Cherry

Add Cherry to Your Website

Use this guide to add a branded Cherry page to your existing website.

1 Set your branding

In your Partner Portal, navigate to Marketing > **Web Resources**. In the **Your Cherry Webpage** section, set your brand color and choose your preferred font. Preview your page to make sure everything looks right, then **save your settings.**

2 Copy your script

Below brand settings, you'll see your web script. Click the **Copy Script** button to copy your script for the next step.

3 Add a new page & paste your script

Log into your website provider and create a new page. Title the new page **"Payment Plans"** and add it to your main navigation menu. On this new page, add an **HTML web element** and paste in the web script you copied from the Cherry partner portal. Click Save or Update and publish your website. Your Cherry page is now live! Don't worry about maintaining the page, Cherry will handle it from here.
