- Input Protected by 16Amp Merlin Gerin MCB
- Aux. MCB Contacts Present MCB Status to a 9 way D-type on the Rear
- Input Via Neutrik PowerCon
- 10 Individually Fused IEC Outlets
- Red LED Fuse Failure Indication
- Power Present Indicator
- 16 Amp Max Total Load
- 6 Amp Max Load Per Output

**OVERVIEW** - A 10 output mains distribution unit with MCB's, of 230VAC 50Hz.

**FEATURES** - This unit is housed in a sturdy 19" 1RU rack mounted enclosure, 195mm behind panel depth (300mm including lacing bar). The front panel comes in a standard semi-gloss black finish, with wide clip-on designation strip for clear marking. The D-type on the rear is wires to a changeover switch in the Aux. contact module to give a fail safe view of the MOB status. The fuse indication LED's are configured to light-on fuse failure while the large green LED indicates power is present.

**FINISH** - The front panel comes in a standard semi-gloss black finish (RAL9005).
