

Everything Ultrasound Ltd

Date of Approval: September 2026

Approved by: Board of Directors

Everything Ultrasound Ltd – Net Zero Commitment

1. Introduction

Everything Ultrasound Ltd is committed to achieving **Net Zero greenhouse gas emissions by 2050** in line with **PPN 06/21**, **PPN 06/23**, and the **NHS Evergreen Sustainable Supplier Assessment**. We recognise our responsibility to reduce emissions across our operations and value chain and to support the NHS in delivering a sustainable healthcare system.

2. Baseline Year

Our baseline year was **1 September 2025 – 31 August 2026**. This represents our first full year of emissions measurement and aligns with the GHG Protocol Corporate Standard.

3. Baseline Emissions (Scopes 1–3)

Scope 1 – Direct Emissions

Baseline emissions: 0 tCO₂e We do not own or operate any fuel-burning equipment, company vehicles, or refrigerant-based systems. Our office is located within a larger rented building where heating and cooling are provided by the landlord. As a result, our Scope 1 emissions are zero.

Scope 2 – Purchased Electricity

Baseline emissions: 0.33 tCO₂e Scope 2 emissions relate solely to electricity consumed within our rented office space. We report both location-based and market-based emissions using UK Government GHG Conversion Factors (DESNZ). As our electricity is supplied through a landlord-managed contract without supplier-specific emissions factors, market-based emissions are reported using the UK grid average.

Scope 3 – Value Chain Emissions

Baseline emissions: 28.48 tCO₂e Our relevant Scope 3 categories, in line with PPN 06/21 and Evergreen Level 1, include:

- Business travel (personal vehicles, trains, flights, taxis)
- Employee commuting
- Purchased goods and services

- Waste generated in operations
- Upstream transport and distribution (couriers)

Emissions have been calculated using UK Government GHG Conversion Factors (DESNZ/DEFRA) and spend-based factors where activity data is not available.

4. Total Baseline Emissions

Total baseline emissions: 28.81 tCO₂e

5. Our Net Zero Target

Everything Ultrasound Ltd is committed to achieving **Net Zero emissions by 2050**. We will reduce emissions across Scopes 1, 2, and 3 through:

- Reducing business travel emissions
- Encouraging lower-carbon commuting
- Working with suppliers to reduce upstream emissions
- Improving waste management and recycling
- Reducing electricity consumption and improving energy efficiency
- Increasing procurement of lower-carbon goods and services

We will report progress annually and update our Carbon Reduction Plan accordingly.

6. Governance and Reporting

We follow the **GHG Protocol Corporate Standard** and use **UK Government GHG Conversion Factors** for all calculations. Our Carbon Reduction Plan and Net Zero Commitment will be reviewed annually and made publicly available on our website.

7. Statement of Commitment

Everything Ultrasound Ltd is fully committed to delivering a sustainable, low-carbon future. We will continue to measure, report, and reduce our emissions transparently and responsibly.

This statement will be updated on an annual basis and approved by the Board of Directors. It is available on our website www.everythingultrasound.co.uk.
