Release Manager

Zürich, Switzerland

Embotech is the European leader for autonomous driving solutions for logistics applications such as trucks at port terminals and finished vehicle logistics in car factories. We are delivering safe autonomous transportation by leveraging the real-time optimization technology that we have been developing since 2012.

We are looking for a Release Manager, taking ownership of system-level software releases for our autonomous driving in factory platform, In this role you will be acting act as a technical project coordinator, aligning engineering efforts around internal roadmap goals and customer-driven change requests. You'll work cross-functionally with engineering, safety, and product teams to ensure each release integrates the right functionality at the right time, with full traceability and alignment across teams.

We offer an exciting job in a company in a key growth phase with attractive conditions and flexible hours. Embotech develops innovative products in a modern and dynamic environment, and you can expect an international atmosphere, with highly skilled colleagues with a passion for safety, excellence and efficiency. We are looking for highly motivated people to help us solve the most complex challenges of today and take our company to the next level.

Responsibilities:

- Lead planning and execution of system-level software releases for autonomous driving in factory solutions, ensuring deployment across multiple sites and addressing diverse use cases with varying feature sets.
- Deliver system releases following the complete release lifecycle (manage and contribute): change request owner, versioning, integration coordination, validation tracking, documentation, deployment
- Track, assess, and prioritize requests from internal stakeholders and customers.
- Act as a technical project manager, aligning timelines, resources, and scope across the different teams : System, Perception, Motion Planning & Control, Web & Product Applications, Safety, Security and Rollout Teams.
- Coordinate the definition, implementation, and delivery of new features and improvements across engineering teams.
- Maintain a transparent and structured release calendar; clearly communicate progress, risks, and decisions to stakeholders.
- Facilitate Go/No-Go meetings, release readiness reviews, and retrospectives.
- Support continuous improvement of CI/CD pipelines and release workflows to ensure automation, auditability, and rollback capabilities.
- Ensure traceability and documentation of all changes, configurations, validation results, and approvals.

Requirements:

- **Master's degree** in Computer Science, Software Engineering, Systems Engineering, or a related technical field.
- 3+ years of experience in system release, technical project coordination, or software delivery within complex engineering environments.
- Solid understanding of Agile development and system integration workflows.
- JIRA, GitHub, GitHub actions, Codebeamer knowledge
- Excellent and proven organizational, communication, and stakeholder coordination skills.
- Fluent in English

Our preferred starting time for this position is **ASAP**

We look forward to receiving your application documents (CV, cover letter & reference letters) by email: careers@embotech.com
