I.O Registration

It is most important you register your MGI Zip X3 online immediately as registration:

- Records your Zip X3 for warranty purposes
- Speeds up any servicing required on your Zip X3
- Assist us to contact you with any updates to your Zip X3

To register your Zip X3, visit **mgigolf.com**

You will need to record your MGI serial number.This is found on the Zip X3 battery base or in the top box compartment.

Please keep this user manual on file for your own reference and a copy of your serial number;

My MGI Zip X3 Serial Number is

[example AZX3V1173401234]

Purchased Date

/

/

You may be required to show proof of purchase so we recommend you keep your receipt with this manual.

2.O What’s Included

- MGI Zip X3
- 24v Lithium Battery
- Battery Charger
- GPS Holder
- MGI Pouch with:
 - User manual
 - Quick Start Guide
 - Spare replacement speed dial
 - Axle lubricant

3.0 Assembling Your Zip X3

3.1 Attaching the Rear Wheels

First, lubricate both axles using the axle lubricant provided in the black pouch, provided in the box. Lubrication of the axles should be performed regularly to keep your cart in optimal condition.

Step 1. Each wheel is labelled with L or R for left or right. This is very important as the wheels must be placed on the correct side of the Zip X3. Left or right sides are determined when standing behind the Zip X3 as pictured below.

Step 2. On the wheel, press the black release button on the wheel hub. Place the wheel onto the axle. You will notice you need to match up the inner female groove on the axle and the male of the wheel. When placed in position simply release the button. You will notice you hear a "click" when the wheel is properly secured. To check that the wheel is properly in position pull on the wheel. If it is properly in position it will not slide off. Repeat for the other wheel.

3.2 Rear Wheels Positions

The MGI Zip X3 is designed to allow the rear wheels to be in two positions. The position is determined by where the wheel is locked on the axle in either of the two grooves [see picture]. The drive position is used during the normal operation of the Zip X3. The free wheel position is used to freely push the Zip X3 should you experience battery or Zip X3 issues on the course.

i. Drive position – Lock the wheel onto the groove closest to the battery base. To do this, press the black release button on the wheel hub, push the wheel on to the axle as far as possible. To test for drive position try rolling the wheel backwards. If you feel resistance then the wheel is now in drive position and ready to use. Repeat for both wheels.

ii. Free wheel – Lock the wheel into the groove closest to the end of the axle. To do this, press the black release button on the wheel hub, push the wheel on to the axle and release the release button onto the groove. To test for free wheel position try rolling the wheel backwards. The wheel should spin freely with no resistance. Repeat for both wheels.

3.3 Unfolding

Please see below the steps to unfold a Zip X3 Handle.

Step 1: Ensure both rear wheels are attached.

Step 2: Release Fold Lever.

Step 3: Move Top Bag Support away from front wheel assembly until you hear it click.

Step 4: The handle is now free to pull upwards. The handle will naturally unfold as you continue to pull until the handle is completely open.

Step 5: Ensure that the latch at the bottom of the handle clicks into place.

Step 6: Close the fold lever to lock the handle into place in one of three positions.

Step 7: Push the top bag support down to move it into position.

3.4 Folding

Step 1: Disconnect the battery by lifting the battery handle. It can be left on or removed from the Zip X3.

Step 2: Open the fold lever to release the handle.

Step 3: Pull up the latch at the bottom of the handle.

Step 4: Lower the handle down flat.

Step 5: Push the toggle down on the top bag support and then move the Top Bag Support down so that it locks over the front wheel assembly.

Step 6: Close the fold lever to lock the handle into place.

3.5 Fourth Foldable Rear Wheel

The MGI Zip X3 comes standard with a fourth foldable rear wheel. This wheel **MUST** be unfolded into position at all times when the Zip X3 is in use. This will reduce damaging the Zip X3, and provide the ultimate in stability across all terrains. This fourth wheel should be cleaned regularly with a cloth to ensure it can be folded as required for storage.

3.6 GPS Holder and Top Handle Compartment

In the top handle compartment there is a position for a GPS/mobile device holder. Open the compartment and connect the holder into position. To open the holder always press the button at the top of the holder. Place the GPS into the cradle, then close the holder by squeezing the two sides closer together.

3.7 Inverting Rear wheels

The rear wheels can be inverted on the axle to reduce the size of the Zip X3 when folded. To invert the rear wheels, press the black release button on the wheels hub and remove from the axle. Invert the rear wheels so that the wheels hub protrudes away from the axles. Press the black release button on the wheels hub and release once the wheel is fitted onto the axle.

4.0 Battery Charging & Connection

The Zip X3 is designed to take either Zip battery:

- MGI 24v 250Wh Lithium battery [Standard]
- MGI 24v 299Wh Lithium battery [Optional]

4.1 Initial Charge

- Before using your MGI Zip X3 for the first time you must fully charge the battery overnight.
- Plug the charger AC lead into a power point - the Green LED illuminates to indicate the charger is power on.
- Plug the charger output connection into the connector on the front of the battery - the Red LED illuminates to indicate charging.
- When the charging LED indicator has turned green, the battery is fully charged and ready to be used.

Please refer to the battery charger user manual for further information.

4.2 Connecting the Battery onto the Zip X3

Position the battery on the Zip X3 and push the battery down to secure it.

Push the handle down to connect the battery to the Zip X3.

Your Zip X3 has been equipped with fail safe battery connection, so the Zip X3 will not move when you connect the battery. Your Zip X3 will only start once the speed control is switched on.

4.3 Charging the Battery after Use

- Disconnect the battery by lifting the handle.
- The battery can be left on or removed from the Zip X3 for charging.
- Plug the charger AC lead into a power point - the Green LED illuminates to indicate the charger is power on.
- Plug the charger output connection into the connector on the front of the battery - the Red LED illuminates to indicate charging.
- When the charging LED indicator has turned green, the battery is fully charged and ready to be used.

4.4 Battery Storage

- Lithium batteries should not be stored for long periods of time, either depleted or fully charged. Ideally the battery should be at 40-50% capacity, stored in a clean, dry environment on a hard non flammable surface, between 15°C (60°F) to 25°C (80°F). As lithium batteries slowly discharge over time, it is recommended that the battery be power cycled every 6 months if left unused and stored as above.
- Do not leave your lithium battery in a car as high temperatures can damage the battery cells.
- Do NOT charge your MGI lithium battery for more than 10 hours.

4.5 Charging with the MGI Fireproof Charging Box

The MGI Fireproof Charging Box is an optional accessory, sold separately, and is designed to safely store and charge MGI Ai and Zip Series Lithium Batteries. Its non-flammable design ensures fire protection, while the durable full-metal construction and secure slide-lock provide added safety. A built-in handle makes transportation easy, and the box is suitable for indoor use, offering a controlled environment for battery charging. For more information about the MGI Fireproof Charging Box, visit mgigolf.com

4.6 Battery End-of-Life

MGI high-performance lithium batteries will require replacement over time as all rechargeable batteries naturally lose capacity and performance. MGI recommends replacing the battery after approximately six years of use. This timeframe is provided as an indicative end-of-life guideline only. Actual battery life can vary based on how frequently the product is used, how the battery is stored, and individual charging habits. This recommendation is not an implied minimum service life. Some batteries may require replacement earlier, while others may continue to operate beyond six years depending on care and usage conditions. If you notice reduced runtime, inconsistent performance, or difficulty holding charge, the battery may be reaching the end of its usable life. For information on purchasing a replacement battery, please contact MGI or one of our international distribution partners. Australia, USA and Canada: visit mgigolf.com Global: visit mgigolf.com/pages/international-stockists

4.7 Disposal of Lithium Batteries

This product contains materials that requires special handling at end-of-life. Please contact your local environmental authority or governing body for guidance on safe disposal and recycling in accordance with regional regulations. DO NOT dispose of in general waste.

	<p>Correct Disposal of this product</p> <p>This marking indicates that this product should not be disposed with other household wastes throughout the EU. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environmental safe recycling.</p>
--	--

5.0 Fitting the Golf Bag

Ensure that the top bag support straps are disconnected.
 Position the golf bag on the Zip X3.
 Secure the top bag support strap

- Select a good position for the elasticised straps to be put around the golf bag
- Stretch the longer end of the strap and loop the rounded plastic bar underneath the hook on the shorter end
- The top bag support straps should now be connected.

Please ensure the top bag support straps are hooked in place securely before releasing. Failure to do so could result in injury to the user.

Adjusting the length of the top bag support strap

The rounded plastic bar on the longer strap can be adjusted to ensure the bag is secured properly in place.

Secure the lower bag strap
 Pull the lower bag strap over the base of the golf bag.

6.0 Front Wheel

Unlocking & Locking the Front Wheel

The front swivel wheel can be set in two positions.

1) Unlocked position to allow for 360° swivel for optimum turning ability. Move the knob, on top of the front wheel assembly, to the left hand side.

2) Locked position is best when using the Controlled Distance function. Move the knob, on top of the front wheel assembly, to the right hand side.

7.0 Operating the Digital Top Box

7.1 Top Box Display

- 1. Distance Mode Button
- 2. Unit Setting Button
- 3. ON / OFF Speed Control Button
- 4. Speed Setting Indicator
- 5. Main Battery Level Indicator
- 6. Distance Mode
- 7. Distance
- 8. Unit Measurement

7.2 Start / Stop the Zip X3

Zip X3 Speed Control

Please note the following points regarding the Zip X3 Speed Control.

1. To select the desired speed, rotate the speed control button. Turning the speed control button clockwise will increase the speed, whilst anti-clockwise will decrease speed.
2. The speed setting chosen is displayed in the centre of the coloured screen.

Please note you will feel notches as you rotate the speed control. The notches do not indicate a change in speed. The speed will only increase or decrease as the number changes in the display.

3. To start the Zip X3 at this desired speed, tap the top of the speed control button.
4. Another tap will stop the Zip X3.
5. The desired speed can be altered up or down while the Zip X3 is moving.

7.3 Turn the Zip X3 Off

Zip X3 Battery

Please note the following points regarding the Zip X3 Battery.

Connecting the Battery onto the Zip X3

1. Position the battery on the Zip X3 and push the battery down to secure it. Push the battery handle down to connect the battery to the Zip X3.
2. To turn the Zip X3 Top Box Display off:
Hold down the Start/Stop Speed Control Button and Left Hand Distance Mode Button for four seconds and the display will turn off thereby disabling the Top Box.

Please note that the battery will still be connected to the Zip X3 and will continue to drain whilst connected.

3. Please note that the Zip X3 display will also turn off if the Speed Control is not operated for 30 minutes.

Once again, please note that the battery will still be connected to the Zip X3 and will continue to drain whilst connected.

4. To reactivate the Top Box Display, whilst the battery is connected, hold down the Start/Stop Speed Control Button and Left Hand Distance Mode Button for four seconds and the display will turn on thereby enabling the Top Box.

5. To fully shut down the Zip X3 and prevent the battery from discharging, disconnect the battery by lifting its handle. The battery can be left on or removed from the Zip X3.

7.4 Battery Level Indicator

Battery indication is located on the left side of the top box screen. Four coloured bars are highlighted showing full charge. The lesser number of bars displayed, means there is less battery life available. You should always check the battery status before you play golf to ensure the four bars are there.

7.5 Unit Measurements

You can move from meters / kilometres to yards / miles simply by pressing the Unit Setting Button [on the right].

7.6 Distance Modes

There are three distance measurement modes. To move between the modes by pressing the Distance Mode Button [DM] [on the left]

Distance A and B: resettable distance measurements could be used to measure how far you hit your shot and to measure how far you have walked for the day. To reset, simply press the DM Button [left side] for 3 seconds until the reading displays "0".

Distance Total: cannot be reset as it is the Odometer for the life of the Zip X3. This feature will assist with service reminders which are recommended at each 500kms (310 miles) or 6 months periods.

7.7 Control Distance Function

The Control Distance Function enables the MGI Zip X3 to be sent a preset distance before the Zip X3 auto stops. To use this function:

It is recommended that you lock the front wheel to ensure the Zip X3 tracks in a straight line.

Press and hold down Speed control button for 3-4 seconds until the speed setting changes to 5 [metres or yards] and "CDF MODE" will illuminate.

Turn the Speed control button clockwise to increase the distance or anti-clockwise to decrease the distance until the desired distance is achieved between 5-60 [metres or yards].

Always look ahead and assess the condition of the terrain of where you want to send the Zip X3 prior to doing so.

Once the desired distance is reached, press the Speed control button once to send the Zip X3 off to the desired distance.

7.8 Competition Mode

In the unlikely event the club you are playing at does not allow the use of distance devices you will need to disable the distances feature on the MGI Zip X3.

To disable the distance recording feature, simply hold down the left and right buttons at the same time for 3 seconds and "COMP MODE" will appear on the screen.

In addition, the distance recording will be removed from the screen.

To exit COMP MODE hold down the left and right buttons at the same time.

8.0 Adjusting and Aligning the Front Wheel

Each Zip X3 is checked for straight tracking prior to leaving the factory. In the unlikely event the Zip X3 is not tracking straight, the front wheel can be adjusted to regain straight tracking as follows;

1. Lock the swivelling front wheel [6.0] and run the Zip X3 forward to see if the Zip X3 veers left or right.
2. Unlock the swivelling front wheel, swivel it to see the locking latch in the middle of the two front wheels, as below Picture on Left
3. Unlock the latch by pulling down
4. Adjust the direction by turning the thumb screws in the right hand Picture. Alternate between cogs when adjusting - suggest a quarter of a turn at a time
 - To make the Zip X3 go Right - L/H screw anticlockwise, R/H screw clockwise - [Up on both sides]
 - To make the Zip X3 go Left - L/H screw clockwise, R/H screw anticlockwise - [Down on both sides]
5. Lock the latch by pushing it up.

Please note that there is a process in adjusting the tracking. It is suggested that the users should do a little bit of adjustment, test the tracking and then adjust again until the Zip X3 goes straight.

9.0 Warranty

9.1 Warranty Policy

The MGI Zip X3 is covered by a limited 3 year manufacturer's warranty from the date of purchase. Duration of this warranty is:

- 3 years on parts *
- 3 years on Lithium batteries and chargers

*MGI or an authorised service centre will repair or replace any parts found to be defective in materials or workmanship under normal use provided that:

1. The MGI Zip X3 has been properly used, maintained and regularly serviced [see section 10.5]
2. The replacement or repair is performed by an authorised MGI service centre or the owner with MGI approval.

Our goods come with guarantees that cannot be excluded under Consumer Law. You are entitled to a replacement or refund for a major failure and for

compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if goods fail to be of acceptable quality and the failure does not amount to a major failure. This warranty is in addition to other rights and remedies available to the consumer under law. If a warranty claim is to be made, please cease use of the goods immediately and contact your place-of-purchase or your nearest Authorised Service Centre. Alternatively, MGI can be contacted directly via details on the back of this User Manual. Proof-of-purchase is required.

MGI battery is designed to be removed, charged and/or replaced by the user therefore removing from the product does not void the warranty.

9.2 Warranty Exclusions

The following events will void warranty:

- Any alteration performed by non-authorised people or companies.
- Fitting of parts or accessories not recommended by MGI.
- Any damage caused by continued operation of the product after it is known to be defective.
- Damage to the seat and/or seat support bracket on the unit.
- Damage caused by partial or complete ingress of water into motor/gearbox and other major components.
- Damage caused by the unit being driven into bunkers, other course hazards or clubhouse and carpark hazards.
- Damage caused by golf balls or golf clubs.
- Application of external force to any part of the unit or battery.
- Fusion of motor or electronics through overload or continual stationary operation.
- All implied warranties [save those preserved by statute] are excluded.
- Liability for consequential damages under any and all warranties are excluded to the extent exclusion is permitted by law.

In the event of submersion in water (partial or full) of your Zip X3; MGI advises the complete write-off of your Zip X3.

The cost of replacing the water-damaged components (including labour) exceeds the price of a replacement Zip X3.

If you elect to purchase replacement components, i.e. motors, gearbox, motor controller and electronics, we advise the replacement of ALL components simultaneously. Replacing individual components on a water-damaged Zip X3 poses a higher risk of future failure of other components and therefore these parts will not be covered under warranty.

Please note that MGI does not warrant water-damaged batteries and, due to fire risk, under no circumstances should they continue to be used.

The following events are not covered under warranty:

Normal wear and tear;

- (e.g. tyres, rubber handlebar, elastic straps, paintwork, battery performance, axles threads, charging ports on batteries and remotes, screen glass etc.)

- Minor appearance defects which bear no effect on the operation of the unit and are considered by the manufacturer to be within the accepted standards.

MGI Golf only offers a warranty within the country where the buggy/caddy was purchased - across all MGI electric buggies/caddies, batteries, chargers, and accessories. In some instances, MGI may uphold a warranty claim and supply the parts under warranty, however, the freight and labour to install/repair must be covered by the customer.

9.3 Parts Installed During Warranty

Warranty coverage for components installed during a motorised Zip X3's warranty period shall consist of the duration of the Zip X3's warranty period, provided the warranty installation is performed by MGI, an authorised service centre or the Zip X3 owner on approval. Replacement of parts under warranty will not extend the warranty of the Zip X3 or parts.

Warranties are non-transferable. The warranty applied to a product, on purchase, is limited to the original purchaser.

10.0 Preventative Maintenance Program

To properly provide for the continued operation of your MGI Zip X3, MGI has introduced its Preventative Maintenance Program [PMP]. The PMP consists of work to be carried out by both the owner and authorised service centres. To properly maintain the warranty of your MGI Zip X3, it is essential that this work is carried out. If the work carried out by the authorised service centre is to replace parts that are part of the maintenance schedule, the owner will be charged for the parts and labour. If the work to be carried out is part of warranty, MGI will bear the cost.

10.1 Cleaning Your Zip X3 [See Maintenance Schedule]

- For years of good operation, your Zip X3 requires care and attention.
- Keep your Zip X3 clean by using a cloth with warm water and a mild detergent.
- Do not hose down your Zip X3 under any circumstance, as the Zip X3 has electronic components.
- Ensure that the seat stem bracket is free from sand.
- Do not submerge your Zip X3 in water as it will cause irreparable damage.
- Clean the Zip X3 battery base when the battery is removed from the Zip X3.

10.2 Rear Wheel Axles Maintenance [See Maintenance Schedule]

The rear wheel stub axles need to be lubricated regularly. Remove the rear wheels by depressing the spring clip and at the same time pull off the wheel. Apply Petroleum Jelly or light grease to the stub axles. Use a very small amount as the grease can attract sand. If you play in sandy conditions you should clean the axle and regrease fortnightly.

10.3 Upper and Lower Bag Strap Maintenance [See Maintenance Schedule]

The bag straps should be replaced as per the Service Schedule. The upper bag strap can be replaced by:

- Removing the left and right hand straps from the upper bag support
- Undo and remove the screws holding the strap in position on the bag support
- Remove and replace both bag straps
- Insert bag strap securing screws.

10.4 MGI Service Schedule

It is the owner’s responsibility to ensure that all periodical checks, necessary adjustments and services are carried out. If in doubt please contact the MGI service centre:

Australia 1300 644 523
USA 1800 617 2990

Any work performed on your Zip X3 should be recorded on your service record (see page 21) regardless of the work.

MGI Zip X3	Monthly	6 Monthly	Every 2 yrs	Every 3 yrs
Wipe down the Zip X3 with a warm cloth after each use [do not hose]	BO			
Lubricate rear wheel stub axles	BO			
Check and tighten nuts and bolts		BO		
Check and tighten handle pivots		BO		
Check alignment of Zip X3 – ensure that it runs straight		BO		
Replace Speed Controller and On/Off switch assembly				BO /SC
Replace rear wheels and front wheels				BO
Replace upper and lower bag straps				BO

BO = Zip X3 owner can carry out this work
SC = Charged work to be carried by approved service centre
BO/SC = The six monthly service can be completed by either an authorised service centre or the owner of the Zip X3.

II.0 Service and Repair Centres

For all servicing, please do not go back to your place of purchase. To find your nearest Service centre visit mgigolf.com

For warranty repairs to be authorised you MUST provide proof of purchase.

Please keep this with you as well as your Serial number you can record in this manual. It is most important you register your MGI Zip X3 online for warranty purposes.

It is most important you register your MGI Zip X3 online for warranty purposes.

I2.0 Purchasing Parts and Accessories

You are welcome to service your Zip X3 out of warranty, by purchasing parts direct from MGI. Please call or email to discuss the right parts and instructions.
