

# Flock DFR

## The Future of Fire Incident Response

Flock DFR is a fully automated and remotely operated Drone as First Responder system, providing a smarter and faster way to respond. Improve response efficiency and get critical aerial intelligence on-scene faster than ever—before your trucks even roll.

response times

### Optimized Resource Deployment

- 20% of calls cleared remotely without rolling trucks
- Assess incidents rapidly, accurately dispatch needed resources

### Unmatched Operational Capabilities

- 24/7 automated operation with no roof presence required, with one operator able to remotely pilot multiple drones.
- Real-time, high-resolution aerial imagery and thermal vision

### Proven Public Safety Impact

- 89% improvement in locating people and critical incident areas quickly
- Enhances firefighter and community safety

## The Complete DFR Solution for Fire Departments

### Advanced Hardware

#### Industry-leading docks

Docks with rapid drone recharge and battery swap options that can withstand harsh environments.

#### Advanced drones

Drones that fly faster, longer, and farther with high-res thermal imaging, color night vision, laser range finding and powerful zoom.

#### 3D radar technology

3D radar to ensure safe and compliant flight operations up to 400 feet altitude and Beyond Visual Line of Sight (BVLOS).

### Purpose-Built Software

#### Flight Ops

Remote piloting, automated deployment and flight, CAD integration, and augmented reality overlays

#### Spectator Mode

Share live feed to stakeholders on any device

#### Air Traffic Awareness

Eliminate visual observers and fly safely up to 400 ft with radar

#### Automated Flight Logs

Automated reports, logs, and dashboard

#### Flock911

Provides caller location & live transcripts of active 911 calls enabling the industry's most rapid response capability

### End-to-End Support

Leverage our expertise with decades of combined experience in public safety, drone programs, and FAA regulatory work. We'll work closely with you to build a custom and comprehensive DFR program.
