

CUBE

More than a locker solution

Enjoy the space, privacy
and noise reduction.

Too much noise? Not enough privacy?
Create space for focus, calls and conversations.

Flex-Pod

Your space. Your style. Your Flex-Pod.

Every workspace needs room for privacy, focus and meaningful conversations.

Whether it's an important phone call, a video meeting or a moment of uninterrupted work, Flex-Pod creates a quiet and comfortable space in the heart of a busy office.

Designed to adapt to your needs

From compact phone booths to spacious meeting pods, the Flex-Pod collection offers modular solutions that evolve with your workspace.

Choose from a wide range of sizes, colours, materials and interior configurations to create a pod that fits your organization and complements your interior.

Thanks to its modular design and interchangeable panels, your Flex-Pod can adapt as your needs change.

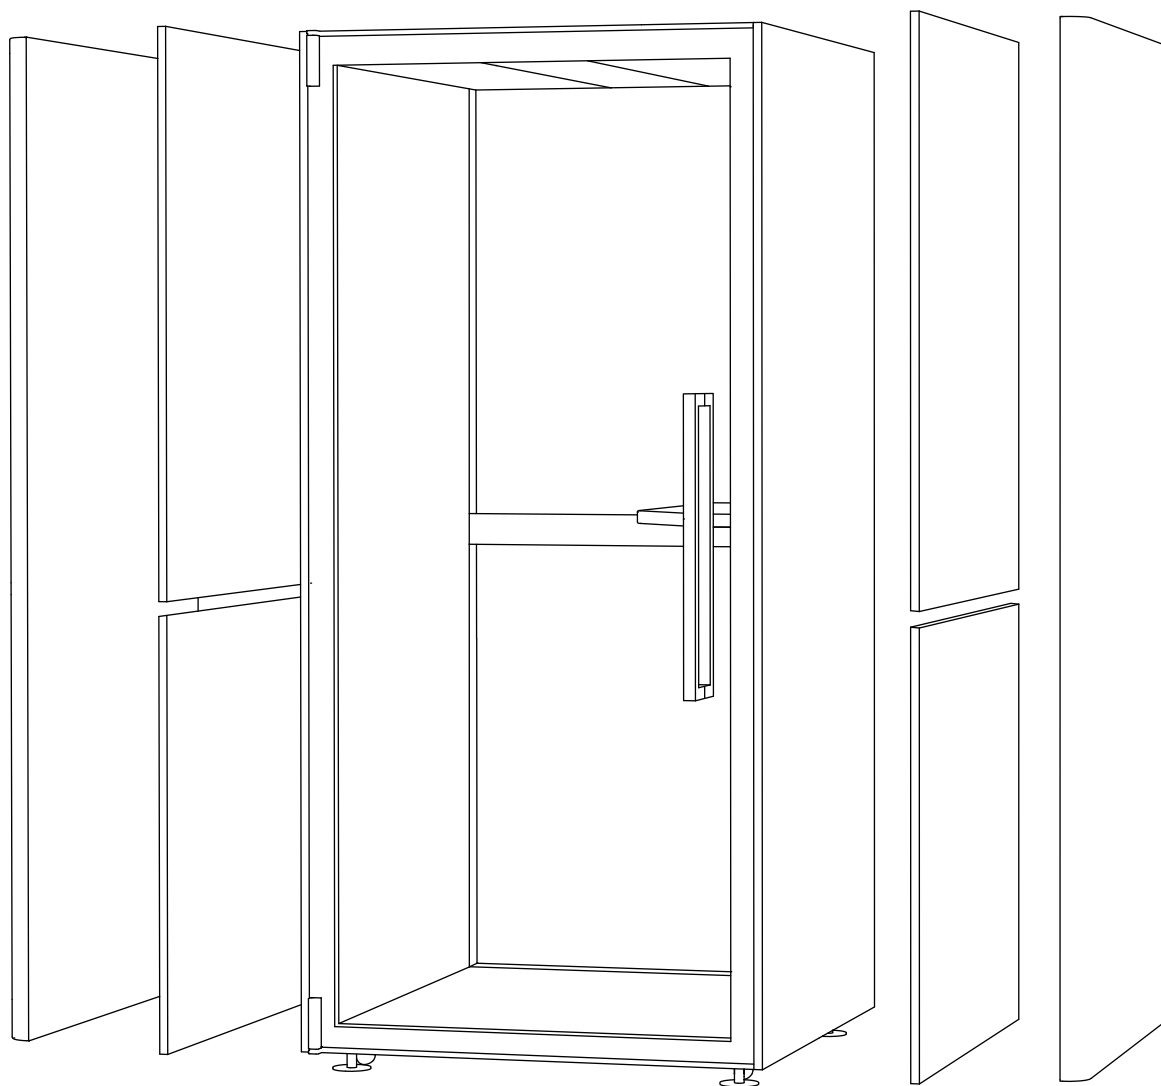

More than just an acoustic pod

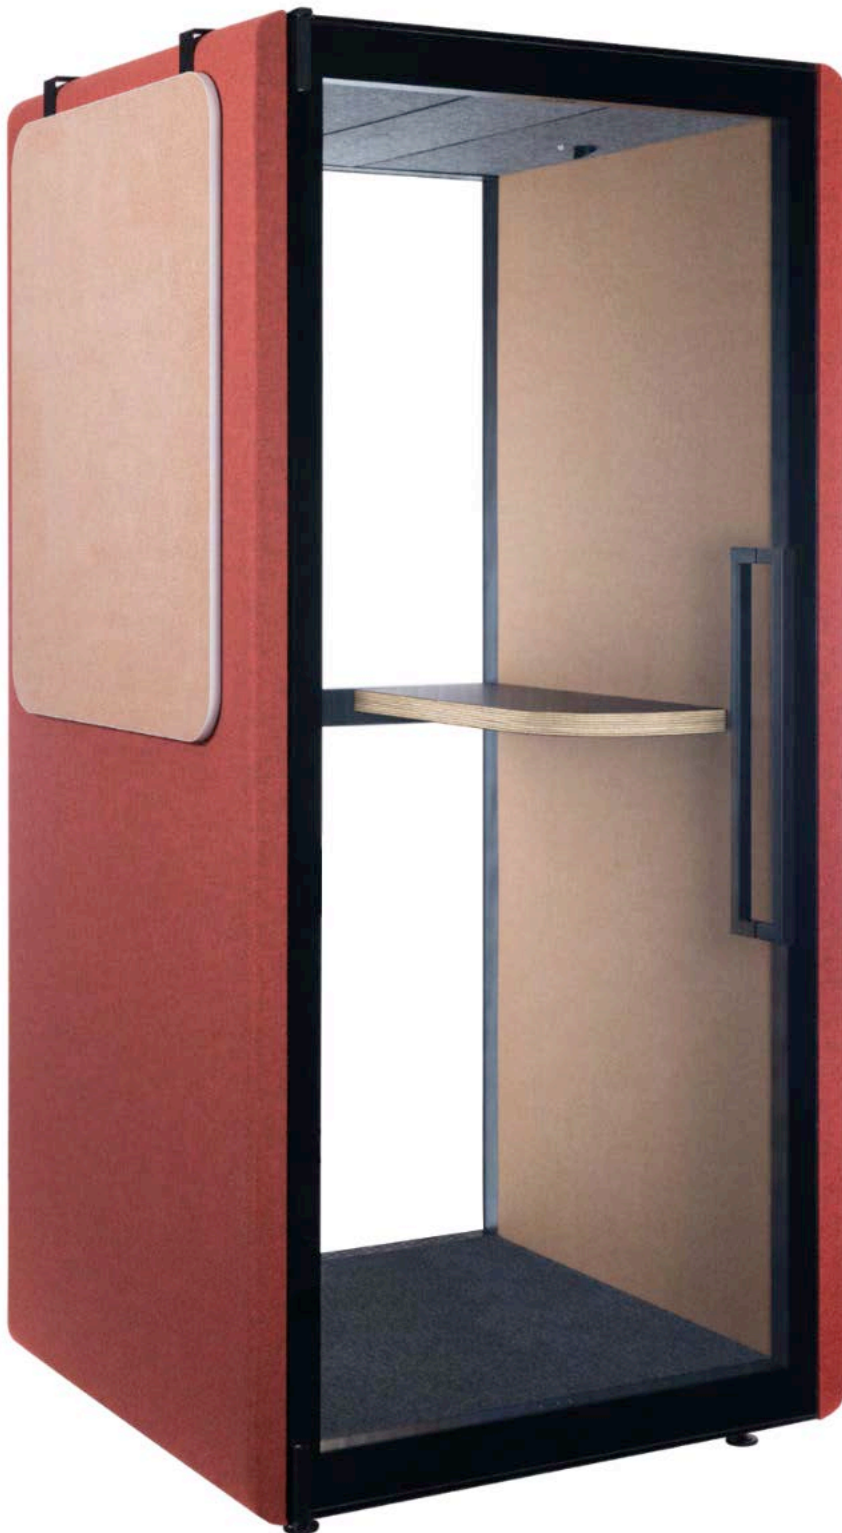

At Cube-lockers, we help you find the right solution for your workspace.

From selecting the ideal configuration to choosing the right materials and finishes, we guide you through every step.

Because a well-designed workspace starts with understanding the people who use it.

Your space. Your style. Your Flex-Pod.

Idea

Necessity is a changing matter. Only a Flex-Pod can keep up with it.

What you need is always different. From place to place, from one person to another. We embraced variability as a constant in our lives and asked ourselves: what stays the same? The need to move on, to get things going, to evolve fast. Flex-Pod is a range of acoustic booths that create a safe space for evolution. They foster visual and mental adaptability, increasing the focus, privacy and productivity of their users.

We meant to design the best consumer-friendly product on the market. Meaning that our design must have the following attributes: useful, versatile, flexible, safe, easy to transport, install and move, environmentally responsible, with a prompt delivery and a fair price. And because the product experience starts even before the purchase, we made sure the digital experience we provide with Flex-Pod is highly descriptive for our clients and easy in its complexity of detail. This is how Flex-Pod was born.

We hope you get to experience the qualities that Flex-Pod stands for and let us know if we succeeded in our mission!

USEFUL

Leverage the value of work and conversations in open spaces. Flex-Pod combines top-quality sound insulation materials with advanced acoustic technologies. Acoustic laminated glass and recycled PET interior panels provide superior performance, with certain pods reaching **Class A** acoustic standards for exceptional speech reduction and a quieter interior environment.

PROMPT DELIVERY

Flex-Pod booths arrive quickly.

The modular design and limited number of components used for each pod result in a fast production time. This enables us to stock semi-fabricated parts, cutting our production time significantly and helping us deliver Flex-Pod in almost no time, considering its complex functionalities. We promise a delivery time starting from 10 days depending on your configuration.

SAFE

Choose a safe and healthy isle in a building's micro world. Our booths are equipped with silent, efficient ventilation and filtration systems. The air inside is fully replaced and cleaned every 26 to 50 seconds, depending on the pod size, ensuring a continuous supply of fresh air.

EASY TO MOVE

Change of scenery? Just get ready, Flex-Pod is designed for them. The booths are fitted with wheels and leveling feet, making it easy to move your pod whenever needed.

ENVIRONMENTALLY RESPONSIBLE

If chameleons are tree-huggers, Flex-Pod could only be just as friendly to the outside world. Almost all parts of Flex-Pod booths are recyclable. The interior panels of the booths are made from recycled PET felt, a soft, yet sturdy material. Durable in nature, PET felt offers great acoustic performance and can be recycled at the end of its life. The structure for the pods is made from wood and chipboard panels and the glass frames are made from aluminium and steel. Due to the fact that they are shipped flat-pack, Flex-Pod booths also have a low carbon footprint.

CHAMELEONIC

Fuse seamlessly just about anywhere, then change your Flex-Pod in an instant, based on necessities. The "chameleonic capability" is obtained due to our patented system of changing the exterior and interior panels, very quick and without tools. This allows us to obtain different visual looks on the same structural frame - from a clean, minimalist style to a more vibrant and colorful design.

FAIR PRICE

Nothing costs you more than a moment of pointless distraction. Designed to improve productivity and well being in modern spaces, Flex-Pod follows an efficiency-first approach when it comes to production as well. Thanks to our modular thinking, we were able to optimize the production cost and create fairly priced products.

EASY TO TRANSPORT

We created Flex-Pod thinking about you and... common elevators. All Flex-Pod booths are shipped disassembled, making them very easy to be carried in elevators. K1, K2, K4, K6 fit in a 8 person elevator with interior dimensions of 1100/43" x 1400/55" x 2200/86" mm/inch (W x D x H) and an opening door dimension of 800/31" x 2000/78" mm/inch.

EASY TO INSTALL

Flex-Pod means time well spent for everyone, not only after the set up, but also before. You only need two people and four Allen Keys provided by us in the assembly kit. Less than 40 minutes and Flex-Pod K1 is ready to use!

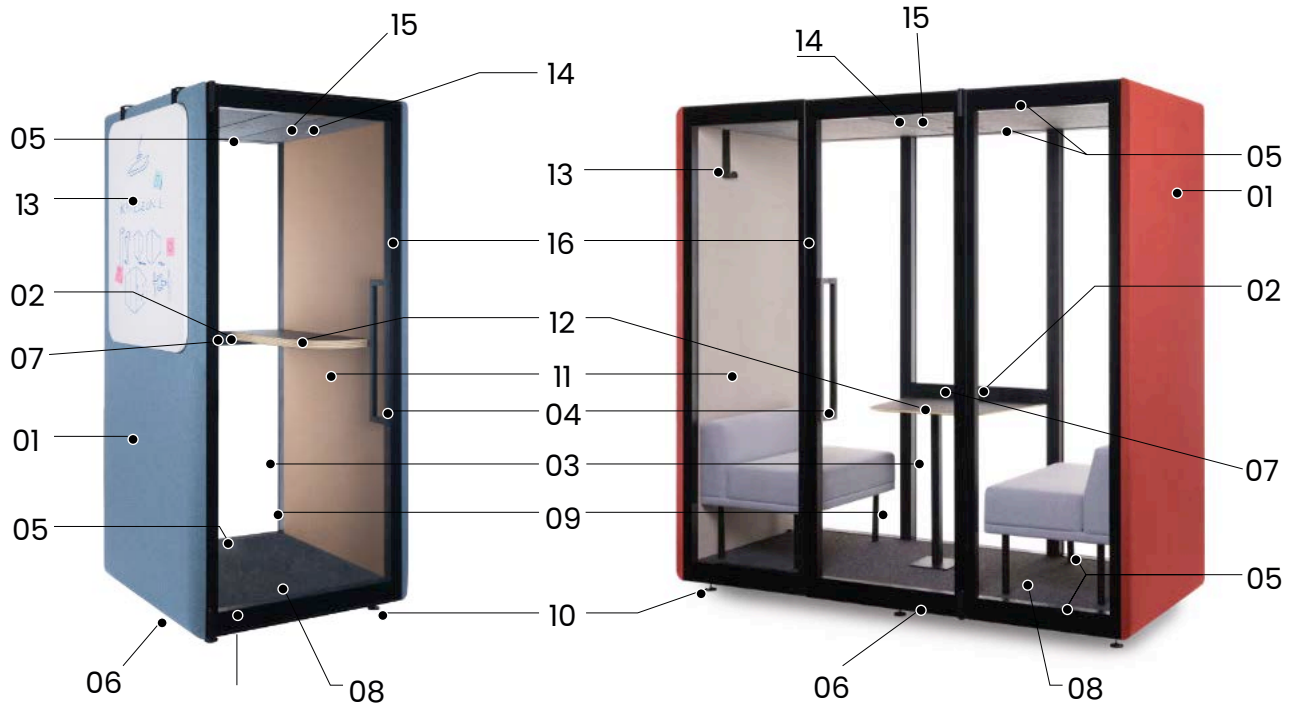

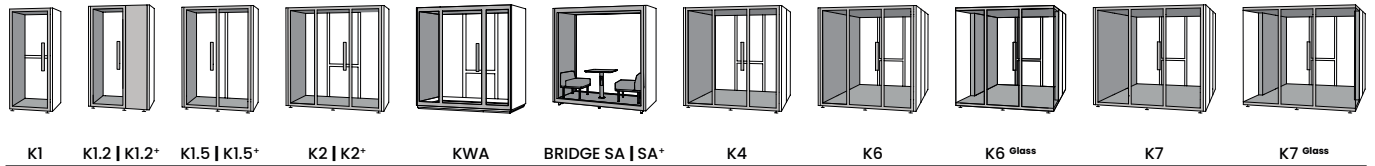

FLEXIBLE

Variation is key to evolution. With Flex-Pod, you are free to virtually explore countless assembly possibilities. Thanks to the modular system, Flex-Pod K2, K4, K6, K7 acoustic booths can be configured according to your needs and effortlessly upgraded in time. You can use our online configurator and obtain more than 10 000 pod variations. Because the "skin" of the Flex-Pod booth can be changed very easily, you can always redesign your acoustic booth by ordering from us only the cover panels. Thanks to the modular design, you can easily switch from a 2 person booth to a 4 person or 6 person booth and vice-versa.

Customize

Flex-Pod Models

01 Exchangeable exterior panel

You can choose new panels from a variety of shapes, finishes and colours.

02 Connectivity

Power outlet
USB Type A
USB Type C
CAT6 Ethernet socket

03 Solid back panel

You can opt in for a Solid Back panel instead of the Acoustic Laminated Glass.

04 Left / Right Reversible opening door

When you install the frame, you can choose the door opening direction just by rotating it.

05 Airflow inlet & outlet

Our ventilation system is performant through its high efficiency and very silent fans.

06 Power and ethernet outlets

The power supply and ethernet outlet can be easily connected at the bottom. Each booth comes equipped with a 3m power cord.

07 Lighting & ventilation dimmers

Light and ventilation dimmer lets you easily adjust lighting and airflow for the perfect ambiance.

08 Tufted polyamide carpet

The soft carpet has a high level of comfort and noise insulation impact.

09 Acoustic Laminated Glass

12mm thick acoustic laminated glass ensures high soundproof performance.

10 Levelers + Wheels

All Flex-Pod booths come equipped with wheels and leveling feet. Whenever you want to move your booth, you can do it very easily.

11 Interchangeable interior panel

You can choose from a variety of finishes and colours through our online configurator. If you want other finishes, the panels can be easily changed.

12 Table tops

All table tops are made from pine plywood and laminated with antimicrobial HPL.

13 Add-on accessories

Our accessories ease your work, and can be ordered separately or all together.

14 LED light

The overhead warm LED lighting ensures enough light for common activities.

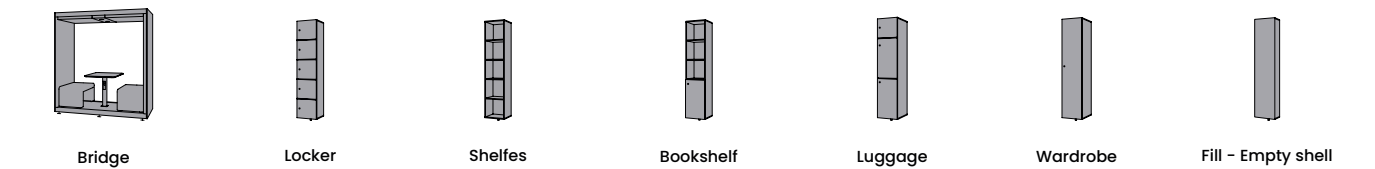

15 Motion sensor

The motion sensor activates the lights and fans. After you leave, ventilation continues for 5, 10, or 15 minutes to keep the air fresh.

16 Magnetic Lock System

The magnetic lock system makes the daily usage more comfortable. The rubber gaskets help seal the door thus minimizing the noise coming from outside.

Link system Models

01 Flex-Pod Link System

By connecting the pods with various storage elements available in the LINK system, we enable a more harmonious and efficient layout of the workspace. The entire structure thus begins to work as a single, unified piece of furniture with visual coherence.

03 Security is a priority

The storage modules can be secured with different types of locks, from Keypad or RFID Digital locks to mechanical locks. Plain, simple doors without any locking mechanism are also available.

05 Casters Cover

When a cleaner look is required, simply snap the cover to conceal the foot posts and finish the look of your desired Flex-Pod.

02 Storage

To make the most of the available space, we have developed two storage access types: side access for all types of Flex-Pod cabins, and front access for K1, K1.5, K1.5+, K2, and K2+ cabins.

04 Link Bridge

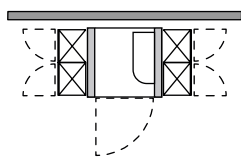

As the name says it, The Bridge from the Flex-Pod Link system acts like a connection bridge between two Flex-Pod cabins. It is an open two-person booth with sound-absorbing walls and ceiling for quiet chats and small meetings.

06 Height adjustable desk

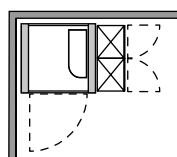

This desk is available for the K1.5 and K1.5+ versions, to ensure better posture and allow work while standing.

In order to help you understand which type of access you should choose for your acoustic pods, we provide you several placement alternatives for our front and side access storage spaces. These examples allow you to maximize the use of space, improving its optimization possibilities

Flex-Pod Wheelchair Accessible

K1

K1 is ideal for important calls or video conferences in private.

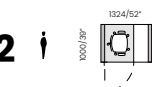

Have your discussions in private without disturbing your colleagues. Equipped with a standard table top, this acoustic booth is perfect for individual work and phone calls.

Lookbook: " Have more green! "

K1 follows biophilic design principles and helps nature regain a central role in the modern workspace. "Biophilia" is a term derived from Greek and it translates as "love of life". It expresses an archetypal longing of being close to nature and finding comfort in it, a feeling that we've lost more and more along with urban development. Using carefully selected natural materials like wood, natural textile fibers and moss, K1 creates the effect of an instant exotic getaway and offers to users the things they miss the most from their holidays: the greenery, the calm, and the time to connect with nature.

Exterior panels : Moss - V01 Spring Green

Interior panels : Acoustic Felt + Fabric - Snergy E02

K1.2

The K1.2 is a compact yet fully equipped acoustic booth, offering the same premium features as the K1.5 in a space-saving design. Optimized for a small desk, it ensures excellent sound isolation, ventilation, and lighting, providing a quiet and comfortable workstation for calls, remote work, or focused tasks without taking up excess space.

Lookbook : " A Pod for Thought "

Compact, but very efficient, it helps you concentrate and finish your work in time.

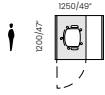

Exterior panels : Round Corners - Synergy E05

Interior panels : Acoustic Felt + Fabric - Synergy E02

Fix desk

K1.2+

The K1.2+ keeps the K1.2 features with a slightly larger design for added comfort. It ensures great sound isolation, ventilation, and lighting, creating an efficient yet compact workspace.

Lookbook : "Where Ideas Grow +"

The desk is designed for seamless productivity, with dimmer controls for lighting and ventilation, plus built-in power outlets and internet connectivity for a fully equipped media workspace.

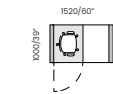

Exterior panels : Chipboard + Melamine X04

Interior panels : Acoustic Felt + Fabric - Lanee Melange C01

Media workspace

K1.5

K1.5 is ideal for longer desk related tasks.

Take your time, concentrate, and finish your tasks in silence using our private desk pod. Equipped with a small fixed or an adjustable height desk, the acoustic booth is perfect for fulfilling intense desk activities that demand deep focus.

Lookbook : " Left or right, left or right, left or....? "

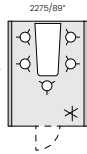

An adjustable desk provides the freedom to set your ideal working height, supporting both comfort and focus during use.

Exterior panels : Plywood - Pine Z01

Interior panels : Acoustic Felt + Fabric - Lanee Melange C09

Adjustable desk

K6

K6 was designed to comfortably accommodate at least 6 people.

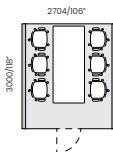

Lookbook : " Let's not be so serious! "

It is designed as an informal space where the idea of meeting is imagined with a more relaxed approach in mind.

Exterior panel : Chipboard + Veneer - Y03 Ash

Interior panel : Acoustic Felt + Fabric - Synergy E10

Table option : TO6

K7 Meeting

Deriving from a K7 standard acoustic booth, which is the most spacious acoustic booth from our Flex-Pod Collection, K7 Meeting is our proposal for a ready to use meeting space setup. A space equipped with all that is necessary: a comfortable office chair, a spacious table, a highly efficient ventilation system and multimedia kit. As accessories, you can add a Whiteboard or a cork Pinboard and coat hanger.

Lookbook : " Positive emotion "

As many studies in psychology and visual arts have shown, whether in nature or interior spaces, the shapes we see subtly affect our mood in different ways. While sharp edges can trigger emotional responses such as anxiety and fear, curved contours are proved to have the opposite effect: they convey a state of wellbeing, calm and happiness. K7 stands out through its rounded exterior panels, covered in a layer of foam and textile. These features contribute to an enjoyable and friendly appearance.

Exterior Panel : Round Corners - Lanee Melange C07

Interior Panel : Acoustic Felt - Dark grey

Seating Option : ACCENTO Office chair

Table Option : VORK S (integrated socket)

Extra Features : VESA Adapter

VORK S Table

K2+

K2+ is the bigger brother of the K2 booth. It can accommodate slightly bigger meetings than K2 due to the fact that it is 20cm deeper.

Lookbook: " Noise catcher "

As a standard, interior walls are covered with 12mm sound absorbing PET felt panels. You can choose to have the same type of acoustic material on the exterior panels. This will transform the booth into a veritable "noise catcher" on the exterior, as well.

Exterior panel : Top Panel : Acoustic Felt + Fabric – One A24
Bottom Panel Acoustic Felt + Fabric – Salo A27

Interior panel : Acoustic Felt + Fabric – Synergy E07

Seating option : SO21 covered with Jet A23

Table option : TO1

SO21 Sofa

K4

K4 can accommodate up to 6 people, if necessary, but it is the perfect option for 4 people.

Lookbook: " Serious discussions! "

By using a Whiteboard and a cork Pinboard as exterior panels, the booth becomes an integrated part of the office space and activities. You can have small meetings around it, you can draw and write or pin important notes.

Exterior panel : Top Panel : Whiteboard W02
Bottom Panel : Plywood Z01

Interior panel : Acoustic Felt + Fabric – Lanee Melange C05

Seating option : SO52 covered with Jet A21

VORK S Table

K7 Glass Office

K7 Glass is a more open option of a K7, with extended glass surfaces. Due to the modular design of the Flex-Pod Collectio, you can always switch from solid panels to glazed ones without any constraints.

Lookbook : " Let's talk in private! "

In this image we are presenting the K7 Glass Office in a "ready to use" setup. This type of acoustic booth can serve as a more quiet discussion space in shopping and retail spaces, where private spaces are more difficult to configure.

Details

Floor/Ceiling

The colour of the carpet always comes in Melange grey.

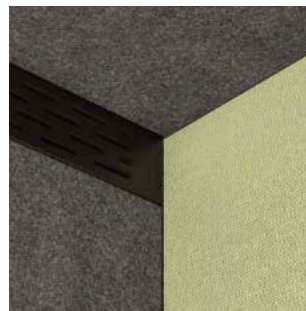

The ceiling is always covered in Dark grey Acoustic PET Felt panels made from 100% recycled polyester fiber.

Back Panel/ Interior panels

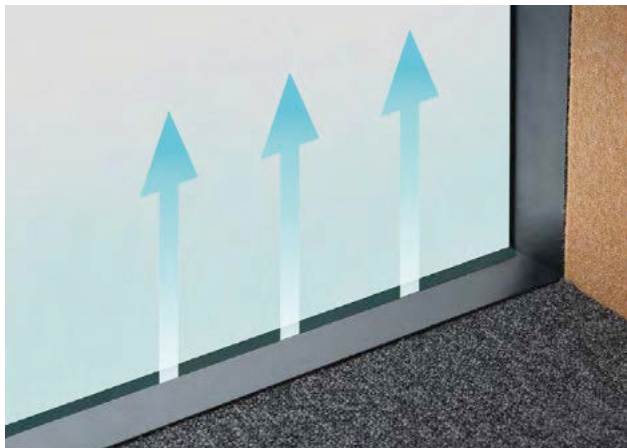

The exterior solid back panel is available in all 18 mm finishes: Acoustic Felt, Chipboard, Plywood, Whiteboard and Pinboard.

The interior panels are available in Dark Grey Acoustic PET Felt, either in their standard finish or covered with fabric.

Ventilation

The booth is equipped with a dual-ventilation system designed to ensure optimal air quality and comfort. Fresh, filtered air enters through ground-level vents, while ceiling-level vents extract stale air, creating a continuous circulation cycle. A motion sensor automatically activates both the lighting and ventilation when the booth is in use, maintaining efficiency and energy savings. After the user exits, the fans continue operating for an additional 5, 15, or 30 minutes—depending on the selected setting—to fully refresh the interior air. Fan speeds can be precisely adjusted from 15% to 100% using a dimmer control, allowing users to tailor the airflow to their comfort. The complete air exchange cycle time is optimized according to the pod size, ensuring consistent performance across different models.

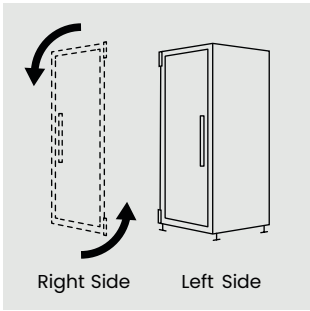

Door handle / Orientation

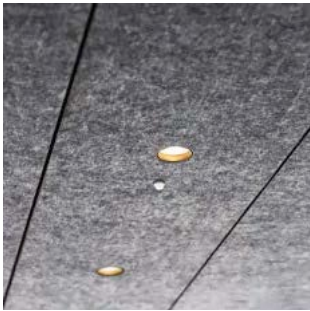

The door handle is made from painted stainless steel. All glass panels are mounted on aluminium frames. All metal parts are powder coated with a special antimicrobial coating.

Colour option:
Satin Black Satin White

The door opening direction for all Flex-Pod booths can be switched just by rotating the frame during installation.

Lighting/Dimmer

Integrated LED Spot Light
Power usage per LED: 3.8W
Input: 12V
Lumen output: 345 lumen
Color Temperature: 3000K
Color Rendering Index: 83

Light and ventilation dimmer offers seamless control over your environment. With intuitive knobs, you can easily adjust the lighting and airflow to create the perfect ambiance.

Socket

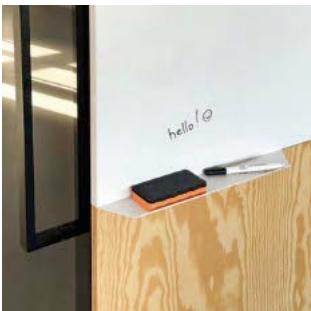

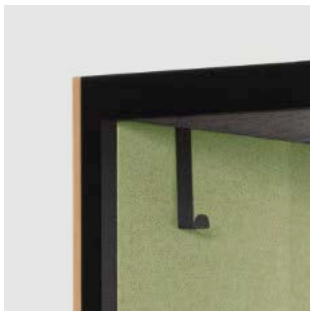

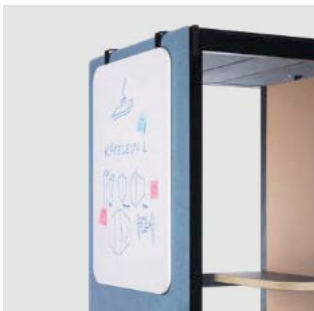

For K1:
2 x Power outlet

1 x USB Type A
1 x USB Type C
2 x CAT6 Ethernet socket

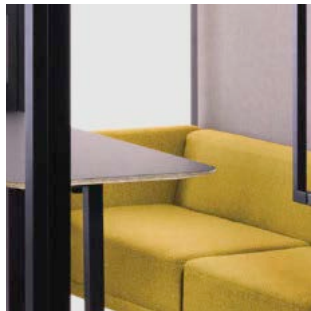

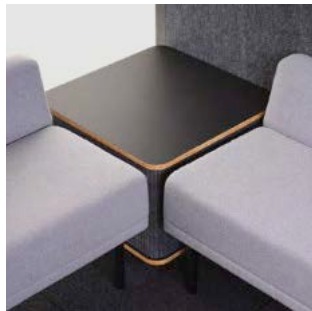

For K7:
6x Power outlet
1x USB Type A
1x USB Type C
2 x CAT6 Ethernet socket

Available for all booths:
EU UK US
FR/BE CH AUS

Accessories

Tables

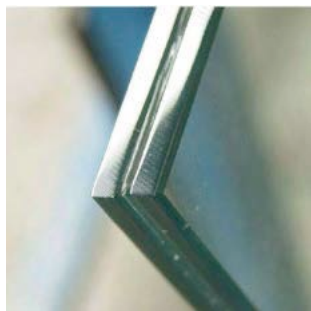

All tables are made from pine plywood and laminated with antimicrobial HPL in White or Black satin finish.

Power Connections / Glass Panel

The power supply and ethernet connection can be easily fixed at the floor level. Each booth comes standardly equipped with a 3m power cord.

12mm thick acoustic laminated glass with acoustic foil ensures high soundproof performances. The acoustic interlayer also helps retain broken glass fragments if broken, reducing the risk of injuries.

Leg Mask / Casters

In some cases, a cleaner look is required. With this in mind we listened to customer feedback and developed a solution which covers the feet and casters, while still providing enough room for cables and airflow. Simply snap the cover to the footposts and finish your desired Flex-Pod pod look.

Flex-Pod booths come equipped with wheels and floor adjusters, so whenever you want to move your pod, you can do it very easily. The integrated floor levelers can be adjusted and they help leveling the booth on different surfaces. All booths have to rest on levelers, the wheels are only for moving purpose.

Door damper / Sprinkler

The door damper is an optional feature which adds an extra level of sophistication. This feature allows the door to close by itself, achieving a soft close effect.

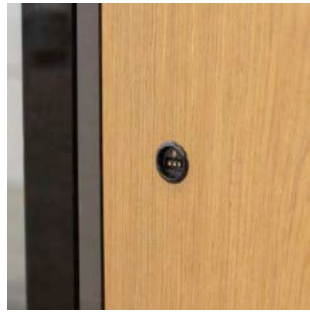

Every booth from the Flex-Pod Collection can be outfitted with a standard sprinkler for fire safety. The pods can be made to order or retrofitted to accept standard issue sprinklers.
