

Cyber Crime Coverage

Reimbursement Help for Cyber Crime Victims

Emily loves to travel, and she had been looking for the perfect getaway. So when she saw the ad for the absolutely perfect cruise at a fabulous cost, she just had to click and sign up to be sure she got the early bird discount. Later she learned the travel company never existed - the website was gone, and so was her money.

Emily had fallen victim to an online travel scam. Unfortunately, she isn't alone. Online fraud and social engineering scams are now more common—and more convincing—than ever.

That's where ID Watchdog Cyber Crime Coverage comes in.

Awarded Best in Class
Identity Protection
Service Provider for
Consumers

Included Automatically for Greater Protection

When your family is targeted, we believe you deserve real reimbursement—not just an apology. That's why Cyber Crime Coverage is built into select plans and designed to help provide real financial reimbursement to help you recover.

A Better Safety Net for the Digital Age

- ✓ No activation needed—once enrolled in ID Watchdog, you're covered automatically.
- ✓ Up to \$5k / \$50k in Cyber Crime Coverage (depending on plan).

What's Covered

Online Fraud Reimbursement From Scams That Steal Your Money

We reimburse for financial losses from social engineering scams, phishing, and online fraud.

Cyber Extortion & Ransomware Attacks

We can help you cover ransom payments made in response to cyber extortion threats.

If Cyberbullying Hurts Your Loved Ones

We reimburse for counseling, tutoring and other qualifying expenses when cyberbullying affects your child's wellbeing.

Cyber Crime is Real, and It's Coming for Families Like Yours

Families today face new and evolving threats that didn't exist just a few years ago.

- The average loss per scam case was \$2k in 2024,¹ with up to \$40k for some types of scams.²
- Cyberbullying affects nearly half of U.S. teens, creating emotional and financial strain with YouTube, TikTok, and Snapchat posing the highest risk to teens.³
- AI-driven voice and image cloning has become a potent tool for scammers. Known as 'deep-fakes', this technique is growing rapidly and often used to deceive victims into transferring funds or divulging sensitive information.

**Less than
60 seconds⁴**

The median time for users to fall for a phishing email.

The reality is, no one is immune—not even the most cautious families. And when it happens, the financial and emotional toll can be devastating.¹ Your family deserves better protection.

How it Works
