

WHITNEY 2.0™

The Whitney 2.0 is built for challenging multi-day missions and technical operations. This upgraded pack offers a larger storage capacity, greater durability, and enhanced features to keep equipment organized and accessible. Now available in coyote brown with an improved shove-it pocket.

The Whitney 2.0 has plenty of pockets for carrying essential gear. The dividable main compartment can be access from the top or bottom. Additional purpose-built pockets include an admin pocket, personal pocket, fleece lined top pocket, water resistant electronics pocket, two side pockets, and an external hydration sleeve for a water reservoir. An exterior Shove-It-Pocket is designed to fit and compress high volume gear, while keeping it within reach. MOLLE attachment points on the Whitney sides and back create additional options for storage.

Carrying heavy loads is easy with the Whitney's improved suspension system. Padded aluminum stays conform to the body while providing stability, and adjustable shoulder and waist straps complete the fit. The Whitney 2.0 includes both a rain cover and ground cloth that deploy from a dedicated lower pocket. Designed for adverse conditions, the bottom of the pack is protected by 1,000 denier Tarpaulin for additional resistance to water and abrasion. Topping off the list of features is an ID holder and Velcro section for personal information.

Features:

- Adjustable suspension with padded stays for max comfort under heavy load
- Rain cover deploys from bottom pocket for protection in adverse conditions
- Ground cloth deploys from bottom pocket for staging and sorting equipment
- Pack undersurface protects against water and abrasion with 1,000 denier Tarpaulin
- Main compartment is dual accessible and dividable for additional organization
- Admin pocket optimizes organization with multiple zippered sub pockets
- Water resistant zippered pocket adds protection for electronics
- Fleece lined top pocket safely stows glasses, goggles, or phones
- Personal pocket provides quick access to small essential items
- Shove-It-Pocket with new top strap holds high volume gear within reach
- Hydration sleeve holds a large water reservoir (sold separately)
- MOLLE attachment points on the side and back allow more storage

- ID holder and Velcro section provide options for personal info and insignia
- One size fits most, available in Coyote Brown

- Waist Belt: 81-117 cm (32-46 in)
- Shoulder Straps: 58-107 cm (23-42 in)
- Total Volume: 50 L (3,052 ci)
- Main Compartment: 41 L
- Personal Pocket: 5 L
- Side Pockets: 4 L

From the Field:

"What we like about the Whitney is the thicker material that's being used, which prevents us from blowing through these bags as we've done with other manufacturers. On top of that, for the compliment of gear that we carry per rescuer, it fits all that equipment. That compliment comes down to: 2 CLUTCHES, a SQUID, 2 CAPTOs, 2 cows tails, 2 hand ascenders, and foot loops. We've got webbing, we've got mambas, we've got Victim Harnesses. Any rope rescue that we're going to do, or tower rescue, those bags come off the truck and they are assigned to the rescuers that are going along. It works for us. As far as the size of the bag, and the construction of the bag, it is holding up for our needs."

-Jason Watts, Sacramento Metro Fire – Rescue 21
