

EXPERIENCE GREEN ISLAND

A Corporate Conservation *Adventure*

Make your next CSR initiative count – for your team and the turtles!

Join **Great Adventures** for a one-of-a-kind **Corporate Social Responsibility (CSR)** program on beautiful Green Island, a living laboratory in the heart of the Great Barrier Reef.

Your team will dive into purpose-driven activities alongside our marine biologists, contributing directly to a cutting-edge **Green Turtle Identification Study** that's helping shape the future of conservation.

Why Green Island?

A vital marine habitat and home to the iconic green turtle (*Chelonia mydas*), Green Island is part of a groundbreaking, long-term **photo-ID research project** to track and understand turtle site fidelity and residency patterns.

What Your Team Will Do

- Participate in **non-invasive turtle monitoring** using high-resolution video and images.
- Learn how to identify turtles by their unique facial scale patterns.
- Contribute valuable data to an active scientific study.
- Be guided by our expert **Reef Biosearch marine biologists** and **Master Reef Guides**.

Real Impact, Real Results

Our aim is to establish an understanding of Green Island's importance as a key turtle site. By identifying individual animals, we can begin to estimate population size and their seasonal use of the habitats within the Green Island lagoon area.

Empower your team to be more than observers – become part of the solution.

Create a lasting ecological legacy while strengthening team bonds in one of the world's most stunning natural settings.
