Simplifies return of items to stock and Enhances efficiency in return processes

Key Features

- ✓ Accurate inventory management of returns
- ✓ Creation of return documents with specified reasons
- ✓ Seamless initiation of returns

Benefits

- ✓ Effective tracking and processing of returned items

Logiks WMS Modules

Pick

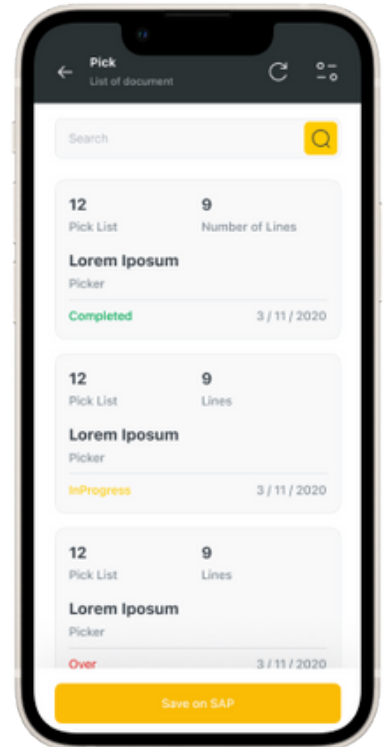

Streamlines warehouse management picking transactions.

Key Features

- ✓ Efficient order selection
- ✓ Generating precise pick lists
- ✓ Accurate order fulfillment
- ✓ Pick For Production
- ✓ Transfer For Production

Benefits

- ✓ Optimizes workflows
- ✓ Inventory tracking
- ✓ Improves customer satisfaction

Sales Return

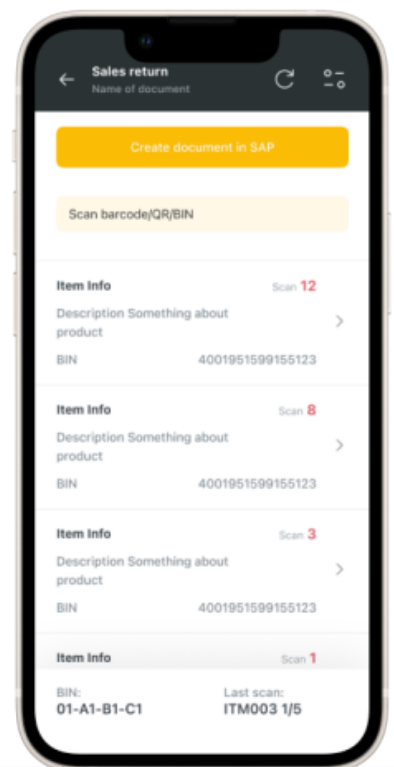

Streamlines efficient product returns and refunds to customers.

Key Features

- ✓ Precise inventory adjustments
- ✓ Processing of sales return documents

Benefits

- ✓ Optimizes sales workflows
- ✓ Enhances inventory accuracy
- ✓ Improves customer satisfaction

Logiks WMS Modules

Warehouse Check

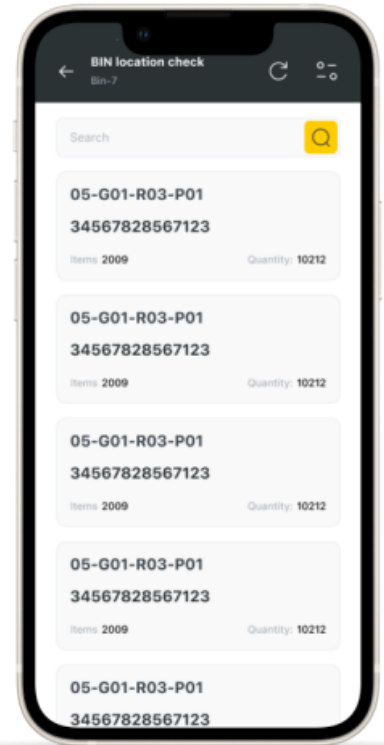

Comprehensive overview of Bin Locations and related items in the warehouse.

Key Features

- ✓ Allows scanning or manual entry to get detailed item and Bin Location information
- ✓ Real-time quantity tracking

Benefits

- ✓ Efficient and accurate warehouse tracking
- ✓ Easy access to item information

Item Check

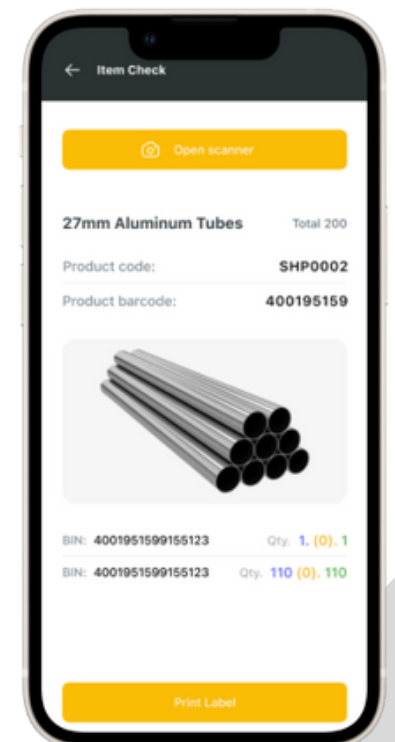

Comprehensive overview of Item information.

Key Features

- ✓ Allows scanning or manual entry to get detailed item information
- ✓ Real-time quantity tracking

Benefits

- ✓ Efficient and accurate warehouse tracking
- ✓ Easy access to item information

Logiks WMS Modules

Inventory GR

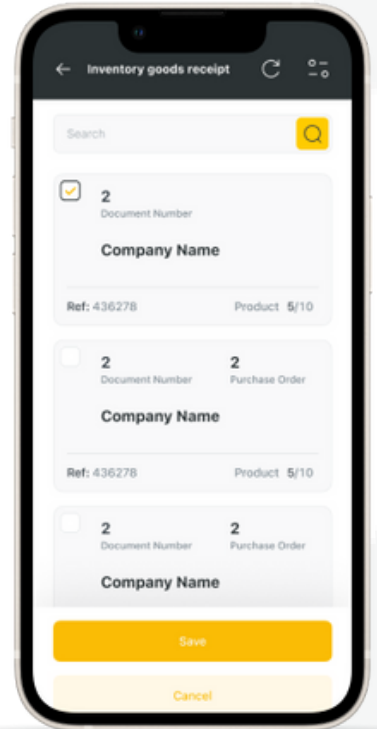

Module for efficient movement of products out of storage.

Key Features

- ✓ Recording and creating of Stock Issue Documents
- ✓ Real-time visibility and control over inventory levels
- ✓ Executes issue processes
- ✓ Reflects reductions in stock quantity

Benefits

- ✓ Optimized outbound warehouse operations

20% WORKFORCE OPTIMIZATION

How did Tin Shack utilize Logiks WMS to achieve tangible results?

Tin Shack & Australian Boot Company, a leading Canadian distributor of footwear brands such as Blundstone and Glerups, despite successful implementation of SAP Business One faced inefficiencies in warehouse operations

By implementing Logiks WMS in partnership with Aclaros, Tin Shack managed to achieve transformative results in the warehouse operations:

Improved Efficiency

Average pick time per unit reduced from 8 seconds to milliseconds, resulting in significant time savings.

Labor Cost Reduction

By optimizing picking processes, Tin Shack achieved substantial labor cost savings, allowing for a 20% reduction in the warehouse workforce.

Enhanced Accuracy

The new solution increased overall accuracy in picking, leading to higher customer satisfaction and improved relationships with retail suppliers.

Engaged Teams

Providing efficient tools empowered warehouse teams and increased engagement, contributing to a more productive work environment

Working with Logiks Solutions has been a game-changer for Tin Shack. Their Warehouse Management Picking Solution has revolutionized our operations, allowing us to pick orders faster, more accurately, and with fewer resources. The seamless integration with SAP Business One ensures that our entire supply chain runs smoothly. Logiks truly understands our business needs and has become a valuable partner in our journey towards greater efficiency and success”,

– Shelly Tripp, Growth Projects and Resource Planning, **Tin Shack**
