

Carbon Reduction Plan – Everything Ultrasound Ltd

Published: 9th September 2026

Next Review: August 2027

1. Commitment to Achieving Net Zero

Everything Ultrasound Ltd is committed to achieving **Net Zero for our UK Scope 1, Scope 2 and relevant Scope 3 greenhouse gas emissions by 2050**, in line with **PPN 006/21**, the **GHG Protocol Corporate Standard**, and the **NHS Evergreen Sustainable Supplier Assessment Level 1** requirements.

Our Carbon Reduction Plan reports **UK-only emissions** across:

- **Scope 1** – Direct emissions from owned or controlled sources
- **Scope 2** – Purchased electricity
- **Relevant Scope 3 categories** – Business travel, employee commuting, waste, purchased goods and services, and upstream transportation and distribution

This plan is reviewed annually and approved at director level.

2. Baseline Emissions Footprint

Everything Ultrasound Ltd is a newly formed company and does not hold historical emissions data.

Our **baseline year was 1 September 2025 to 31 August 2026**, the first full year of reporting.

From 2026 onwards, we will measure and report emissions in accordance with:

- The **GHG Protocol Corporate Standard**
- **UK Government GHG Conversion Factors**
- **PPN 006 reporting requirements**

Our baseline will remain fixed unless significant organisational changes occur.

3. Current Emissions Reporting (2026 Baseline Year)

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions.

Baseline emissions are the reference point against which emissions reduction can be measured.

Below are our baseline figures for Sept 2025 to August 2026. In line with PPN 06, our **UK Scope 1, Scope 2 and relevant Scope 3 emissions**.

Emission Scope	Source	Emissions (tCO ₂ e)
Scope 1	Company-owned vehicles and fuel use	0
Scope 2	Electricity consumption within office space	0.33
Scope 3 (relevant categories)	Business travel, employee commuting, waste, purchased goods and services, upstream transport	28.48

As our operations grow, we will refine data quality, expand supplier reporting requirements, and improve accuracy year on year.

4. Emissions Reduction Targets

Everything Ultrasound Ltd aims to reduce total emissions by **25% between 2026 and 2031**.

Our phased approach is:

Year 1 (2026) – Establish & Measure

- Complete baseline emissions reporting
- Implement tracking systems for Scope 1, 2 and relevant Scope 3
- Map supply chain emissions hotspots

Years 2–3 (2027–2028) – Reduce Operational Emissions

- Transition to renewable electricity
- Introduce energy-efficient office equipment
- Reduce business travel through remote support and route optimisation

Years 4–5 (2029–2031) – Strengthen Supply Chain & Circularity

- Embed low-carbon procurement criteria
- Engage suppliers on emissions reporting
- Expand reuse, repair and recycling practices

Targets will be refined as data quality improves.

5. Carbon Reduction Projects

Energy & Buildings

- Transition to **100% renewable electricity**
- Install LED lighting, smart timers and efficient appliances
- Introduce energy-use monitoring

Travel & Transport

- Prioritise remote meetings where appropriate
- Encourage public transport and car-sharing

Waste & Resource Management

- Adopt paperless workflows
- Implement recycling systems
- Reduce single-use materials

Supply Chain & Procurement

- Prioritise suppliers with environmental credentials or Net Zero commitments
- Request annual emissions data from key suppliers
- Integrate sustainability criteria into procurement decisions

Training & Awareness

- Provide staff training on sustainable practices
- Embed environmental considerations into internal policies and decision-making

Future carbon reduction initiatives

In the future we hope to implement further measures such as;

- Review options for electric or hybrid vehicles as the business grows
- Installation of **EV charging points** at office or home-working locations

- Introduce incentives for low-carbon commuting (cycle-to-work, public transport).

6. Declaration and Sign-Off

This Carbon Reduction Plan has been reviewed by the Board of Directors and signed off by:

Name: John Dickinson

Position: Director

Signature: 

Date: 1st September 2026
