

CAPABILITY STATEMENT

Engineered Door Systems

Built for Real-World Performance

Specialist solutions for residential, commercial, and industrial projects

Built to Perform. Designed to Last

Glideaway delivers engineered door systems designed around how buildings actually operate, not just how they look.

From high-traffic industrial environments to architecturally designed homes, each system is carefully configured to ensure reliable performance, durability, and long-term value.

Who We Are

Established in the 1980s, Glideaway Door Systems is a proudly New Zealand-owned, third-generation family business with a strong reputation for quality and reliability.

We manufacture, supply, and install door systems across residential, commercial, and industrial sectors, delivering solutions tailored to site requirements and project demands.

With over 40 years of combined in-house manufacturing, technical expertise, and hands-on installation experience, Glideaway provides end-to-end delivery with quality control, making us a trusted partner for homeowners, builders, architects, and developers across New Zealand.

Glideaway Door Systems

A comprehensive range of custom built door systems designed to meet operational, structural, and compliance requirements across residential, commercial, and specialist applications. Each system is selected and configured to suit site conditions, building design, and intended use.

Residential Garage Doors

Designed to complement architectural intent while delivering reliable daily performance.

Sectional Garage Doors

Architectural finishes with smooth, dependable operation.

Sliding Garage Doors

Ideal for low headroom or restricted spaces.

Tilt Garage Doors

Simple, durable systems suited to a wide range of applications.

Roller Garage Doors

Compact, low-maintenance solutions for everyday use.

Bi-Folding Overhead Doors

Maximise opening width and access flexibility.

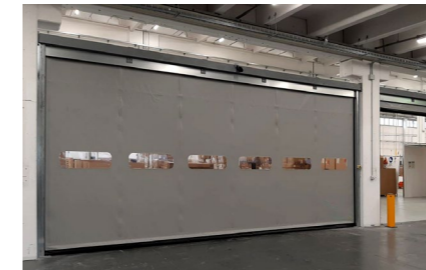

Best suited for:

- Architectural homes
- Renovations
- Multi-unit developments

Glideaway Door Systems

Commercial & Industrial Doors

Heavy-duty systems engineered for high-use environments and operational efficiency.

High Performance/Rapid Doors

Fast operation for high-traffic and temperature-controlled environments.

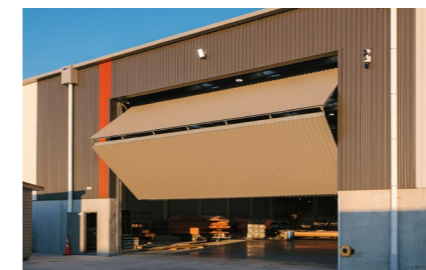

Sectional Overhead Doors

Reliable systems designed for consistent, daily industrial use.

Roller Shutter Doors

Secure and durable solutions for effective access control.

Bi-Folding Industrial Doors

Optimised for wide openings, providing flexible access and efficient operation.

Large Span & Hangar Doors

Engineered for oversized openings and demanding applications.

Sliding, Folding & Stacking Systems

Space-efficient solutions for large openings and flexible layouts.

Loading Dock Equipment

Supports safe, efficient loading and unloading operations in logistics environments.

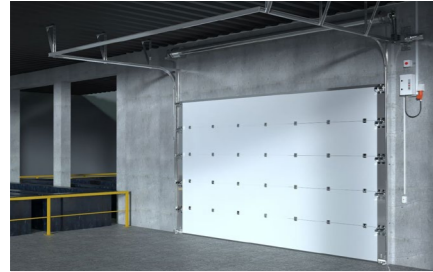

Best suited for:

- Warehouses
- Logistics Facilities
- Workshops
- Manufacturing Sites
- Distribution Centres

Glideaway Door Systems

Specialist Door Systems

Purpose-built systems designed for compliance, controlled environments, and specialised operational requirements.

Fire Rated & Smoke Control Doors

Supports fire safety compliance and helps contain smoke and heat.

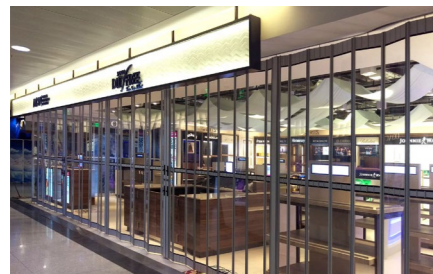

Acoustic Door Systems

Controls sound transfer in sensitive and noise-critical environments.

Hygiene & Cleanroom Doors

Designed for controlled, sterile, and hygiene-critical spaces.

Retail & Server Door Systems

Functional access solutions with a clean, professional presentation.

Custom Engineered Solutions

Designed for non-standard applications and specialised project requirements.

Best suited for:

- Healthcare Facilities
- Laboratories
- Food Processing
- Retail Spaces
- Commercial Interiors

"From start to finish, the service was impeccable. The quality of work exceeded my expectations, and the new garage door operates smoothly. I highly recommend this garage door company for their top-notch service and exceptional workmanship."

Hannah Wilson, Residential Customer

"Glideaway has proved to be a professional outfit to deal with. Their door system was high quality, but ultimately every door is different and this is where the experience of the installer comes to play. Quality all round."

D. Foreman, Residential Customer

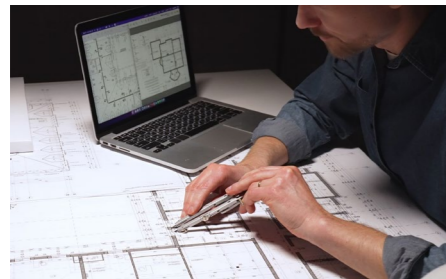

Glideaway Process

Our process is designed to reduce risk, maintain programme timelines, and ensure reliable long-term performance.

1. Consultation

Understanding site conditions, compliance needs, and operational requirements

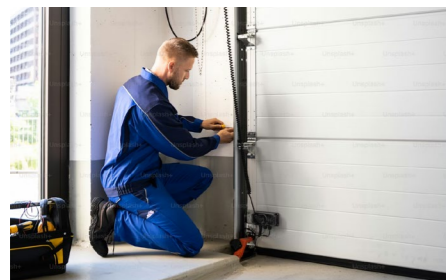

2. Design

Engineered systems including product selection, configuration, and integration with architectural and structural requirements

3. Supply & Manufacture

In-house production supported by trusted suppliers, ensuring quality, customisation, and reliable lead times

4. Installation

Delivered by experienced teams and approved networks, ensuring accurate fit, safe operation, and site coordination

5. Support

Ongoing servicing, maintenance, repairs, and parts supply, including preventative maintenance to reduce downtime

Why Choose Glideaway

40+ Years Experience

Proven delivery across residential and commercial

NZ Owned & Operated

Third-generation, family-owned NZ business

Engineered for Site Conditions

Designed for real-world use and environments

Complex Project Capability

Large-span and IL4-compliant system delivery

Manawatū Manufacturing Facility

In-house production for quality and control

Nationwide Delivery & Support

Install and service network across New Zealand

Tesla Cars Showroom

Karangahape Road, Auckland

Challenge

High-visibility, compact-stacking showroom doors were required within a historic building. Structural constraints and a floor gradient created complex fixing conditions and alignment challenges across multiple openings.

Solution

Glideaway engineered and installed six Butzbach HT40 Spacelite stacking doors with full glazing. Custom taper plates were used to accommodate the uneven floor and ensure accurate alignment.

Outcome

- Consistent alignment across full façade
- Clear ceiling space maintained for services
- Increased natural light and vehicle visibility

Basement Garage Door Replacement

Auckland, NZ

Challenge

Replace the customers existing old tilt door which was becoming more unusable and limited the height of vehicles parking in the garage space. Client also wanted to go for a natural timber finish to help complement the home as this was street facing.

Solution

Glideaway provided the Side Sliding garage door system which ticked the clients boxes with gaining more height for vehicles; user friendly and also aesthetically pleasing natural timber finish.

Outcome

- Gained more head space for vehicle entrance
- User friendly solution
- Automated
- Aesthetically pleasing timber finish

Get in Touch

If your project requires a door system that performs reliably and integrates with your build, talk to Glideaway early in the process.
