I'm taking my sweet time downloading iOS 18 on my brand new phone and I'm wondering why it's being so slow? Has anyone else experienced this issue with their recent iPhone updates? **Sept 29, 2024** Jellybelly64: "hi i got a new phone and it is taking so long to install iOS 18 AND I DONT KNOW WHY .""**Nov 2, 2024** Sofcab: "If it's installing, you'll just have to let it finish. Why it's going so slow, we can't diagnose from afar. Are you plugged in and connected to Wifi for the update?" As it turns out, this happens quite frequently with new iOS launches. When a lot of people are trying to download it at the same time, it can take a bit longer. Don't worry; you can still get iOS 18 and enjoy its features! **Sept 16, 2024** Sofcab: "This happens often with new iOS launches. When a lot of people are attempting to download it can take longer." Here's how you can download and install the new update: 1. Back up your iPhone. 2. Connect your phone to power and Wi-Fi. 3. Open Settings, go to General > Software Update. 4. Tap Update Now (or Update Tonight). 5. Agree to Apple's Terms and Conditions. It will take a few minutes for the update to download. Then, you'll see a Verifying Update window, after which your phone will power down and back up again. Once it's installed, you'll get a notification that your iPhone has been updated to iOS 18! **Supported Devices:** You can install iOS 18 on: * iPhone 16 series* iPhone 15 series* iPhone 14 series* iPhone 13 series* iPhone 12 series* iPhone 11 series* iPhone XS and XS Max* iPhone XR* iPhone SE (2nd generation) and iPhone SE (3rd generation) **How to Update Your iPad:** You can install iPadOS 18 on your tablet, too! Just follow the same steps as above. **Tip of the Day:** Now that you have the latest software, be sure to check out our free Tip of the Day to learn more about your new iPhone's features! iOS 18 is here, and it brings fresh features and security improvements to your iPhone! To ensure your device's security, upgrade to iOS 18 by checking for viruses in settings. Don't worry if you change your mind - you can always downgrade to the previous software if needed. The update will be available on September 16, 2024, so mark your calendars! Should you update to iOS 18? Absolutely! Each new iOS update introduces exciting features, enhanced performance, and bug fixes that'll make your iPhone even more secure. Apple has announced that it will be releasing iOS 17 out of the box for all new iPhone 16 models, and now we know when this update will be available to the general public. iOS 18 is finally coming out of the beta cycle, and it's expected to bring several changes to the platform. iOS 18 Release Date and Time: How to Customize Your iPhone Lock Screen and Control Center To determine the release date and time for iOS 18 in your local time zone, note down the listed time next to your region. If you're unable to find your region in the table, visit timeanddate to view the full list of regions. Apple will be releasing iOS 18 extensively, so keep an eye on our follow-up coverage. Although iOS 18 is a must-install for compatible iPhones, it's recommended to wait for iOS 18.1 before updating, as Apple's servers may be busy due to the global rollout. The new update allows users to customize their iPhone lock screen and home screen, expanding the capabilities of the control center. Key features include:- Customizing app icons and widgets on the home screen grid- Enabling dark mode with customizable tint colors- Scheduling iMessage and using emoji tapbacks and text effects- Integration with Rich Communication Services (RCS) for smoother text messaging between iPhone and Android users Note that Apple Intelligence will not be part of the initial iOS 18 update but will be introduced in iOS 18.1 next month, bringing more AI features to the table. iOS 18 is set to be released today, Monday, September 16, and Apple fans worldwide are eagerly anticipating the update. Based on past releases, the update is likely to drop at around 10:00 a.m. Pacific Time/1:00 p.m. Eastern Time. To give users globally an idea of when iOS 18 should be available as an over-the-air update, we've compiled a list of time zone conversions for several countries. However, please note that this list isn't exhaustive, and it's always best to verify the exact time for your specific location. The update is expected to roll out between Monday afternoon and Tuesday morning depending on your timezone. Here are some estimated release times for major regions: Australia - 1:00 a.m. AWST (Tuesday) or 3:00 a.m. AEST (Tuesday) Europe - 7:00 p.m. CEST North America - 10:00 a.m. PDT, 11:00 a.m. MDT, 12:00 p.m. CDT, and 1:00 p.m. EDT Asia - 1:00 a.m. CST (Tuesday) or 2:00 a.m. JST (Tuesday) Africa - varies by region To get the update, make sure your device is fully charged before starting the process over Wi-Fi, as it may take some time to complete. You can check for the update in Settings General Software Update. Note that during the initial rollout of major software updates like iOS 18, Apple users may experience slower download speeds and sluggish performance when trying to update their devices. This is largely due to high demand on Apple's servers as millions of users worldwide attempt to download the update simultaneously. To avoid these potential issues, you may want to wait a day or two before installing the update, allowing server congestion to subside and ensuring a smoother upgrade experience. The final version of iOS 18 is now available for download. You're looking for and we've even done the time zone conversions for you as well. Apple announced iOS 18 at the WWDC event in June and has been beta testing it ever since. The release is set to take place on Monday, September 16 ahead of the launch of the iPhone 16 and iPhone 16 Pro on September 20. The new update will bring with it a number of new features, including additional Home Screen customization, a brand-new Photos app, and more. But those who are looking forward to taking Apple Intelligence for a spin will have to wait a little while longer that won't arrive until Apple releases the iOS 18.1 software update in October. With all of that said, all that's left now is for iOS 18 to be released to the public. Check out the table below for the expected time that will happen in your part of the world. Do note that this is when Apple is expected to begin the rollout of iOS 18 and it could take a little while for the update to reach your local servers. If you don't see the update just yet, keep trying.
