Clambrace. We support. We protect. **We hold on.**

We are Clambrace. Clambrace is the world market leader in the field of clamped pipe guide systems. We embrace clamping. But mainly, we embrace every customer's request to fight corrosion with the broadest portfolio of top-notch, modular products. That's what we do, smart and simple. We hold on. Do you?

Don't drill. Don't weld. Embrace. Clambrace.

We are Clambrace. We love pipes and hate corrosion. We operate based on simple principles. We keep it smart and simple because our total focus is on our core business: pipe support. We support, we guide, we protect, and we embrace pipeline systems. Corrosion is our nemesis, and flexibility is our higher purpose. That is why we embrace the principle of clamping. Clamped pipe guide systems are, in our modest opinion, the very best answer to corrosion.

Corrosion is the nemesis of pipeline systems. And, therefore, our nemesis. Corrosion can never be prevented, but it can be controlled according to smart and simple principles. The bottom line is that clamping prevents corrosion better than welding. Better than drilling. Better than any other form of pipe support that's currently available on the market. Clambrace is one hundred percent specialized in clamped pipe guide systems. Don't drill. Don't weld. Embrace.

History

Originally, Clambrace was 'Made in Germany'. In 1982, a young, German engineer already had a clear vision that grinding, welding, and cutting in a petrochemical environment is not safe, and therefore not wise. Resulting in a lot of downtime and loss of production capacity. These smart insights were shared by Hanwel Belgium, which brought the products of RHS (Rohr Haltung Systeme GmbH) to Belgium and The Netherlands. The principle of clamping, and thus Clambrace as a brand got a boost after Hanwel was acquired by the ambitious and financially strong Indutrade Group.

1997

Hanwel Belgium starts representing RHS in Benelux

2005

Indutrade Group acquires Hanwel Belgium

2022

Clambrace launched as a separate brand and company

1982

Clamping pipe support 'invented' by RHS

2018

Hanwel Belgium acquires all copyrights of RHS

Fight corrosion. Prevent downtime. Stay agile. Save money.

Clambrace was born out of frustration, right in the centre of the Amsterdam-Rotterdam-Antwerp region. The beating heart of the European chemical industry with many pipeline systems forming the aorta of industry and trading. The frustration was caused by corrosion affecting that aorta and weakening the heart. Corrosion causes downtime, as well as financial and operational losses. Clambrace prevents corrosion and downtime. Clambrace saves you time and money. Embrace those principles.

Clambrace is more flexible than any other pipe support product. Many times more agile than old-fashioned welding and drilling. Because what you embrace, can also be released. A clamp is quickly tightened but also loosened with a simple wrench. Anyone with a strong pair of hands can work with Clambrace. You don't have to weld. You don't need qualified welders and special permits. You don't create sparks or heat. You are more flexible and never wasting time. Embrace those gains, be flexible stop corrosion.

Markets. Applications. Processes. Solutions.

STEAM PIPELINES

CRYOGENIC SYSTEMS

COOLING WATER SYSTEMS

BOILERS

Food & beverage

Processes within the food industry require high standards of safety, cleanliness and quality.

(Petro) Chemical

Processes involving chemicals require the right solutions to secure safety and quality.

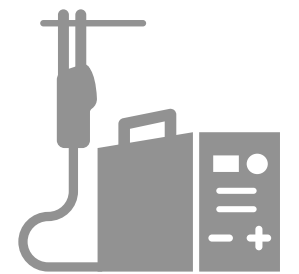

Energy

By using high-quality components with a long shelf life, a sustainable power supply is guaranteed.

Embrace clamping. Believe in quality. Be sure. Be safe.

We embrace the principle of clamping and believe one hundred percent in our product's quality. We are here to prevent corrosion and keep industries running. With the best materials, the best people, and the best service. We blindly trust the quality of our products and so should you. Embrace quality.

Embrace Clambrace. See the advantages. Join the best. Follow the leaders.

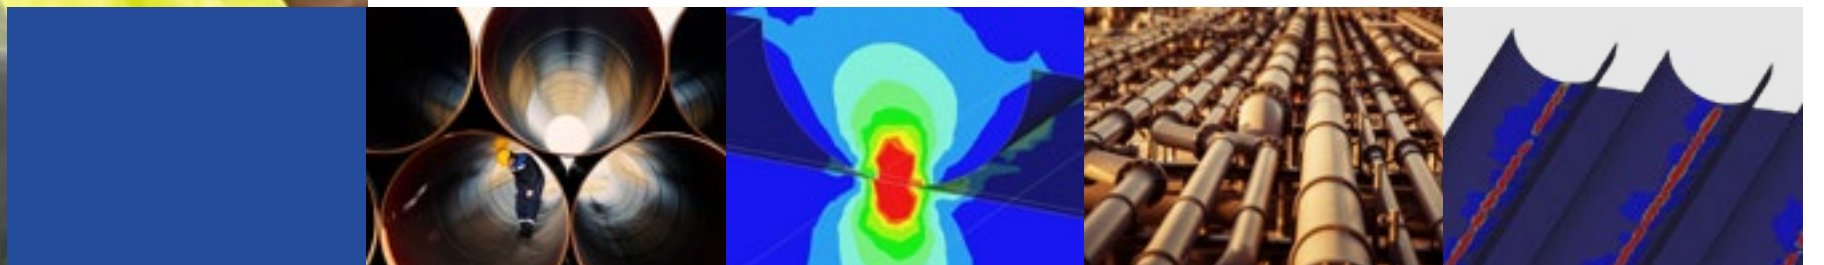

The key players in the northern European chemical and installation industries cannot be wrong, can they? All major players in Belgium, the Netherlands, Germany, and France embraced Clambrace. They acknowledge the major advantages of clamping over welding. They all understand that downtime is unnecessary. Thus, they benefit from the simple, yet firm principles of Clambrace. These market leaders cannot be wrong, can they?

Tested. Proven technology. The standard. The best.

Clambrace has a name to live up to. As the world market leader in the field of clamped pipe guide systems. We are proud of our name. We are proud of our products. We are proud of the extremely high quality of our products. Of course, our team of professionals guarantees that every Clambrace product that leaves our facilities meets the highest industry requirements. In addition, our products are also tested by Europe's most renowned testing institutes. We embrace only the best tested by the best. Do you?

Strong base. Here to stay. More to come. We hold on.

Clambrace is a proud member of the Indutrade family. Indutrade is an international technology and industrial business group consisting of more than 200 companies with 8,100 employees in over 30 countries, on six continents. Indutrade's business philosophy is based on entrepreneurship and decentralized leadership. This is key to their success, and this has been the case since their start in 1978. Indutrade embraced and relaunched Clambrace in 2022. We are here to stay, we hold on.
