

650 Series

Structural Insulating Panels

Redefining performance

The 650 Series, designed primarily for roofing, exceeds the highest standards in performance, durability and waterproofing, providing optimum protection against climate change.

650 Series

This panel is composed of two sheets of oriented strand board (OSB) and a high-energy polyisocyanurate insulation.

Insulation

R-49

R-51.54 (total roof)

Weight

65 kg

Thickness

6 1/2"

10 3/4" (total wall)

Description

Size

Square feet

PIS OSB/OSB	4' x 8' x 6.5"	32
PIS OSB/OSB	4' x 9' x 6.5"	36
PIS OSB/OSB	4' x 10' x 6.5"	40
PIS OSB/OSB	4' x 12' x 6.5"	48
PIS OSB/PLYWOOD 5/8	4' x 8' x 6.625"	32
COLUMN CC525	5.25" x 3" x 8'	2

A remarkable gain in energy savings

Roofing

360° Coverage

With an R-value above standards, our panels are an excellent solution for roof insulation.

Flooring

Innovation

Our panels can be used for floor insulation, whether for a property, a mini-house or a veranda/glass roof space.

Why Prestige Panel?

One step

Structure and insulation at the same time

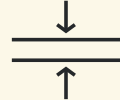

Ease and speed of installation

Up to 65% faster on the jobsite

8X stronger

Than a traditional construction

Thinner with greater R-Value

8 1/2" wool =
3 1/2" Prestige Panel foam

Insulation performance

For energy-efficient achievement

Simplified quality control

Ease of construction site management

Airtightness

Up to 50% energy savings

Superior comfort

Eliminates heat variations and external inconveniences
