

ANOMALI

The investigation starts here.

Detect and Track Threats with Anomali and Gatewatcher

ANOMALI AND GATEWATCHER JOINT SOLUTION FEATURES:

- Respond quickly to fast-paced cyberthreats
- Reduce false positives
- Increase the responsiveness and efficiency of your cyber analysts with automated processes
- Integration of intel flows is quick and easy thanks to standardized exports to the latest CTI standards (MITRE ATT&CK framework)

IMMEDIATE TIME-TO-VALUE

- Threats feeds install in a few clicks
- Access to a library enriched daily with over 5000 IoCs on the latest active threats indicators.
- Compatible with a large ecosystem of cybersecurity solutions
- It immediately enhances your detection with contextual information about internal and external cyber threats specifically targeting your business.

LastInfoSec, the cyber threat intelligence solution

LastInfoSec, Gatewatcher's Cyber Threat Intelligence (CTI) offering, integrates with Anomali to immediately enhance your capabilities with contextual information about internal and external cyber threats specifically targeting your business. The Anomali platform enables immediate access to Gatewatcher's CTI with a library of 6M+ IoCs and the latest active threats.

Cyber threat intelligence (CTI) optimizes your existing assets and helps you see further ahead.

CRITICAL INTELLIGENCE

Over +5500 new qualified indicators of compromise per day.

SIMPLE DEPLOYMENTS

Fast, scalable implementation on-premises and in the cloud, install in a few clicks.

IMMEDIATE RESULTS

Immediate data access to improve of your security posture.

CASE STUDY

CHALLENGE

Increase your knowledge and visibility of future cyber threats

SOLUTION

Continuously inventories and evaluates data sources accessible through multiple channels: social networks, specialized sites, the dark and deep web, to collect indicators of compromise that are enriched and contextualized to your activity.

CUSTOMER BENEFIT

Reducing the time required to analyze a threat when it is detected.

CHALLENGE

Save time for your analysts

SOLUTION

Makes decision making easier for your operational security teams while drastically reducing their analysis and incident response time without changing their internal processes.

CUSTOMER BENEFIT

The time saved increases the quality of alert coverage.

CHALLENGE

Reduce risk

SOLUTION

Access to a library of millions of indicators of compromise (IoCs). Automated collection, analysis, and correlation engines make threat information available an average of 24 hours ahead of the competition with over 5500 new validated and enhanced IoCs per day.

CUSTOMER BENEFIT

Reduces the risk to your business by making better use of the latest Observations and IoCs.

CHALLENGE

Reduce noise and false positives

SOLUTION

Enriched and contextualized data that generates only meaningful alerts and includes all the information needed to understand them.

CUSTOMER BENEFIT

False positives are mitigated through correlation with Anoamli and Gatewatcher's CTI feed.
