

MINI VACUITY ROD FOR WHISKY BARRELS

Use this to measure the evaporation from whisky barrels. It is graduated for 3 to 9 years in American barrels, Hogsheads, and Butts. It also measures dry dip up to 30cm to measure the distance from the bung hole to the liquid level.

PRODUCT CODE: B1187

CURRENTLY UNAVAILABLE

BUNG ROD FOR WHISKY BARRELS

Use this to measure the liquid quantity in whisky barrels. It is graduated in diagonal line litres, area litres, and wet dip up to 120cm.

PRODUCT CODE: B1188

CURRENTLY UNAVAILABLE

For the most accurate readings the bung rod should be used with this brass guide, to ensure that the dip is vertical each time it is used.
