

Helmet Sticker NFC Tag

A how-to guide for tagging Helmets with NFC.

Where to apply

Apply the sticker to the inside of your helmet, and scan it from the outside. Next to the serial number is a good spot! The adhesive is manufacturer approved for use on plastic helmets.

How to apply

- Make sure the surface you will stick the tag to is clean and dry
- Peel the helmet sticker from the backing paper and stick it to the inside of your helmet—next to the serial number is a good place
- Scan the tag from outside the helmet

✓ Next to serial number

✓ Inside

✗ Exposed to scratches and knocks

- Do**
- Apply the helmet on the inside to protect it from abrasion and environmental wear
 - Scan the tag from outside the helmet

- Don't**
- Use on metal equipment
 - Don't place the tag where it may be scratched, rubbed, or exposed to harsh conditions
 - Worry about the adhesive - it's manufacturer approved for use on plastic helmets

This tag works well on equipment like:

Petzl Vertex range, Strato range; Kask HP range; Zero Pinnacle range; PMI Brigade rescue; Pfanner Protos range; Husqvarna Spire; Studson SHK-1 range; Team Wendy helmets; Skylotec Inceptor range
