CRITICAL INTELLIGENCE

Tailored, relevant intelligence specific to your company and brand.

FLEXIBLE DEPLOYMENTS

Fast, scalable implementation on-premises and in the cloud.

IMMEDIATE RESULTS

Broadest coverage and free from noise.

BRAND INTELLIGENCE

CHALLENGE:

From cybercriminals to nation states, phishing is one of the most popular and trusted tactics. With more than $26 billion lost to Business Email Compromise since 2016, phishing has a real business impact. By impersonating organizations' brands online, attacks launch more convincing phishing campaigns.

SOLUTION:

In-depth, accurate and continuous identification of phishing domains, mobile apps and social media profiles. Disrupt your adversaries attempts to target your employees and customers, while safeguarding your brand.

CUSTOMER BENEFIT:

Be instantly notified whenever a domain is registered that resembles your own domains, and take quick and easy remediation with SearchLight's rich context and takedown options.

DARK WEB INTELLIGENCE

CHALLENGE:

The dark web is a mysterious unknown for many organizations. Unfortunately, gaining visibility into these locations is extremely challenges – it requires a knowledge of the cybercriminal underground, foreign language capabilities, and technology that can monitor these sources.

SOLUTION:

Detect data exposed across criminal locations, including employee credentials, payment card data and customer details. Profile and track actors operating on deep and dark web sources.

CUSTOMER BENEFIT:

Gain instant access to hundreds of millions of dark web sources, as well as continuous monitoring of when your exposed data surfaces.
