

# SPEEDY LABELLER

Q

PACK

The ENOS Speedy is a labelling machine equipped with step motors, with electronic variable speed drive. It is suitable for the application with adhesive system of label and back label on round bottles of different formats. The Speedy is a linear labeller with up to 4 stations and can run up to 3000 bottles per hour.

The Speedy is capable of having the following attachments:

- Devise for the application of label and back label on square bottles of different formats
- Wrap-around neck collars or medals on the bottle shoulder
- Automatic system for positioning the centring mark on bottles with customised labels, capsule or existing labels.

The Speedy can be equipped with a control board with PLC operated through a touch-screen display for the memorisation of up to 50 formats of packaging. The labelling heads can be equipped with electrical servo positioners controlled through PLC.
