

## Vac-Pac Statement

### Vacuum Pack Nitrogen Flush (Non-Brick)

Vacuum Pack Nitrogen Flush (Vac-Pac) is the process of adding Nitrogen to flush out Oxygen from the box liner. During this process the liner is vacuumed down to a brick removing 90% of Oxygen. Then adding the Nitrogen to help preserve the walnuts to extend the shelf life, gives the liner a loser appearance. Since less than 10% of Oxygen remains in the properly sealed bag. The bag will appear loose and non-brick like

\*DeRuosi Nut offers Vac-Pac packing for an additional cost of \$0.05/lbs.
