

FGN1722

2-Stage GaN Power Amplifier

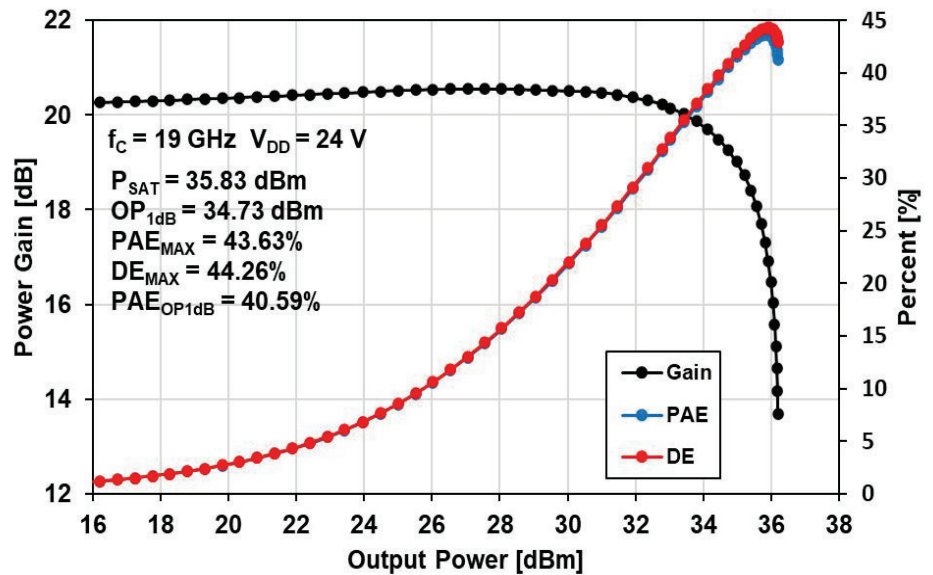

17 – 22 GHz · 36dBm · K-band

FEATURES

- 2-stage $PAE_{MAX} = 44\%$
- PA-stage $DE_{MAX} = 44\%$
- $P_{SAT} = 36 \text{ dBm}$
- Gain = 20 dB
- Frequency = 17-22GHz
- Input/output internally matched
- Efficiency maintained at lower supply voltages

MEASURED DATA (CW)

Falcomm's ultra-efficient FGN1722 technology is ideal for use in K-band applications such as satellite communications.

APPLICATIONS

- Satellite Communications
- Point-to-Point Radio
- VSAT Systems
- Defense & Radar Systems

GaN & CMOS · 4 – 44 GHz
