

About

Transform your static design screens into engaging user flow diagrams and presentations. Overflow helps you clearly illustrate user journeys, making it ideal for presenting design concepts.

Overflow is easy to learn and has a wide range of tools to add such as web page captures.

Key Features:

- 14-day free trial available.
- Pricing: \$19.95/month or \$179.40/year.
- Presenting user experience designs.
- Creating sitemaps and flowcharts.

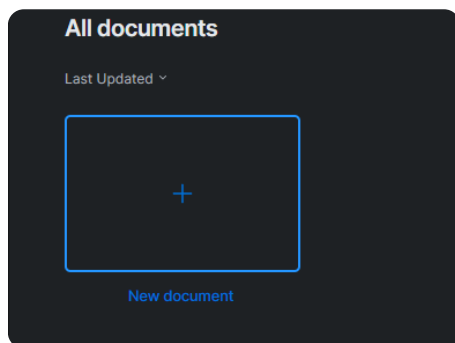

Features

Seamless Import: Import designs directly from tools like Figma, Sketch, and Adobe XD.

Interactive Flows: Easily add connectors, labels, and interactive elements to demonstrate user pathways.

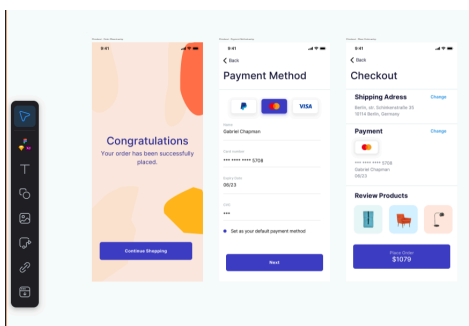

Presentation Ready: Export your flows as professional presentations, PNGs, or PDFs for easy sharing.

Ideal For:

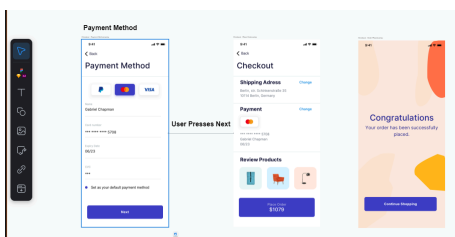

Step 1: Create New Document

Creating a new document is straightforward. Open Overflow and press on the blue rectangle to create a new document. During the free trial all files are saved in the Overflow cloud and cannot be saved locally.

Step 2: Import Design

Once the document is created start by adding your designs. This is done by using the dark grey toolbar on the left. You can import designs directly from Figma, Sketch, Adobe XD, and Photoshop. You can also import photos and web captures.

Step 3: Add Labels

Once your design is added you can add text labels, shapes and arrows to show the flow of your design.
