GT CHEST
CHEST HARNESS

Ref. 216602

ROPE ACCESS, TREE CLIMBING, TOWERS/INDUSTRY

A step forward in comfort for technical rope access workers.
The structure and padding of the GT Chest have been shaped for optimal ergonomics, especially on the neck where other harnesses tend to dig in. Double height adjustment (front and back) allows the worker to perfectly fine-tune the fit.
Equipped with a keeper strap for securing a chest ascender in a streamlined way.
Aluminum alloy attachment rings. 2 attachment points: 1front sternal, 1 back dorsal.

Equipped with the compact auto-locking Nexum carabiner for the connection between the sit and chest parts of the harness. The Nexum is notable for its low profile with a shortened height that does not hit the sternum like full-size carabiners, as well as its clean closure and smooth 3Lock opening and closing action. The anti-rotation pin can be removed in order to capture the Turbochest ascender.
Certified break-away parking loops for lanyards on the shoulders.

Designed to be used in combination with the GT Sit, Access Sit and Tree Access Evo harnesses for fall arrest.
Equipped with NFC TRACK tag for digital identification.
2 sizes.

ROPE ACCESS, TREE CLIMBING, TOWERS/INDUSTRY

**❶** Fall arrest aluminium alloy rings (front and back) certified according EN 361, suitable for the connection of a shock absorbing lanyard or a fall arrest device.

❷ The structure and padding have been shaped for optimal ergonomics, especially on the neck.

❸ Triple-layer padding: comfortable 3D mesh, robust intermediate foam, external protective mesh.

❹ Polyester webbings, 44 mm wide.

❺ Carbon steel buckles for fast adjustment.

❻ Auto-locking Nexum carabiner for the connection between the sit and chest parts of the harness. The Nexum is notable for its low profile with a shortened height that does not hit the sternum like full-size carabiners, as well as its clean closure and smooth 3Lock opening and closing action. The anti-rotation pin can be removed in order to capture the Turbochest ascender.

❼ Back connection system to "Access Sit", "Tree Access Evo" and "GT Sit".

❽ Webbing system for chest ascender fastening.

❾ Certified break-away parking loops for lanyards on the shoulders.

❿ Equipped with NFC TRACK tag for digital identification.

C.A.M.P. presents **complete solution for the digital management of PPE**, both for allocation to users and for periodic inspections: the **NFC TRACK hardware tags on the products** work seamlessly with the **G.T.S. - Gear Tracking System software** to make the system very intuitive and easy to use.

NFC TRACK chips are installed on many C.A.M.P. products (harnesses, helmets, Retexo lanyards). They **can also be attached directly on any PPE** by the user, so that the user can assign the PPE data to the chip by means of the C.A.M.P. G.T.S.

NFC (Near Field Communication) technology is now present on most smartphones and used every day for smart payments. Today, it also represents the future for the individual identification of products.

The **HF RFID** (High Frequency Radio Frequency Identification) communication system on which NFC is based allows the C.A.M.P. NFC TRACK to be easily read using any latest generation smartphone or for professionals using a PC reader.

NFC TRACK chip installed!

- G.T.S. - GEAR TRACKING SYSTEM

G.T.S. allows professionals to easily manage PPE both via the smartphone app (available on Play Store and Apple Store) and from a PC via the web app.

Two different packages allow for carrying out periodic inspections and also for managing the company allocation of PPE to its employees.

The database of **G.T.S. includes the technical information of all C.A.M.P. products** for work at height and a **large number of other products** posted by other users of the community with publicly available information.
