

A brief profile

ENERDYNE

© 2025 **ENERDYNE**

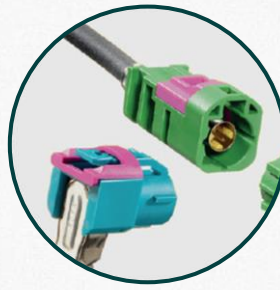

We supply automotive electro-components.

**We blend global partnerships with local expertise, to
help you build resilient supply chains with
components that are high quality, yet cost effective.**

Our product lines

**Data & FAKRA
connector assemblies**

**Automotive Fuses:
LV & HV**

**Connector
Systems**

**VA/VE +
Strategic Sourcing**

Data & FAKRA connector assemblies

ROKA GmbH Germany

- ◆ We produce FAKRA & data connector assemblies, under our subsidiary, Enerdyne Technologies.
- ◆ Done in partnership with Robert Karst GmbH & Co. (ROKA), a leading German specialist of electrotechnical components and RF connectors with 115 years of history.
- ◆ Manufacturing location at Chakan, Pune.
- ◆ Start of production: Q IV 2025.

Automotive Fuses : LV + HV

Pacific Engineering Corp (PEC)

- ◆ We sell fuses from PACIFIC Engineering Corporation (PEC) Japan – for both Low Voltage and High Voltage (EV) applications.
- ◆ PEC is one of the world's leading manufacturers of automotive fuses, serving most international automotive brands.
- ◆ We are PEC's representative India office, with domestic inventory and local support.
- ◆ PEC's range includes: EV fuses | Blade fuses | Slow blow fuses | MUSB fuses | Battery terminal fuses | Accessories.

Connector Systems

Hirschmann Automotive

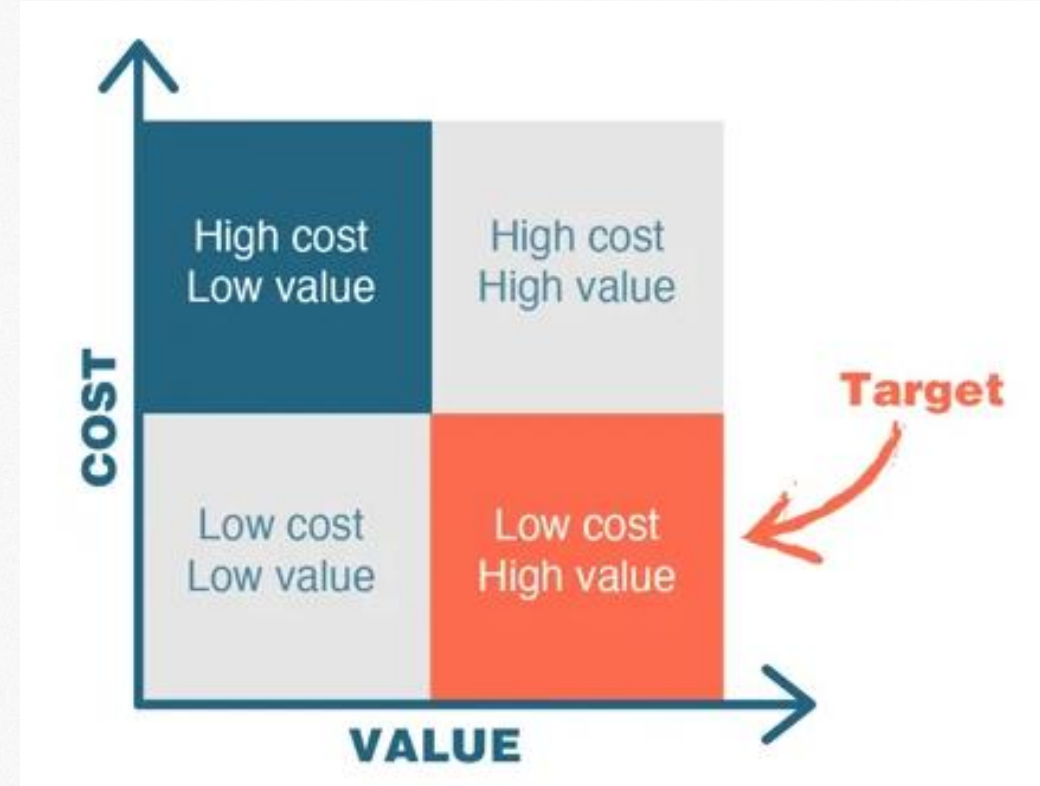

- ◆ We sell Low voltage & High Voltage connectors from Hirschmann Automotive, as their exclusive India distributor.
- ◆ Headquartered in Austria with 8 locations all around the world, Hirschmann Automotive is a top-notch manufacturer of connectors, cable assemblies, sensors & application specific connectivity solutions.
- ◆ We provide full service stack: Design, development & application support, local inventory & supply chain management.

VA/VE + Strategic Sourcing

Cut costs, not corners!

- ⬢ We help you meet cost reduction targets.
- ⬢ Powered by our comprehensive global supplier network, we identify cost-saving alternative parts tailored to your needs, without compromising quality or compliance.
- ⬢ Each supplier is individually vetted and approved for product quality, processes and long-term reliability, and servicing well-known OEMs.
- ⬢ Our application team suggests alternatives and handholds you through the approval process with your engineering and VA/VE teams.

The Enerdyne advantage

01

Full service stack with co-design & development of parts

We provide a full stack of local application support. The technical and production capabilities of our global partnerships allow for great scope of co-design and development of parts for India. This is done through close collaboration between key resources in R&D, engineering and purchase.

02

Driven to help you reduce costs

This is not an afterthought for us – it's our reason to exist. All our systems and processes are set up to drive cost efficiencies and increase throughput for our customers.

Through our VA/VE approach and alliances with global suppliers, we identify ways to help you achieve your cost reduction targets. Without compromising on quality or compliance, of course.

03

Operational excellence in supply chain management

We effectively manage global supply chains under complex and fluctuating supply/demand conditions. Maintaining adequate inventory levels, bringing down freight & storage costs, ensuring timely flow of information and reducing pressure across supply chains are the focus areas for our ops team.

04

Pan- India sales network

Our warehousing and proximity to major automotive manufacturing hubs in India helps us maintain an agile, always-on, supply chains for our customers

Some of our prestigious customers

We serve most of the major wire harness companies in India.
We also work with major car & two-wheeler OEMs.

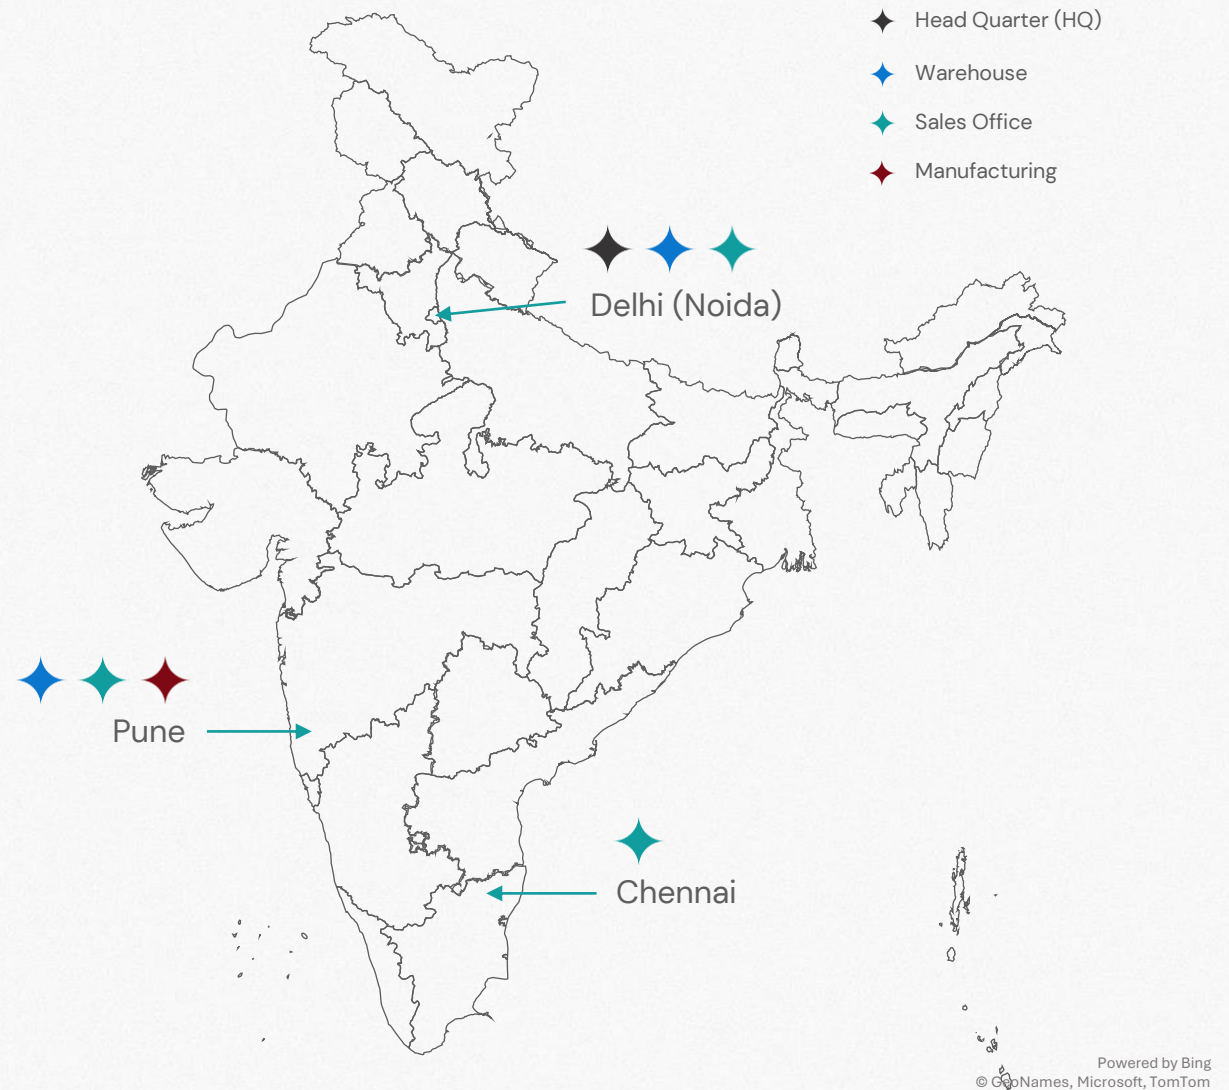

Our locations

HQ: Delhi (NOIDA)

Manufacturing: Pune

Warehouses : NOIDA, Pune

Sales Presence: NOIDA, Pune, Chennai

Giving Back

At Enerdyne, a large share of our profit goes towards giving back to the world. We work with **The Khidmat Foundation**, closely supporting its Give Food Project. Thousands of people are fed daily from the Foundation's free kitchens, across all age groups, religions, colour, caste or communities.

Food is provided "from the community for the community". Anyone who is hungry can eat in the community kitchen. Daily meals are served through the "food for soul" program. Cooked food is provided through three centers in India, throughout the year.

We look forward to working with you.

The logo for ENERDYNE, featuring the word in a bold, teal, sans-serif font. In the background, there is a faint world map with concentric circles emanating from the Indian subcontinent, suggesting a global or technology-oriented theme.

ENERDYNE

There is always a better way
