

DENSITY MEASUREMENT

BAR SPIRIT TESTING KIT

This kit is for testing opened bottles of spirits to make sure there has been no evaporation of alcohol or watering down. It is suitable for any pure spirits which contain no sugar, such as Vodka, Whisky and Gin. It is not possible to test liqueurs with this kit, and some Brandy and Rum will also contain enough sugar to give an incorrect reading if tested with this kit. Simply put a 50ml measure of the spirit in the jar, take hydrometer and thermometer readings, and the provided chart will show you the alcohol content of the spirit.

PRODUCT CODE: B0141

PRICE: £102.00

HYDROMETERS FOR BAR TESTING KIT

The standard hydrometer included with the kit (B0141/H1) tests normal strength spirits. It covers a density range of 940 to 960 kg/m³ in 1 kg/m³ divisions. For higher strengths up to 55% an extra hydrometer is needed.

ACCURACY: ★★★★★

PRICE: £36.00

Product Code	Density Range	Approx. ABV
B0141/H1	940 to 960	33% to 45%
B0141/H2	920 to 940	45% to 55%

THERMOMETER FOR BAR TESTING KIT

This is a short red spirit filled thermometer, measuring the range 0 to 40°C in 1°C graduations.

PRODUCT CODE: B0141/T1

PRICE: £10.00

SAMPLE JAR FOR BAR TESTING KIT

This glass sample jar lets the hydrometer float in a 50ml sample to take a reading.

PRODUCT CODE: B0141/J50

PRICE: £10.00

CHART FOR BAR TESTING KIT

The chart tells you the alcohol content of the spirit when you look up the hydrometer and thermometer readings.

PRODUCT CODE: B0141/CH

PRICE: £5.50

CASE FOR BAR TESTING KIT

The smart case keeps the kit protected when not in use and can also be used as a base when you are using the kit to keep everything safe and stable.

PRODUCT CODE: B0141/LC

PRICE: £46.00
