WHAT TO LOOK FOR: FEATURES	DURABUILT		
100% Virgin Vinyl (uPVC) Note: Recycled vinyl can weaken over time, prone to warping, fading, and yellowing.	Our 100% virgin vinyl (uPVC) is engineered for strength, efficiency, and long-term durability. Resists fading, yellowing, or warping unlike recycled vinyl.		
Exterior Laminate Finish Note: Painted finishes can chip, fade, and peel over time, especially in harsh weather.	Our exclusive Continental® laminate is 6x thicker than paint, providing superior resistance to fading, chipping, and peeling for long-lasting finishes.		
Triple Weather Stripping Note: Single or double sealing can lead to drafts and energy loss.	Our three layers of weather stripping create an airtight seal, improving energy efficiency and reducing drafts year-round.		
Innovative Glass Technology Note: Basic glass requires more cleaning and may scratch easily.	With EasyClean+, our windows are low maintenance, scratch-resistant glass that stays cleaner longer, ideal for busy households and hard-to-reach windows.		
No-Metal Warm-Edge Spacer Note: Metal spacers conduct heat, cause condensation and possible mold.	Our all-foam, metal-free Super Spacer® helps keep glass warmer, reduces condensation and mold, and improves indoor comfort.		
Stainless Steel Rollers Note: One or two plastic wheels may stick or wear quickly.	Our Alpha sliding windows use 8 stainless steel wheels (4 rollers, 2 wheels each) for ultra-smooth, reliable operation.		
German-Engineered Hardware Note: Cheaper hardware can feel flimsy or break down sooner.	Our Omega casement and awning windows feature a premium Roto® stainless steel multipoint locking system, ensuring smooth and effortless operation. Available in four finish options.		
Fiberglass Door Slabs Note: Steel doors dent, rust, and corrode quickly, and conduct heat and cold, making homes drafty and energy bills higher.	Our fiberglass doors can be smooth or look like real wood but they will not warp or rot. Unlike steel, they will not dent or rust. With an insulated foam core, they keep your home comfortable and help lower energy bills.
