

You're One Step from the Finish Line

Congrats! You're about to join 40,000+ ADVENT patients who have become the hero of their story.

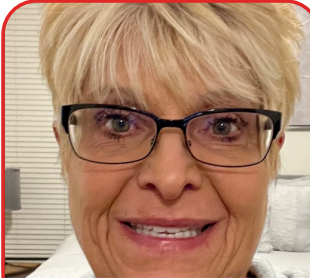

"I didn't know what "normal" was. I **can Finally breathe...and sleep!** And my wife thanks you too! She can finally sleep with how little I am snoring."

Brian

"I had Turbinate Reduction and Balloon Sinuplasty. For the **FIRST** time in my entire life, I **was able to sleep without my nostrils becoming totally blocked.** I couldn't believe that it was possible to breathe that freely."

Steven

"**Best decision I've ever made.** I had a balloon sinuplasty and a septoplasty. It has allowed my sinus to drain properly, **breathe more freely, and sleep better.**"

Sandy

Rustyn

Snoring was horrendous...CPAP machine was a huge fail. Since having the procedure...**Snoring has literally stopped.**

“

"I no longer have congestion and no longer use nasal spray for relief. **I'm wondering why I didn't do this sooner.**"

Mary

 ADVENT patients are **1.5X more** likely to refer a family member or friend than traditional healthcare¹

IMPROVED BREATHING for

96%

of ADVENT patients with severe or extreme nasal breathing issues²

¹ <https://www.rentently.com/blog/good-net-promoter-score/> | ² Results from a BSGA analysis of 1212 ADVENT patients 18 or older at their Computed Tomography (CT) visit and post in-office BSD and nasal procedures from ADVENT clinics between 8/16/2021 and 10/31/2023.
