

Liquizime®

Item No. 34547

Multi-Tiered Enzymatic, Alkaline Detergent

Specifically designed for use in all washer-disinfectors, tunnel washers, cart washers and for manual cleaning.

Liquizime® is a premium detergent that utilizes the power of enzymes in an alkaline solution. With its Multi-tiered formulation of enzymes, Liquizime® removes all blood, fat, carbohydrates, starches and protein, while its powerful alkaline solution eliminates scale and mineral deposits left from hard water. Liquizime®'s unique sequestering and emulsifying ability assures complete cleanliness and free rinsing of surgical instruments and scopes as well as all carts, trays and inside washer walls.

Features

- One-step cleaning and scale prevention
- Proprietary synergistic mixture of enzymes and alkaline
- Protease, Lipase, Amylase, Carbohydrase and proprietary enzymes
- Excellent for hard water problems, eliminating mineral deposits from stainless steel instruments, optics, common plastics as well as materials used in anesthetic utensils
- Liquizime®'s mild alkaline with approximate pH 9, yet does not require a neutralizer.
- Extremely fast wetting and odorless, while maintaining high detergency and cleaning performance in hard, soft, cold and hot water.
- Free Rinsing, Liquizime® leaves no residue or pyrogens
- Non-Foaming – Non-Sudsing
- Bio-degradable
- Will not harm any metals, plastics, rubber or corrugated tubing

Directions for Use

Liquizime® can be diluted as low as 1/4 oz. (2ml/liter) per (1) gallon of water up to two (2) oz. per one (1) gallon of water, but for optimal results, the following is recommended.

Manual Cleaning

1. For lightly soiled scopes and instruments dilute Liquizime® at a 1/2 ounce per one (1) gallon (4ml/liter) of water.
For heavily soiled scopes and instruments dilute Liquizime® at one (1) ounce per one (1) gallon (8ml/liter) of water.
2. Submerge instruments and scopes to be cleaned.
For scopes: suction or flush through channels before soaking.
3. Soak for two (2) minutes to remove all organic soils.
4. Rinse thoroughly with tap, distilled or sterile water.

Discard used solution. Works in all water temperatures.

Cautions: Avoid prolonged contact with skin. Do not swallow. Keep away from children.

CE-marks: Liquizime® conforms to the requirements of the legislation for medical devices and the European directive 93/42/EC.

Hazard warnings and safely advice: Liquizime® needs not to be classified according to the Dangerous Preparation Guideline 99/45/EC.

Automatic Cleaning Devices:

1. Pour directly into detergent reservoir full strength or
2. Calibrate value at 1/2 ounce to 1 ounce per one (1) gallon (4ml/liter to 8ml/liter) of water.
