

# RF PROFI-ID

## Hybrid Pedestal System ★★★★★

Our **RF PROFI-ID pedestal system** is a cutting-edge solution that combines the best of both RF (Radio-Frequency) and RFID technology.

The **RF PROFI-ID** offers superior article protection, versatility for any retail store and provide retailers with a soft transition to article surveillance with additional protection and RFID inventory solution.

Our system supports **remote connectivity** and data collection and can also be connected to our **STOREMONITOR** cloud platform for advanced system analytics and store performance reports.

In addition to all these options and features, the system is equipped with our new smart **ECO MODE** that saves up to 35% of the EAS energy consumption. This way we help to reduce our customer's unnecessary utility costs, increase lifespan of the system and stay environmentally friendly.

### Features & options

- Remote maintenance and diagnostics
- Inventory management option
- Detection of RF labels 8.2 MHz
- Detection of RFID tags (UHF)
- Magnet detection
- Visitor counting
- Advertisement panel
- Smart directional alarms
- Jammer detector
- Tag too close indication
- **ECO MODE**

**Remote connectivity** and data collection are standard features of our systems, ensuring easy installation, remote servicing, and maintenance with quick response and no unnecessary travel costs.

An advertisement panel on your **security system** can be an additional sales tool with our "easy slide" access to printed banner replacement. An identical pedestal but without the opaque panel, the Classic X pedestal features a transparent acrylic surface that blends in with the surrounding space.

**Providing insights** into loss prevention events at an item level allows retailers to make smarter decisions. Knowing when and where items are going missing, as well as which items are most at risk, can help retailers to effectively prevent loss and increase security in high-risk areas.
