## ABOUT

---

Senior design systems expert with 6+ years building scalable, cross-regional systems and aligning teams around reusable components and accessibility standards. I lead holistic system strategy: bridging design and engineering to ship consistent, accessible UI at scale, mentor peers, and improve cross-functional delivery. Passionate about component-first design, developer collaboration, and system governance.

## EXPERIENCE

---

### Vodafone

Product Designer, Global Design System

May 2022 - Sept 2025

- Rebuilt Vodafone's global design system from scratch, scaling it across 20+ products and 14+ international markets.
- Introduced token-driven architecture, responsive components, and accessibility standards, ensuring consistency across hundreds of designers and developers.
- Defined system governance, contribution workflows, and adoption guidelines across regional teams.
- Mentored and coached designers in best practices, improving team efficiency and adoption of design standards.
- Partnered closely with developers to implement components in code with ARIA labels and cross-platform consistency.
- Delivered a front-end-ready system with Storybook integration, improving design-to-dev alignment and scalability.

✔ Reduced development time per component by 30–40% through reusable components and systematic patterns.

✔ Accelerated design-to-dev handoff by 25% via shared tokens, structured documentation, and Storybook integration.

✔ Decreased duplicated design effort across regions by 60%, streamlining workflows for global teams.

✔ Supported Vodafone products reaching 40M+ users worldwide, improving usability and design consistency.

### Freelancer

Product Designer, Design System Consultant

Jan 2020 - Nov 2021

- Built design systems and modular UI libraries for B2B tech companies (teams of 100+).
- Delivered responsive Webflow websites and clear documentation for product and marketing teams.
- Streamlined design-to-dev workflows, accessibility, and cross-platform consistency.

✔ Clients reported ~20% faster dev implementation

✔ Reduced maintenance costs by ~30%

✔ Enabled scalable, consistent UI across multiple teams

## EXPERTISE/SKILLS

---

Design Systems & Governance

UX & IA Strategy

Component-Based UI & Storybook

Accessibility & WCAG

Cross-functional Collaboration

Developer Handoff & Code Alignment

Mentorship & Team Enablement

Problem Solving & Design Thinking

Attention to Detail & Adaptability

## TOOLS

---

Figma

Zeroheight

Webflow

Storybook

HTML/CSS

JavaScript

React

## EDUCATION

---

2017-2019

**University of Luxembourg**

MSc - Sustainable Product Creation

2013-2017

**University of Miskolc**

BSc - Technical Management
