should be read in conjunction with the consolidated financial statements. Note that all references to BCB or the Bank refer to Bermuda Commercial Bank Limited and its subsidiaries on a consolidated basis.

INTRODUCTION

2025 marked the first year of the three-year transformation journey outlined in the prior annual report with significant progress made in growing the balance sheet, driving revenue growth and introducing digital products that make it easier for our clients to do business. We grew our deposit base substantially, which in turn expanded our asset base by more than 60%. This growth supported a stronger net interest margin and an improved underlying profitability, despite the full year loss as we repositioned and restructured the Bank. Our shareholders demonstrated continued confidence in the Bank's future, providing an additional \$20 million of equity capital during the period. This infusion strengthens our capital base and underpins our transition toward becoming a fully digital bank - a strategy designed to enhance customer experience, drive efficiency, and position us competitively in the global evolving financial services landscape.

FINANCIAL PERFORMANCE HIGHLIGHTS

The financial results for the year reflect the early signs of growth, driven by our client-focused strategy and the impact of strategic restructuring reflected in the significant increase in deposits (+68%) that expanded our asset base by more than 60% and drove higher net interest margin and improved underlying profitability. At the same time, restructuring costs and investments in repositioning the Bank toward a digital future contributed to a full year loss. These actions, while affecting short term earnings, are essential to building a more efficient, technology driven institution capable of delivering sustainable returns in the years ahead. Our shareholders reinforced their confidence in this strategy by providing an additional \$20 million of equity capital, strengthening our capital adequacy and supporting future growth initiatives.

KEY FINANCIAL HIGHLIGHTS (\$million)

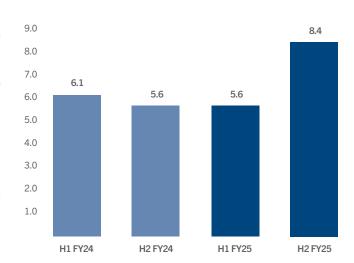

RET HAROTAL HIGHEIGHTS (WIRINGH)	2025	2024	% Change
Income Statement			
Net interest Income	\$ 14.0	\$ 11.8	19%
Non interest Income	\$ 3.0	\$ 2.5	19%
Total income	\$ 17.0	\$ 14.3	19%
Total expenses*	\$ 23.2	\$ 24.9	7 %
Net loss*	\$ (6.2)	\$ (10.6)	42%
Balance Sheet			
Total assets	\$ 695.9	\$ 434.0	60%
Total deposits	\$ 623.1	\$ 371.4	68%
Total equity	\$ 63.9	\$ 52.7	21%
* excludes one-off restructuring costs of \$1.7m			

RESULTS OF OPERATIONS FOR THE YEAR ENDED SEPTEMBER 30, 2025

During the year, the Bank incurred a net loss (excluding one-off restructuring costs) of \$6.2 million compared to a net loss of \$10.6 million in 2024. This 42% improvement in profitability was primarily due to higher net interest income, and active management of operating expenses and project costs.

NET INTEREST INCOME

Net interest income of \$14.0 million for the year ended September 30, 2025 was 19% higher than the \$11.8 million achieved in 2024. The underlying growth was achieved in H2'25 in line with the corresponding increase in deposits achieved in the second-half of FY2025. Net Interest Margin of 2.70% (2024: 2.91%) was lower than prior-year primarily as a result of the lowering interest rate environment impacting the highly liquid asset component of the balance sheet.

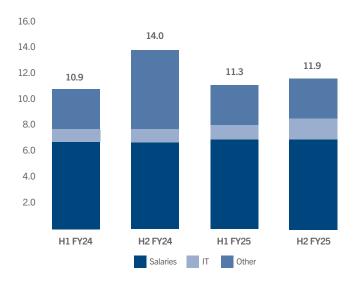

NON-INTEREST INCOME

The Bank recorded net non-interest income of \$3.0 million which was 19% higher than the \$2.5 million achieved in 2024. The composition of the non-interest income sources remained materially consistent with that of the previous year with fees and commissions income of \$1.7 million (2024: \$1.7 million) being the largest contributor. Moving forward, it is expected that transactional fee income will form a greater proportion of income for the Bank as our digital solutions for clients deliver the planned benefits.

EXPENSES

The Bank continues to focus on effective cost management. In 2025, the Bank's total expenses, excluding one-off restructuring costs, amounted to \$23.2 million, 7% lower than in 2024, as we focused on effective transformation and product delivery leveraging internal capabilities, rather than utilizing third-party suppliers. As we digitize the Bank and build new products for our customers with our own resource, the composition of our expense base will continue to evolve accordingly. We continue to set long-term, cost/income ratio targets that are akin to those achieved by Fintechs and fully digital banks.

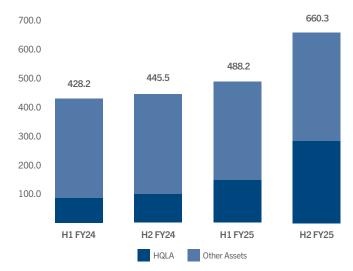

FINANCIAL POSITION AS AT SEPTEMBER 30, 2025

Assets

Total assets increased by 60% from prior year. Consistent with the shape of our deposit base, the Bank maintained a prudent level of liquid assets in line with the Bank's liquidity management framework. As at September 30, 2025, the Bank held cash and cash equivalents of \$419.4 million that represented 60.3% of total assets compared to \$206.8 million or 47.6% a year ago. The Bank's financial investment portfolio as at September 30, 2025 was \$164.6 million compared to \$124.9 million a year ago.

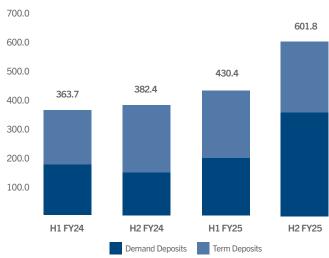

The Bank's investment portfolio is monitored across a wide range of risk and performance measures, and in accordance with its risk management framework, the portfolio is actively diversified at the industry, jurisdiction and counterparty level. The investment

portfolio consisted primarily of government debt securities and corporate debt securities (non-banks).

Liabilities

Total deposits increased by 68% and reached \$623.1 million as at September 30, 2025 (2024: \$371.4 million) as customers funded their accounts in response to new solutions introduced and the successful onboarding of new customers.

The chart above reflects the impact of transformation in the second half of the year and the pipeline of clients to onboard in 2026 reinforces our confidence in achieving continued balance sheet growth and progressing towards sustainable profitability.

CAPITAL POSITION AS AT SEPTEMBER 30, 2025

BCB is subject to minimum capital requirements set by the Bermuda Monetary Authority ("BMA)" in accordance with guidelines developed by the Basel Committee on Banking Supervision. The Basel Committee's standards for capital and liquidity, commonly referred to as "Basel III", establish minimum requirements for common equity, a leverage ratio, a minimum Liquidity Coverage Ratio ("LCR"),

a minimum Net Stable Funding Ratio ("NSFR"), and measures to promote the build-up of capital. The Basel III minimum capital requirements include a 4.5% Common Equity Tier 1 Capital ratio (CET1) and an 8.0% Total Capital ratio. In addition, banks need to build a capital conservation buffer of 2.5%. In terms of liquidity and stable funding, banks need to maintain minimum LCR and NSFR ratios of 100%.

Regulatory Ratios	2025	2024
Tier1/Total capital ratio	40.9%	30.8%
Leverage ratio	9.5%	12.4%
Liquidity coverage ratio	311.0%	601.0%
Net stable funding ratio	214.0%	186.0%

Our shareholders reinforced their confidence in the Bank's strategy by providing an additional \$20 million of equity capital, strengthening our capital adequacy. The Bank's Tier 1 capital, leverage ratio, LCR and NSFR ratios at year end were significantly above these minimum regulatory requirements.

RISK MANAGEMENT

The Bank is exposed to a wide range of financial and non-financial risks and maintains a comprehensive approach to effectively manage these risks through a defined Enterprise Risk Management Framework ("ERMF"). This framework prescribes how risks are categorized and managed to ensure the Bank can achieve its strategic goals in a prudential and sustainable manner.

The Bank's ERMF is designed on core principles of maintaining a sound risk culture, delivering effective governance, ensuring all risks are clearly understood and appropriately prioritized with a forward-looking approach and the provision of robust monitoring and reporting. During 2025, BCB continued to enhance its risk management framework to ensure it remains aligned to its evolving business activities, the regulatory landscape and the dynamic operating environment. We encourage readers of this report to also read the Pillar 3 Disclosures report as it includes important details about the Bank and its wholly-owned subsidiaries' capital adequacy, risk management, and other information.

Risk Culture

The fostering of a sound risk culture is a key tenet of BCB's ERMF. This is achieved by establishing and exercising accountability, promoting risk awareness and encouraging a proactive approach to the identification and mitigation of risks. These responsibilities are underpinned by an established Code of Conduct that prescribes the core values and behavioral expectations of the Bank and how these are governed to ensure transparency and integrity standards are maintained by all employees.

The Three Lines Model

BCB has adopted a risk framework based on the "three lines" model which addresses how specific duties relating to risk and control are segregated and coordinated. Under this model, the primary responsibility

for risk ownership lies at the client-facing and business process level as the first line. Risk and compliance functions form the second line and are responsible for providing guidance, oversight and challenge of the effectiveness of the first line. Internal Audit, the third line, provides independent and objective assurance over the adequacy of design and operational effectiveness of the first- and second-line functions.

Governance

BCB's risk governance structure is defined by a clear and robust committee framework and delegation of authority that facilitates both top-down ownership, guidance and oversight as well as bottom-up escalation and aggregation of reporting. This structure defines key areas of authority and responsibility whilst establishing appropriate lines of reporting across the three lines.

Risk Strategy

BCB's risk management process is an ongoing cycle of identification and assessment of risks, the effective monitoring and control of these and accurate and timely reporting through its governance structure. BCB categorizes risks into 6 principal types; Credit, Market, Treasury, Operational Compliance and Strategic/Reputational through which a comprehensive set of underlying individual risks are assessed and monitored. Aligned to this taxonomy, the Board approves a formal Risk Appetite Statement (RAS) that articulates the level of risk that BCB is willing to accept in the pursuit of its business strategy. The RAS is defined through qualitative risk statements supported by quantitative risk limits and parameters. It forms the basis for ongoing assessment and dialogue between management and the Board regarding BCB's current and evolving risk profile, facilitating strategic and financial decisions to be made on an informed basis. Through clear articulation of the Bank's risk principles and appetite, the RAS raises awareness across the organisation and creates a foundation for the effective measurement and communication of risk among internal and external stakeholders. As such it supports a culture that integrates risk management and awareness into the Bank's ways of working in a transparent, collaborative and consistent manner.

BCB adopts an agile approach to ensure that risk management practices constantly evolve as the Bank executes its strategic plan. To support this, the Bank utilizes a Top and Emerging Risk register that facilitates a forward-looking horizon risk assessment as well as regular stress testing to ensure BCB's risk profile is stressed against cyclical and idiosyncratic down-side scenarios.

While related party transactions continue to feature in BCB's asset profile, the Bank's loan growth strategy has reduced concentration and these transactions remain closely monitored and governed. The Bank ensures that credit exposure to related parties is examined appropriately, approved on market terms and conditions, and is subject to oversight by the Bank's Risk department.

Details of the Bank's risk structure are further outlined in note 20 to the consolidated financial statements.

INDEPENDENT AUDITOR'S REPORT

To the Shareholder and Board of Directors of Bermuda Commercial Bank Limited

Opinion

We have audited the consolidated financial statements of Bermuda Commercial Bank Limited and its subsidiaries (the "Bank"), which comprise the consolidated statement of financial position as at September 30, 2025, the consolidated statements of income, other comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising material accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Bank as at September 30, 2025, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the "Auditor's responsibilities for the audit of the consolidated financial statements" section of our report. We are independent of the Bank in accordance with International Ethics Standards Board for Accountants International Code of Ethics for Professional Accountants (including International Independence Standards) ("IESBA Code") together with the ethical requirements that are relevant to our audit of the consolidated financial statements in Bermuda, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting process.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are
 appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the
 Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Bank to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

1. Description of business

Bermuda Commercial Bank Limited ("BCB") is a Bermuda incorporated company, licensed and regulated by the Bermuda Monetary Authority ("the BMA") to conduct banking under the Banks and Deposit Companies Act 1999 and investment business under the Investment Business Act 2003. BCB, together with its subsidiaries (collectively, the "Bank"), provides banking, custody, investment and lending to retail and corporate clients. BCB's subsidiaries include Bercom Nominees Limited (licensed and regulated by the BMA under the Corporate Service Provider Business Act 2012), BCB Asset Management Limited ("BCBAML") and VT Strategies Holdings Limited.

BCBAML acted as the BSX Trading Member for the Bank but had no customers, licenses, or memberships beyond this role. On request of the BSX, the Trading Membership was transferred from BCBAML to BCB, making BCBAML's existence redundant in its current form. Management is evaluating whether to wind up the BCBAML or to repurpose it strategically as part of the BCB's future plans. No decisions have been made as of the date the financial statements were approved.

BCB's registered office is at 34 Bermudiana Road, Hamilton HM 11, Bermuda.

BCB is a wholly owned subsidiary of Base Financial Ltd (formerly known as "Provident Holdings Ltd"), a Bermuda investment holding company whose majority shareholder ultimate parent undertaking is BFG Hamilton Investments, LLC, a company incorporated in the United States of America and owned by Mr. Bradley Palmer.

2. Basis of preparation and material accounting policies

2.1 Basis of preparation

The consolidated financial statements for the year ended September 30, 2025 have been prepared on a going concern basis. In this regard, management has assessed the Bank's ability to continue as a going concern and to meet regulatory requirements applicable to capital, liquidity and funding with no exception at least, but not limited to, twelve months from the reporting date.

The consolidated financial statements have been prepared on a historical cost basis, except for certain financial instruments measured at fair value ("FV"). The consolidated financial statements are presented in United States dollars, which is the Bank's functional and reporting currency. All values are rounded to the nearest dollar, except when otherwise indicated.

The consolidated financial statements for the year ended September 30, 2025, were authorised for issue in accordance with a resolution of the Board of Directors on December 12, 2025.

2.2 Statement of compliance

The consolidated financial statements of the Bank have been prepared in accordance with International Financial Reporting Standards ("IFRS Accounting Standard"), as issued by the International Accounting Standards Board ("IASB"). The Bank has consistently applied the material accounting policies to all periods presented in these consolidated financial statements.

All intercompany balances and transactions are eliminated in full on consolidation. The financial statements of the Bank's subsidiaries owned at the financial year-end are presented for the same reporting year as the Bank, using consistent accounting policies.

Subsidiaries are fully consolidated until the date on which control was relinquished by the Bank. Control is forfeited when the Bank no longer has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

September 30, 2025

Basis of preparation and material accounting policies (continued)

2.3 Presentation of consolidated financial statements

The Bank presents its Consolidated Statement of Financial Position broadly in order of liquidity. An analysis regarding recovery or settlement of assets and liabilities within 12 months after the reporting date ("current"), and more than 12 months after the reporting date ("non-current"), is presented in Note 20.

2.4 Use of judgments, estimates, and assumptions

The preparation of consolidated financial statements in conformity with IFRS Accounting Standard requires management to make certain estimates, judgments, and assumptions that affect the application of the reported amounts in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Estimates, judgments and assumptions are continually evaluated, and are based on historical experience and other factors, including expectations of future events, that are believed to be reasonable under the circumstances. The estimates, judgments, and assumptions that have a risk of causing material adjustments to the consolidated financial statements within the next financial year are discussed below:

Impairment or Expected credit loss ("ECL") Allowance on financial assets

The impairment or ECL allowance for loans and advances and debt instruments in the investment portfolio that are carried at Amortised Cost ("AC") or Fair Value Through Other Comprehensive Income ("FVOCI") is measured according to the significant increase in credit risk of those assets from their initial recognition. The significance of the increase in credit risk is assessed based on internally developed parameters and may include estimates and judgements. Further, several internal and external forward-looking judgements, estimates and assumptions are used in assessing the ECL allowances. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

2.5 Material Accounting Policies

Basis of consolidation

The consolidated financial statements include the assets, liabilities, and results of operations of the Bank and its subsidiaries as at September 30, 2025. A list of these subsidiaries is presented in Note 17.

Subsidiaries

Subsidiaries are entities controlled by the Bank. The Bank controls an entity if it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of the subsidiaries are included in the consolidated financial statements from the date on which control commences until the date when control ceases.

Loss of control

When the Bank loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary and any related non-controlling interest and other components of equity. Any resulting gain or loss is recognised in the Consolidated Statement of Income. Any interest retained in the former subsidiary is measured at fair value when control is lost.

Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses (except for foreign currency transaction gains or losses) arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

September 30, 2025

2. Basis of preparation and material accounting policies (continued)

Foreign currency translation

The consolidated financial statements are presented in United States dollars, which is the Bank's functional currency. The Bank and each of its subsidiaries determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency.

Bermuda dollar balances and transactions are translated into United States dollars at fixed parity. Monetary assets and liabilities in other currencies are translated into United States dollars at the rates of exchange prevailing at the reporting date and non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated into United States dollars at historic rates or the rates of exchange prevailing at the dates of the transactions.

Income and expense items in other currencies are translated into United States dollars at the rates prevailing at the dates of the transactions. Realised and changes in unrealized gains and losses on foreign currency positions are reported under net exchange gains or losses in the Consolidated Statement of Income of the current year.

Cash and cash equivalents

Cash and cash equivalents consist of notes and coins on hand and short-term deposits with other banks which are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value and have original maturities of three months or less from the reporting date. Cash and cash equivalents may also include high quality liquid assets ("HQLA") such as U.S., U.K. and Canadian government treasury bills, and investment grade corporate bonds.

Cash and cash equivalents are carried at amortised costs in the statement of financial position.

Financial instruments

Recognition and initial measurement

The Bank initially recognises loans and advances, deposits and other financial liabilities on the date on which they are originated. All other financial instruments (including regular purchases and sales of financial assets) are recognised on trade date, which is the date on which the Bank becomes a party to the contractual provisions of the instrument.

Classification

On initial recognition, a financial asset is classified as measured at Amortised Cost ("AC"), Fair Value Through Other Comprehensive Income ("FVOCI") or Fair Value Through Profit or Loss ("FVTPL").

A financial asset is measured at AC if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI.

A debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI.

On initial recognition of an equity investment that is not held for trading, the Bank may irrevocably elect to present subsequent changes in fair value in the Consolidated Statement of Other Comprehensive Income ("OCI"). This election is made on an investment-by-investment basis. No election has been made in the current year.

All other financial assets are classified as measured at FVTPL.

In addition, on initial recognition, the Bank may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise. No election has been made in the current year.

September 30, 2025

2. Basis of preparation and material accounting policies (continued)

Financial instruments (continued)

Business model assessment

The Bank makes an assessment based on the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed, and information is provided to management. This includes the (a) business model where the objective is to hold assets in order to collect contractual cash flows, (b) business model where the objective is achieved by both collecting contractual cash flows and selling financial assets, and (c) other business models.

Other business models (where applicable) include financial assets that are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets. These are measured at FVTPL as these are generally held for trading, and the performance is evaluated on a fair value basis.

Assessment of whether contractual cash flows are SPPI

Financial instruments that meet the business model assessment of (a) and (b) above are assessed to evaluate if the contractual cash flows represent SPPI which would typically be expected from basic lending arrangements. For this purpose, 'principal' is defined as the fair value of the financial asset on initial recognition and may change over the life of the financial asset. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as profit margin.

Reclassifications

Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Bank changes its business model for managing financial assets.

Financial liabilities

The Bank classifies its financial liabilities as measured at amortised cost or FVTPL.

Derivatives

Derivatives include foreign exchange forward contracts and warrants. The Bank uses derivatives to manage its credit and market risk exposure and also to provide clients with the ability to manage their own risk exposures. The Bank does not use derivatives for trading or for speculative purposes.

The Bank uses foreign exchange forward contracts to manage the Bank's foreign exchange risk on certain investment securities denominated in foreign currencies.

Derivatives are recorded at fair value and carried as assets when the fair value is positive, and as liabilities when the fair value is negative.

The accounting treatment for a fair value gain or loss on a derivative depends on whether the derivative is designated as a hedging instrument. Changes in the fair value of derivatives are included in the Consolidated Statement of Income in gains (losses) on derivative financial instruments for the option contracts, and in net foreign exchange gains or losses for the forward contracts, unless they qualify for hedge accounting. The Bank does not currently apply hedge accounting.

September 30, 2025

2. Basis of preparation and material accounting policies (continued)

Financial instruments (continued)

Derecognition

A financial asset is derecognised when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred, or in which the Bank neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

On derecognition, except for equity investments measured at FVOCI, the difference between the carrying amount of the financial asset (or the carrying amount allocated to the portion of the asset derecognized) and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognised in OCI, is recognised in the Consolidated Statement of Income. Derecognition gains and losses from equity investments measured at FVOCI are not recognised in the Consolidated Statement of Income. However, transfers may be made from OCI to retained earnings at the discretion of management.

A financial liability is derecognized when its contractual obligations are discharged or cancelled or expire; any difference between the carrying amount and the consideration paid is recognised in profit or loss under other income.

Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Consolidated Statement of Financial Position only when there is a legally enforceable right to offset the recognised amounts, and there is an intention to settle on a net basis, or to realise the assets and settle the liability simultaneously. Income and expenses will not be offset in the Consolidated Statement of Income unless required or permitted by the IFRS accounting standard or interpretation as specifically disclosed in the accounting policies of the Bank.

Determination of fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Bank has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the Bank measures fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Bank uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

The best evidence of fair value of a financial instrument at initial recognition is normally the transaction price which is the fair value of the consideration given or received. If the Bank determines that the fair value at initial recognition differs from the transaction price and the fair value is evidenced neither by quoted price in an active market for an identical asset or liability nor based on a valuation technique that uses only data from observable markets, then the financial instrument is measured initially at fair value and it is adjusted to defer the difference between the fair value at initial recognition and the transaction price. Subsequently, the difference is recognised in the Consolidated Statement of Income on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

September 30, 2025

2. Basis of preparation and material accounting policies (continued)

Financial instruments (continued)

Impairment (continued)

ECL allowances are recognised for financial assets and loan commitments, except for financial assets that are measured at FVTPL and equity investments measured at FVOCI. ECL allowances applicable to financial assets measured at AC are deducted from the gross carrying value of the respective financial asset while the ECL allowances applicable to financial assets measured at FVOCI are recognised in OCI. Movements in ECL allowances are recognised in the Consolidated Statement of Income.

ECL allowances are a probability-weighted estimate of credit losses that are expected to arise over the life of the asset (the lifetime expected credit loss), unless there has been no 'significant increase in credit risk' since origination (12 month expected credit loss). Accordingly, for loans and advances and financial investments, an assessment is performed at the end of each reporting period to evaluate whether a financial instrument's credit risk has increased significantly since its initial recognition.

Financial assets and loan commitments are categorized into the following groups based on the above assessment.

- Stage 1 Includes debt instruments where there has not been any significant increase in credit risk since initial recognition.

 For instruments under stage 1, an allowance is required for ECLs resulting from default events that are possible within the next 12 months from the reporting date (i.e. 12-Months ECL).
- Stage 2 Includes debt instruments where there has been a significant increase in credit risk since initial recognition on an individual or collective basis. For instruments under stage 2, an allowance is required for ECLs resulting from all possible default events over the expected life of the instrument (i.e. Lifetime ECL).
- Stage 3 Includes debt instruments that are credit-impaired due to objective evidence of impairment. For instruments under Stage 3, an allowance is required to reduce the carrying value of the asset to its recoverable value.

Originated credit impaired: Originated credit impaired assets (if any) are financial assets that are credit impaired on initial recognition. They are recorded at fair value at initial recognition and interest income is subsequently recognised based on a credit-adjusted effective interest rate ("EIR"). ECLs are only recognised or released to the extent that there is a subsequent change in the expected credit losses.

ECL allowances for accounts receivable are estimated based on the simplified approach allowed in IFRS 9.

Significant increase in credit risk

In order to determine whether an instrument or a portfolio of instruments is subject to an impairment provision using 12-Month ECL or Lifetime ECL, the Bank assesses whether credit risk has increased significantly since initial recognition at each reporting date. Determining whether an increase in credit risk is significant depends on the characteristics of the financial instrument and the borrower. For this purpose, several internal risk criteria have been set by the Bank based on reasonable and supportable information that is relevant and available without undue cost or effort.

These include:

- quantitative information based on movement in debt servicing ratio and loans to value;
- qualitative indicators;
- backstop of 30 days past due for loans and advances, while a backstop of 10 days for financial investments;
- analyses of historical and forward-looking data; and
- data from internal and external sources such as external rating agencies.

September 30, 2025

2. Basis of preparation and material accounting policies (continued)

Financial instruments (continued)

Impairment

Measurement of ECL

The Bank estimates the ECLs for loans and advances, loan commitments (if any), and financial investments based on three probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive.

The key inputs into the measurement of ECL are the term structure of the following variables:

- Probability of Default ("PD")
- Loss Given Default ("LGD")
- Exposure at Default ("EAD")

ECL for exposures in Stage 1 is calculated by multiplying the 12-month PD by LGD and EAD. Stage 2 ECL is calculated by multiplying the lifetime PD by LGD and EAD. ECL for exposures in stage 3 instruments is calculated as the difference between the carrying value and the net present value of estimated future cash flows.

The PD is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the instrument has not been previously derecognized and is still in the portfolio. 12-month PD rates for instruments with similar credit risk characteristics are assessed based on the default rates published by approved external parties. Further, several judgements, estimates and forward-looking assumptions are applied when adjusting the PD rates for financial instruments originating in Bermuda and for financial instruments with significant increases in credit risk.

The LGD is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including the realisation of any collateral or credit enhancements that are integral to the underlying financial instrument. For financial instruments that do not have a collateral, the LGD is estimated based on the data published by the external rating agencies. This is usually expressed as a percentage of the EAD.

EAD represents the expected exposure in the event of a default. This is derived from the current exposure to the counterparty and potential changes to the current amount allowed under the contract and arising from amortisation. The EAD of a financial instrument is its gross carrying amount at the time of default. For lending commitments, the EADs are potential future amounts that may be drawn under the contract, which are estimated based on historical observations and forward-looking forecasts. For financial guarantees (if any), the EAD represents the amount of the guaranteed exposure when the financial guarantee becomes payable.

As described above, and subject to using a maximum of a 12-month PD for Stage 1 financial assets, the ECL is measured by considering the risk of default over the maximum contractual period over which it is exposed to credit risk. The maximum contractual period extends to the date at which the entity has the right to require repayment of the financial asset or terminate a loan commitment or guarantee.

The source and estimation of PD, LGD and EAD, and their application are dependent on the shared risk characteristics common to a selected group of assets. For portfolios in respect of which the entity has limited historical data, external benchmark information is used to supplement the internally available data.

The ECL for accounts receivable is different from the approach described above as it is estimated using the 'simplified approach' described in IFRS 9. A practical expedient known as the 'provision matrix' method, allowed by IFRS 9, is adopted to assess the allowances under the simplified approach. The provision matrix method specifies fixed provision rates (or 'loss rates') depending on the number of days that a receivable is past due.

Accordingly, the multiplication of accounts receivable in each age bucket by the respective expected loss rates provides the ECL allowance for accounts receivable.

September 30, 2025

2. Basis of preparation and material accounting policies (continued)

Financial instruments (continued)

Impairment (continued)

Incorporation of forward-looking information

Forward-looking information is incorporated into both the assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and the measurement of ECL.

When estimating ECLs, the Bank formulates three economic scenarios: a base case, which is 'the most likely outcome' scenario, and two less likely scenarios, one upside (i.e. stronger near-term growth) and one downside (i.e. moderate negative growth), and each is assigned with an estimated probability of occurring. The downward scenario is constructed with 33% probability (2024: 30%). The upward scenario is constructed with 17% probability (2024: 20%). The base scenario is assigned the remaining 50% (2024:50%). Evaluation and application of multiple economic scenarios are key elements of the expected credit loss process as the ECL of a financial instrument shall be measured in a way that reflects an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes.

Economic inputs applicable to the geographical jurisdiction of the underlying financial instrument group are used in developing the macroeconomic scenarios applicable to the estimation process. These economic inputs include gross domestic product growth rate, interest rates and unemployment rates of the relevant jurisdiction. Further, since the inputs and models used for calculating ECLs may not capture all characteristics of the market at the date of the financial statements, quantitative and qualitative adjustments or overlays are occasionally made as temporary adjustments when such differences are significantly material.

Where possible, the above data is obtained from third-party sources and the reasonability of inputs, weights attributed to economic inputs and multiple scenarios, and other assumptions used in developing forward-looking information are reviewed at least annually.

Definition of default and cure

The definition of default of a group of financial instruments may differ according to their nature and exposure to credit risk and may involve both quantitative and qualitative factors. Loans and advances are considered as defaulted and therefore Stage 3 (credit-impaired) for ECL calculations in all cases when the borrower becomes 90 days past due on its contractual payments. Financial investments carried at AC and FVOCI are considered defaulted and therefore Stage 3 (credit-impaired) for ECL calculations in all cases when the interest, and/or interim or final principal payment becomes 30 days past due on the instrument's contractual payments.

As a part of the assessment of whether an individually significant customer is in default, the Bank also considers a variety of factors that may indicate their inability to pay. When such events occur, the Bank carefully considers whether the event should result in treating the customer as defaulted and therefore assessed as Stage 3 for ECL calculations or whether Stage 2 is appropriate. Such factors include, but are not limited to, downgrade in internal rating of the loan, deterioration in loan-to-value, and other qualitative indications that suggest that the borrower of the loan or the issuer of the financial investment is unlikely to honour its credit obligation in full, or in part, due to reasons such as significant financial difficulty of the issuer, breach of covenants, potential bankruptcy, other financial reorganization, and the absence of an active market. It is the Bank's policy to consider a financial instrument as 'cured' and therefore re-classified out of Stage 3 when one or more of the above criteria have improved.

September 30, 2025

2. Basis of preparation and material accounting policies (continued)

Financial instruments (continued)

Impairment (continued)

Modification of financial assets

A financial asset is derecognized when the terms and conditions have been renegotiated to the extent that, substantially, it becomes a new asset, with the difference recognised as a derecognition gain or loss, to the extent that an impairment loss has not already been recorded. The newly recognised financial asset is classified as Stage 1 or 2 for ECL measurement purposes, unless the new asset is deemed to be credit impaired at the date of inception. If the modification does not result in cash flows that are substantially different, the modification does not result in derecognition. Based on the change in cash flows discounted at the original EIR, a modification gain or loss is recorded, to the extent that an impairment loss has not already been recorded.

Write-offs

Financial instruments are written off either partially or in their entirety only when the Bank has no reasonable expectation of recovering the instrument in its entirety or a portion thereof. If the amount to be written off is greater than the accumulated ECL allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to 'Impairment gains (losses) on financial instruments' in the Consolidated Statement of Income.

Impairment of non-financial assets

The Bank assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Bank estimates the asset's recoverable amount. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its estimated recoverable amount.

Property and equipment

Property and equipment are carried at historical cost less accumulated depreciation and any impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the property and equipment. Depreciation is calculated using the straight-line method over the estimated useful lives of the related assets, which are determined in accordance with the Bank's accounting policy as shown below:

Asset class/category	Estimated useful life
Buildings	35-40 years
Equipment e.g. office furniture	5-10 years
Computer equipment	3-5 years
Operating lease equipment	5-10 years
Leasehold improvements	Lesser of the lease term and useful life

Depreciation commences once the property and equipment is put into use. Subsequent costs, such as repairs and maintenance, are charged to the Consolidated Statement of Income during the financial year in which they are incurred.

September 30, 2025

2. Basis of preparation and material accounting policies (continued)

Leases

Property and equipment is derecognised on disposal or when no future economic benefits are expected from its use. Any gain or loss on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is recognised in other operating income in the Consolidated Statement of Income in the year the asset is derecognised.

At inception of a contract, the Bank assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

At inception or on reassessment of a contract that contains a lease component, the Bank allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices.

Bank as a Lessee

The Bank applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Bank recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets. The asset is subject to the Bank's impairment policy on non-financial assets and amortised over the length of the lease while the lease liability is measured at amortised cost.

As a lessee, the Bank recognises lease payments associated with short-term leases (i.e. where the lease term is 12 months or less) and leases of low-value assets as an expense over the lease term.

The right-of-use assets are presented within the note applicable to Property and equipment (Note 7), and the lease liability within the note applicable to Other liabilities (Note 11).

Bank as a Lessor

When the Bank acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. To classify each lease, the Bank makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is classified as a finance lease; if not then it is an operating lease. However, there were no finance leases in the Bank's consolidated financial statements at either year-end.

Income from operating leases under IFRS 16 are recognised on a straight-line basis over the lease term as part of 'Other operating income' on the Consolidated Statement of Income.

When the Bank is an intermediate lessor, it accounts for its interests in the head lease and the sub-lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head-lease, not with reference to the underlying asset. If a head lease is a short-term lease to which the Bank applies the exemption described above, then the Bank classifies the sub-lease as an operating lease. However, there were no sub-leases in the Bank's consolidated financial statements at either year-end.

September 30, 2025

2. Basis of preparation and material accounting policies (continued)

Intangible assets

The Bank's other intangible assets include the value of computer software. An intangible asset is recognised only when its cost can be measured reliably, and it is probable that the expected future economic benefits that are attributable to it will flow to the Bank. Intangible assets are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortisation and any impairment losses. Amortisation is calculated using the straight-line method to write down the cost of intangible assets to their residual values over their estimated useful lives as follows:

Computer software

5-10 years

Amortisation of computer software commences once it is available for use.

Subsequent expenditure on computer software is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

Customer drafts payable

Customer drafts payable consist of the balance of un-cashed customer drafts at the reporting date. This balance is customerdriven and fluctuates based on when customers purchase drafts and when they are presented for payment. Customer drafts payable are presented under liabilities on the Consolidated Statement of Financial Position upon issue.

Recognition of income

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Bank and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognised:

Interest income

Interest income is recognised in the Consolidated Statement of Income for all interest-bearing instruments measured at AC and FVOCI, on the accrual basis, using the effective interest rate method. The interest income from financial assets that are classified as Stage 3 for ECL purposes, is calculated by applying the effective interest rate to the net carrying value of the asset, which is the gross carrying amount less the applicable provision for ECL.

Interest income applicable to interest-bearing instruments measured at FVTPL is recognised on the accrual basis, using the coupon rate of the instrument.

Fees and commissions

Revenue from contracts with customers primarily includes fees and commissions earned from banking and custodial services. Income is recognised when the performance obligations associated to those contracts are satisfied. Accordingly, income is recognised at the time of the transaction unless the performance obligations associated with the contract are satisfied over a period of time, in which case, the income is recognised over that period according to the complete satisfaction of the performance obligations. Consideration for fees and commissions is collected at the time of the transaction unless it is due upon receipt of the invoice by the customer. Consideration receivable from customers is presented under other assets on the Statement of Financial Position while the consideration received in advance before the Bank provides the service (i.e. a contract liability) is deferred and presented under other liabilities on the Consolidated Statement of Financial Position.

Dividend income

Dividend income is recognised when the Bank's right to receive the payment is established.

September 30, 2025

2. Basis of preparation and material accounting policies (continued)

Expenses

Expenses are recognised in the Consolidated Statement of Income on the accrual basis. Interest expense is calculated using the effective interest rate method.

Dividends on common shares

Dividends on common shares are recognised as a liability and are deducted from equity in the period in which they are declared.

Provisions

Provisions are recognised when the Bank has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The expense relating to any provision is presented in the Consolidated Statement of Income, net of any reimbursement.

Fiduciary activities

The Bank acts as custodian that results in the holding or placing of assets on behalf of individuals, corporates, trusts, retirement benefit plans, and other institutions. These assets and income arising thereon are excluded from these consolidated financial statements, as they are not assets or income of the Bank.

New standards, interpretations, and amendments to published standards relevant to the bank issued but not yet effective

Standards issued but not yet effective up to the date of issuance of the Bank's consolidated financial statements which may be relevant to the Bank are listed below. The following new and amended standards are effective for annual periods beginning after 1 October 2025 and the Bank does not intend to adopt them early until they become effective:

- Classification and Measurement of Financial Instruments Amendments to IFRS 9 Financial Instruments and IFRS 7 Financial instruments Disclosures effective 1 Jan 2026.
- Annual improvements to IFRS Accounting Standards Amendments to;
 - IFRS 7 Financial Instruments: Disclosures and its accompanying Guidance on implementing IFRS 7
 - IFRS 9 Financial Instruments
 - o IFRS 10 Consolidated Financial Statement; and
 - IAS 7 Statement of Cash flows.
- Annual improvements to IFRS Accounting Standards Amendments effective 1 Jan 2027.
 - o IFRS 18 Presentation and Disclosure in Financial Statements will replace *IAS 1 Presentation of Financial Statements* with key new requirements being classification of income and expenses in five categories in the statement of profit or loss, namely the operating, investing, financing, discontinued operations and income tax categories. Disclosure on Management-defined performance measures (MPMs) and enhanced guidance grouping information in the financial statements.

Early adoption

The Bank did not early adopt any new standards during the year ended September 30, 2025.

September 30, 2025

3. Cash and cash equivalents

Cash and cash equivalents were made up as follows:

	<u>2025</u>	<u>2024</u>
Cash and demand deposits \$	34,691,408	\$ 25,427,182
Term deposits maturing within three months	142,578,004	78,484,170
HQLA maturing within three months	242,121,700	102,897,903
Total \$	419,391,112	\$ 206,809,255

Term deposits amounting to \$5,675,081 were collateralized at September 30, 2025 (2024: \$5,423,229). The collateral posted supports the Bank's foreign exchange market transaction volume and Visa credit card settlements.

The average effective yields earned were as follows:

,	<u>2025</u>	<u>2024</u>
Cash and demand deposits	-0.04%	0.87%
Term deposits maturing within three months	4.03%	5.16%
HQLA	4.05%	5.06%

4. Derivative financial instruments

At their inception, derivatives often involve only a mutual exchange of rights and obligations with little or no transfer of consideration. However, these instruments frequently involve a high degree of leverage and can be very volatile. A relatively small movement in the value of the asset, index or price underlying a derivative contract may have a significant impact on the fair value of the instrument.

Over-the-counter derivatives may expose the Bank to the risks associated with the absence of an exchange market on which to close out an open position.

The Bank's exposure under derivative contracts is closely monitored as part of the overall management of the Bank's market risk (see also Note 20).

Foreign exchange forward contracts

Foreign exchange forward contracts are contractual agreements to buy or sell a specified amount of foreign currency at a future date at an exchange rate fixed at inception of the contract. Forward contracts are customized contracts transacted in the over-the-counter market. The Bank uses these contracts to manage its exposure to foreign currency risk.

September 30, 2025

4. Derivative financial instruments (continued)

The table below shows the fair values of derivative financial instruments recorded as assets and liabilities, together with their notional amounts. The notional amount, recorded gross, is the amount of a derivative's underlying reference asset, index, or price and is the basis upon which changes in the value of derivatives are measured. The notional amounts of the derivatives are not recorded on the Consolidated Statement of Financial Position. The notional amounts presented below on gross basis indicate the volume of transactions outstanding at the year-end and are not indicative of the market risk or the credit risk.

2025	Notional amount		Fair value		
Derivatives assets		4,792,513		27,111	
Derivatives liabilities		3,970,762		27,090	
2024		Notional amount		Fair value	
Derivatives assets	\$	3,996,775	\$	7,804	
Derivatives liabilities		3,996,775		7,804	

5. Financial investments

Financial investments by major classifications at September 30 were as follows:

		<u> 2025</u>		<u>2024</u>
Financial investments measured at FVOCI Government debt securities	¢	85.560.420	Ф	18,319,160
Corporate debt securities (non-banks)	Φ	79,044,713	φ	106,478,349
Asset-backed securities				105,016
Total financial investments	\$	164,605,133	\$	124,902,525

At September 30, 2025, the amortised cost of financial investments amounted to \$165,715,312 (2024: \$124,427,908).

September 30, 2025

Financial investments (continued)

The carrying value of investments subject to the ECL assessment at September 30, 2025 was \$164,605,133 (2024: \$124,902,525) and solely represent debt securities measured at FVOCI.

Reconciliations from the opening to the closing balance of debt instruments subject to ECL, and the corresponding ECL allowance are as follows:

2	n	7	_
4	u	4	J

	Financial investments

ECL charge		-	-	-	(37,921)	404	(332,799)	(370,316)							
As at September 30, 2024	\$123,189,936	\$1,709,240	\$3,349	\$124,902,525	\$80,237	\$62,283	\$1	\$142,521							

The net movement in financial investments relates to the new financial assets purchased, foreign exchange and other movements.

The loss allowance on debt securities at FVOCI is not recognised in the Consolidated Statement of Financial Position because the carrying amount of such securities is their fair value.

September 30, 2025

5. Financial investments (continued)

Interest income from financial investments

Interest income calculated using the effective interest method, on financial investments measured at FVOCI was \$12,838,014 (2024: \$10,414,714).

6. Loans and advances to customers

Loans and advances to customers at September 30 were as follows:

	<u>2025</u>	<u>2024</u>
Commercial loans Commercial overdrafts	\$ 9,667,023	\$ 18,576,174 790,677
Commercial mortgage loans Consumer mortgage loans	9,335,835 42,651,136	7,000,000 38,845,279

The net movement in loans and advances relates to the new financial assets originated and modifications during the year.

Collateral held by the Bank

The gross carrying amount of loans represents the maximum exposure of credit risk at the end of the reporting period without taking account of any collateral held by the Bank. Collateral held by the Bank include mortgaged properties, pledges taken over cash and financial investments. The fair value of these collaterals are assessed at the time of borrowing, updated on atleast a three year cycle, subject to the availability of appropriate data sets .The Bank has the first charge over the mortgaged properties. Where a loan demonstrates material deterioration in credit risk or increased probability of default, collateral valuation is reassessed.

A substantial portion of the loans and advances are due from residents of Bermuda and are secured by residential or commercial property in Bermuda

The credit impaired assets as of September 30, 2025 was \$4,800 (2024: \$ nil). The aggregate discounted value of collateral held by the Bank for credit impaired assets reported at September 30, 2025 was \$nil (2024: \$ nil).

Assets modified during the year

Several loans had their payment periods and interest rates modified during the year and the total amount due as at September 30, 2025 was \$18,337,735 (2024: \$1,255,281).

Average effective yields

The average effective yields earned were as follows:

<u>2025</u>	<u>2024</u>
5.89%	5.71%
9.86%	7.47%
5.50%	5.50%
5.64%	5.24%
5.00%	5.00%
2.96%	3.95%
	5.89% 9.86% 5.50% 5.64% 5.00%

The average effective yields represent both fixed and variable interest rates.

Outstanding credit card balances are charged interest at 16% per annum.

Amortisation of computer software is calculated using the straight-line method to write down the cost to its residual value over its estimated useful life. Amortisation commences once the software is available for use.

Computer software – WIP represents the Virtual Accounts Solution ("VAS") and Virtual Accounts Application Programming Interface ("API"). The VAS and Virtual Accounts API are sill under development and the total cost of \$409,853 and \$91,563 respectively were capitalized in relation to these projects. Prior to the go live date, all costs incurred towards the projects have been recorded under Work in Progress.

The Bank has developed Virtual Accounts API as secure, standardized programming interfaces to enable clients to make payments, retrieve account data and transactional data. These projects are part of the Bank's strategic priorities to enhance digital capabilities, allowing for improved functionality and accessibility for customers and providing a robust technology platform for expanding service offerings.

12. Equity

All shares are common shares with a par value of \$2.40 each:

	Authorised shares	Par value	Issued & fully paid shares	Par value	Share premium
Balance at September 30, 2024	10,000,000	24,000,000	7,003,318	16,807,963	22,131,188
Shares issued during the year			2,962,964	7,111,114	12,888,893
Balance at September 30, 2025	10,000,000	24,000,000	9,966,282	23,919,077	35,020,081

On July 11, 2025, the Bank issued 740,741 ordinary shares to the shareholder for a capital injection of \$5,000,002 at \$6.75 per share. On September 30, 2025, the shareholder made an additional capital injection of \$15,000,005 for 2,222,223 ordinary shares at \$6.75 per share. After the injections, the Shareholder holds a total of 9,966,282 ordinary shares.

Regulatory capital

The Bermuda Monetary Authority ("BMA") adopts the Basel III Accord which requires detailed disclosures on regulatory capital and risk management. The BMA assesses the risk of each banking institution and determines a Pillar 2 individual capital guidance for each bank. The Bank has complied with all minimum capital requirements prescribed by the BMA and at September 30, 2025, the Bank's Tier 1 and total regulatory capital ratios 40.90% (2024: 30.79%) and 40.90% (2024: 30.79%) respectively and leverage ratio of 9.49% (2024: 12.42%) and exceeded the required minimum.

Capital management

The Bank maintains its capital base and capital ratios above the regulatory minimum capital requirements. The Bank's capital ratio are continuously reviewed in light of changes in economic conditions and the risk characteristics of the Bank's activities. In order to maintain or adjust its capital structure, the Bank may adjust the amount of dividend payments to shareholders, return capital to shareholders or issue new capital securities.

13. Fees and commissions

Fees and commissions are made up as follows:

	<u>2025</u>	<u>2024</u>
Banking services Custody services	\$ 1,146,219 587,777	\$ 1,029,353 625,666
Total	\$ 1,733,996	\$ 1,655,019

14. Gains (losses) from financial investments

Net gain (loss) from financial investments are made up as follows:

	<u>2025</u>	<u>2024</u>
On derecognition of financial investments measured at FVOCI	\$ 717,408	\$ (408,447)

September 30, 2025

	<u>2025</u>	<u>2024</u>
Lease income from operating leases Income from unclaimed dormant balances	\$ 662,292 328,504	\$ 578,955 -
Total	\$ 990,796	\$ 578,955

Lease income from operating leases includes the rent earned on building premises rented out by the Bank.

During the year, the Bank recognized \$0.3 million under other income, representing long-outstanding unclaimed dormant balances that had previously been recorded as other liabilities. No significant costs were incurred in the recovery process.

The following table sets out a maturity analysis of lease receivables, showing the undiscounted lease payments to be received after the reporting date.

	<u>2025</u>	2024
Gross Investments in operating leases, receivable		
Less than one year	\$ 326,627	\$ 322,198

Total	\$ 8,759,740	\$ 10,866,025

September 30, 2025

17. Related party disclosures

Related party transactions including shareholder controllers and the related parties of shareholder controllers

The Bank provides banking services and enters into related party transactions including shareholder controllers and the related parties of shareholder controllers under the same terms as an unrelated party would receive. Outstanding balances and/or related party transactions including shareholder controllers and the related parties of shareholder controllers were as follows:

Consultancy services provided by Base Financial Ltd.

During the year, the Bank incurred \$440,895 (2024: \$773,500) for consultancy services provided by Base Financial Ltd. to the Bank under a temporary employment arrangement and it has been recorded as part of salaries and employee benefits on the Consolidated Statement of Income.

Loans and advances to customers

At September 30, 2025, total loans and advances receivable from related parties amounted to \$1,488,638 (2024: \$8,768,395), which was fully secured by publicly listed securities owned by the borrower, cash deposits, guarantee, share certificates and properties. The undrawn portion of credit facilities granted to these related parties at September 30, 2025 was \$nil (2024: \$nil). The ECL allowance for the loans and advances receivable from related parties is nil (2024: \$2,375).

For the year ended September 30, 2025, the Bank earned net interest income and fees of \$185,362 (2024: \$499,689) for banking and other services provided to such related parties. There are no impairment provisions held against any of the above related parties balances.

Deposit liabilities

At September 30, 2025, deposit balances held by related parties with the Bank amounted to \$662,475 (2024: \$896,377).

Transactions with key management personnel

Total Directors' fees for the year ended September 30, 2025, amounted to \$606,876 (2024: \$403,430). The Bank provides banking services to Board of Directors under the same terms as an unrelated party would receive. At September 30, 2025, Board of Directors and parties associated with Board of Directors had deposit balances with the Bank of \$124,075 (2024: \$145,240). At September 30, 2025, total loans and advances receivable from Board Directors and parties associated with Board of Directors (not disclosed above) amounted to \$488,638 (2024: \$1,314,261), and the undrawn portion of credit facilities committed, amounted to \$nil (2024: \$nil).

Loans and advances to related parties are secured and bear interest rates that fall within the range of rates charged to third-party borrowers.

Deposit interest expense from Board of Directors for the year was \$3,259 while net interest income and fees earned in 2024 was \$449.

Compensation of key management personnel of the Bank

The Bank classifies the Board of Directors of the Bank and executive committee as key management personnel. For the year ended September 30, 2025, the total compensation paid to key management personnel amounted to \$1,953,808 (2024: \$2,284,459), excluding the Directors' fees.

September 30, 2025

17. Related party disclosures (continued)

Principal subsidiary undertakings at September 30, 2025

Name	% ownership	Location
BCB Asset Management Limited	100.00	Bermuda
Bercom Nominees Limited	100.00	Bermuda
VT Strategies Holdings Limited	100.00	Bermuda

BCB as the sole shareholder of these companies provides financial and administrative support to its subsidiaries for at least, but not limited to 12 months from the date these consolidated financial statements are issued.

18. Salaries and employee benefits

The Bank meets the minimum requirements of the Bermuda National Pension Scheme (Occupational Pensions) Act 1998, and related amendments and regulations. Under this legislation, the Bank contributes to its employees' pension requirements using a defined contribution plan at the rates below, following the completion of 720 hours of work for new staff:

- If service exceeded 15 years before May 2022: 5% of gross salary for the first 15 years and 10% thereafter
- All others: 5% of gross salary

As permitted under the legislation, staff members are required to contribute a minimum of 5% annually based on the employees' pensionable earnings. Staff members who completed 15 years of service prior to May 2022 are not required to make contributions.

The scheme is administered by an independent party and all such funds are segregated from the assets and liabilities of the Bank. Pension expense incurred during 2025 amounted to \$498,629 (2024: \$475,541) and is included within salaries and employee benefits in the Consolidated Statement of Income.

On November 8, 2024, the Bank approved the 2024 Management Incentive Plan, which aimed to provide certain individuals with an incentive to contribute to the long-term success of the Bank.

The Plan allows for the issuance of up to 610,000 shares in stock options. The Exercise Price for these options will be at least 100% of the Fair Market Value of a share on the grant date and not less than the par value of a share. The Board will determine the exercise periods and expiration dates, which will not exceed 10 years from the grant date.

During the year, there were no issued stock options as part of this incentive plan.

September 30, 2025

19. Commitments and contingent liabilities

Commitments

At September 30, 2025, the Bank was committed to \$6,518,321 (2024: \$3,967,339) in undrawn credit facilities. This amount relates to the undrawn portion of approved commercial loans, unused portion of approved overdraft facilities and credit card limits.

Capital commitments in relation to the Virtual Account Solution and Virtual Account APIs that was in progress as of September 30, 2025, was \$42,720. The cost incurred to date is disclosed under Computer software - WIP in Note 8. Prior year capital commitments of \$38,950 relates to the Open Banking API project which went live in May 2025.

Contingent liabilities

In the ordinary course of business, the Bank and its subsidiaries can, from time to time, be defendant in, or party to, pending and contingent legal actions or proceedings. The Bank is also subject to periodic regulatory reviews or actions of the Banking Regulator. In relation to these matters, the Bank is required to recognise a provision for a liability when it is probable that an outflow of economic benefits would be required to settle an obligation which has arisen as a result of past events, and for which a reliable estimate can be made of the amount of the obligation. While the outcome of such events is inherently uncertain and cannot be reliably measured, based on the information currently available to management, no provision is necessary in respect of legal proceedings or regulatory actions as at September 30, 2025 (2024: None).

20. Risk management

The Bank is exposed to a wide range of financial and non-financial risks and maintains a comprehensive approach to effectively manage these risks through a defined enterprise risk management framework ("ERMF"). This framework outlines how these risks are categorized and managed to ensure strategic goals are achieved whilst protecting the Bank's customers' funds and providing responsible products and services that support the markets in which it operates.

The Bank's ERMF is designed on core principles of maintaining a sound risk culture, delivering effective governance, ensuring all risks are clearly understood and appropriately prioritized with a forward-looking approach and the provision of robust monitoring and reporting.

Risk culture

The fostering of a sound risk culture is a key responsibility of the Bank's Executive Management. This is achieved by establishing and exercising accountability, promoting risk awareness and encouraging a proactive approach to the identification and mitigation of risks. These responsibilities are laid out in the governance framework and policies and supported by the Bank's Code of Conduct.

A wide range of training is provided on key risk topics to ensure appropriate technical risk skills are developed and maintained at all levels of the organisation whilst also raising awareness of critical risk issues. The Bank also ensures a safe environment for any staff member to confidentially escalate any concerns through provision of a whistleblowing framework. The Bank's risk culture is reinforced through its employee performance management framework and approach to remuneration which incorporates behavioural values.

Governance

Robust and effective risk governance ensures clear accountability for the management of risk is embedded at every level within the Bank. The Board of Directors ("the Board") is ultimately responsible for oversight of the enterprise-wide risk management of the Bank and its alignment with the organisation's objectives and strategies. The Board's responsibilities include understanding the Bank's risk exposures, defining its risk appetite, and establishing risk measurement parameters that reflect its risk appetite.

September 30, 2025

20. Risk management (continued)

Governance (continued)

The Board utilizes an underlying committee structure that oversees Executive Management's implementation of an effective risk management function.

The Bank's corporate governance practices are consistent with the BMA's Corporate Governance Policy (December 2012) that sets out the 13 principles and related guidance applicable to deposit taking institutions licensed under the Banks and Deposits Companies Act 1999 of Bermuda.

The Board Audit and Risk Committee ("BARC") acts as the primary committee under the Board for oversight of risk. It maintains broad responsibility over matters relating to the Bank's risk exposure, including definition, measurement, assessment, policy setting, and risk mitigation strategies. It establishes the 'tone from the top', and sets the expectations and requirements for risk management by Executive Management and the underlying management committees. The Governance Committee's ("GC") remit is to oversee all Human Resources matters, policies and procedures and any other matters concerning Employees and management excluding remuneration and compensation decisions which are primarily the responsibility of the Compensation Committee. Below these Board level committees are a series of management level committees that further divide responsibility and oversight within the ERMF including the Executive Committee ("EXCO"), the Asset and Liability Management Committee ("ALCO") and the Management Risk Committee ("MRC"). Through this governance structure, the Bank's Executive Management are responsible for the practical execution of the ERMF and ongoing oversight as required by the Board.

BCB has adopted the three lines model which addresses how specific duties related to risk and control are segregated and coordinated. All employees are responsible for identifying and managing risk within the scope of their role as part of this framework. The first line are the risk owners that operate within the business units of the bank. This includes client-facing staff as well as non-client facing support functions (e.g. Operations, Technology and Finance). Employees in the first line are accountable for the risk-taking activities and the results, ramifications and opportunities of those activities; establishing appropriate operating procedures and internal control systems; performing regular assessments or testing of controls; monitoring risk exposures against established appetite; and reporting exceptions and incidents in a timely manner. The second line provides risk oversight through the Risk and Compliance functions that provide guidance to, and oversight of, the first line through the setting of risk policies, limits and processes that ensure adherence to required standards and parameters.

Critically this requires identification, measurement, monitoring and reporting of the Group's aggregated risk exposures through the risk governance framework. In addition to the above, there are other key operational functions that may have a mixture of first and second line of defence duties. These are Legal, Human Resources, segments of Finance and Information Technology. The third line is the Internal Audit (IA) function which provides independent and objective assurance over the adequacy of design and operational effectiveness of the first and second line functions.

Significant risk categories

Risk is inherent in all of the Bank's business activities whether these are actively taken to maximise shareholder value (financial risks) or those that arise as a consequence of its activities (non-financial risks). The primary financial risks that the Bank faces are credit risk, treasury risk, and market risk, and the primary non-financial risks are operational risk, compliance risk and strategic & reputational risk.

September 30, 2025

Risk management (continued)

Credit risk

Credit risk is the risk that the Bank will incur a loss because its customers or counterparties fail to discharge their contractual obligations. The Bank manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for geographical and industry concentrations, and by monitoring exposures in relation to such limits.

Credit risk for financial assets measured at AC and debt instruments measured at FVOCI are also reviewed in accordance with the ECL measurement principles discussed under significant accounting policies in Note 2. These reviews include but are not limited to staging of financial assets. Staging of financial assets is based on the significance of the increase in credit risk compared to the credit risk at the time of initial recognition. Provision matrices for less complex assets are based on the actual performance of the underlying group of assets in the past.

The Bank regularly reviews the methodologies and assumptions applied in its ECL calculations to ensure they reflect prevailing and expected market conditions. ECL allowances are based on the economic information available at September 30, 2025. Please refer to Notes 5, 6 and 9 for more details on the ECL allowances recorded during the year on financial assets measured at AC and FVOCI.

All counterparty banks and money market funds must be approved by the Bank's ALCO. The maximum amount that may be lent to any single bank via the deposit market is governed by a number of controlling variables including the external credit ratings for that bank. Counterparty lending limits are reviewed semi-annually and are adjusted if the capital ratio of a counterparty bank changes, or if the credit rating of a counterparty bank goes below the rating levels identified above.

Treasury risk

Treasury risk is broken down into (a) liquidity and funding risk which is defined as the risk that the Bank will be unable to meet its contractual or contingent obligations or that it does not have the appropriate amount, tenor and composition of funding and liquidity to support its assets, and; (b) capital risk which is defined as the risk of insufficient capital to support its normal business activities and to meet its regulatory capital requirements.

To limit this risk, management has adopted policies that prioritize liquidity among the parameters for asset selection. Additionally, management monitors the term structure of the Bank's current funding, its future cash flows, and the market liquidity of its balance sheet assets on a daily basis. Management adheres to conservative parameters using a defined capital risk management framework to ensure regulatory capital adequacy is maintained at all times.

The Bank maintains significant balances of short maturity interbank deposits, along with a diversified portfolio of mainly highly liquid and marketable assets that can be liquidated in the event of an unforeseen cash outflow. The Bank's liquidity position is assessed daily and is strategically managed over the long run to be capable of handling a variety of stress scenarios, including those related to systemic market conditions and those related specifically to the Bank.

September 30, 2025

20. Risk management (continued)

Treasury risk (continued)

Maturity profile

The tables below summarize the maturity profile of the Bank's assets and liabilities as at September 30, 2025 and 2024. Repayments which are subject to notice are treated as if notice were to be given immediately. However, the Bank expects that many customers will not request repayment on the earliest date the Bank could be required to pay, and the table does not reflect the expected cash flows indicated by the Bank's deposit retention history.

Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates, foreign exchange rates, and equity prices. The market risk for the Bank's financial instruments is managed and monitored using sensitivity analyses. This analysis is performed using market information and in practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments.

Interest rate movements cause changes in interest income and interest expense, and although these changes move in the same direction, their relative magnitude will favorably or unfavorably impact net interest income and the economic value of equity. The extent of that impact depends on several factors, including matching of asset and liability maturities and the interest rate term structure. Assets and liabilities are managed to optimize the impact of interest rate movements in view of anticipated rate changes.

The following table demonstrates the Bank's sensitivity to a change in interest rates, with all other variables held constant. The sensitivity of the economic value of the Bank's shareholders equity is the effect of the assumed changes in interest rates on net interest income and market value of the financial assets.

September 30, 2025

20.	Risk management (continued)	ent (continued)					
	,		2025		<u>2024</u>		
	200-basis-point increase in interest rates						
	Impact on Economic Value of Equity	\$	(693,447)	\$	(2,343,684)		
	200-basis-point decrease in interest rates						
	Impact on Economic Value of Equity	\$	599,009	\$	2,343,684		

Foreign Currency Risk

Foreign currency risk is the risk that the value of assets and liabilities will fluctuate due to changes in foreign exchange rates. The Board of Directors has set limits on positions by currency. In accordance with the Bank's policy, positions are monitored on a daily basis and hedging strategies are used to ensure positions are maintained within established limits. A 10 per cent increase in the FX rates to which the Bank had significant exposure at September 30, 2025 would have decreased net income and equity by \$20,164 (2024: \$9,937). An equivalent decrease in these same FX rates would have resulted in an equivalent but opposite impact.

Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. The Bank is exposed to operational risk as a direct or indirect consequence of its normal business activities, as arising in the day-to-day execution of business processes, the functioning of its technologies and in the various activities performed by its staff, contractors and vendors. Operational risk is relevant to every aspect of the Bank and covers a wide range of areas including, amongst others, financial crime compliance, regulatory compliance, fraud, cyber security, technology and conduct risks. As the Bank transforms its business activities to meet strategic objectives, this can increase operational risks. The Bank manages operational risk via a comprehensive and standalone Operational Risk Management Framework ("ORMF") which outlines the required policies, processes and responsibilities. A key aspect of the ORMF is the Risk and Control Self-Assessment ("RCSA") process which identifies and evaluates the operational risks across all of the Bank's businesses and determines if these are effectively controlled within acceptable parameters. Where deficiencies are detected, formal action is taken to address these. The results of the RCSA drive the first and second line of defence control monitoring and testing regime, which is monitored through the MRC. The Bank also operates a defined process to govern how operational risk incidents are managed to ensure sustainable control improvements are delivered, and how operational losses are calculated, categorized and reported.

21. Financial instruments

The Bank uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: inputs that are quoted market prices (unadjusted) in active markets for identical instruments;

Level 2: inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data;

Level 3: inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation.

September 30, 2025

21. Financial instruments (continued)

Valuation techniques include net present value and discounted cash flow models and other valuation models. Changes in unobservable inputs may result in a significantly higher or lower fair value measurement.

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

The Bank uses widely recognised valuation models for determining the fair value of common and more simple financial instruments, such as currency swaps that use only observable market data and require little management judgment and estimation. Observable prices or model inputs are usually available in the market for listed debt and equity securities, exchange-traded derivatives and simple over-the-counter derivatives. The availability of observable market prices and model inputs reduces the need for management judgment and estimation and also reduces the uncertainty associated with determining fair values. The availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets.

Derivative financial instruments

The fair value of the Bank's derivative financial instruments, which are estimated using a valuation technique with market observable inputs include foreign exchange forward contracts. The most frequently applied valuation technique for forward contracts includes the forward pricing model which incorporates various inputs including the forward rates.

Financial instruments recorded at fair value

Financial investments

Certain financial investments, where applicable, are valued using valuation techniques and include unquoted equity and debt securities. These assets are valued using models that use both observable and unobservable data. The unobservable inputs to the models include the review of the historical financial and operating results of the investee and its underlying investments, assumptions regarding the expected future financial performance and the risk profile of the investee and its underlying investments, and economic assumptions regarding the industry and geographical jurisdiction in which the investee and its underlying investments operate.

The following table shows an analysis of financial instruments recorded at fair value by level of the fair value hierarchy:

September 30, 2025

22. Subsequent events

There have been no significant events or transactions from September 30, 2025 to the date that these financial statements were available for issuance that require adjustments to or disclosures in the financial statements.

However, the following material non-adjusting events are noted:

Increase in Authorised Share Capital

On October 8, 2025, the Bermuda Registrar of Companies approved the filing for an increase in the Bank's authorised share capital from \$24,000,000 to \$30,000,000. This increase was achieved through the creation of 2,500,000 ordinary shares with a nominal value of \$2.40 each, to accommodate the Subscription and anticipated future share issuances.

The above events constitute material non-adjusting events, reflecting developments that do not require financial adjustments but are relevant for disclosure in the financial statements.

There were no other subsequent events requiring disclosure or recognition in the audited financial statements.

Subsidiaries As at September 30, 2025

BCB ASSET MANAGEMENT LIMITED

Incorporated in Bermuda on February 11, 2011.

BERCOM NOMINEES LIMITED

Incorporated in Bermuda on July 8, 1987.

VT STRATEGIES HOLDINGS LIMITED

Incorporated in Bermuda on December 15, 2010.

Bermuda Commercial Bank Limited and a subsidiary offer a variety of regulated services in Bermuda. Bermuda Commercial Bank Limited is authorised and regulated by the Bermuda Monetary Authority and licensed to carry out banking business under the Banks and Deposit Companies Act 1999 and to carry out investment business under the Investment Business Act 2003. Bermuda Commercial Bank Limited is a Trading Member of the Bermuda Stock Exchange ("BSX"). BSX is an exchange that acts as a central clearing counterparty for Bermudian securities. Bermuda Commercial Bank Limited provides limited execution-only investment services through the BSX.

Bercom Nominees Limited is authorised and regulated by the Bermuda Monetary Authority and is licensed to carry out business as a Limited corporate services provider pursuant to the Corporate Service Provider Business Act 2012.
