STARLINK ONE-CASE

Setup Instructions

Step 1

Open kit; remove antenna and foam insert.

Step 2

On the exterior/back of the case, Slide the port window up

Step 3

On the inside of the case, **CAREFULLY** unbundle whatever length of antenna cable needed and run the lead thru the open back port.

Back Port

Antenna Cable

Back Port

PEAKE

STARLINK ONE-CASE

Setup Instructions

Step 4

Feed enough cable out of the case to either connect to the antenna mounted on top of the case or deployed at distance.

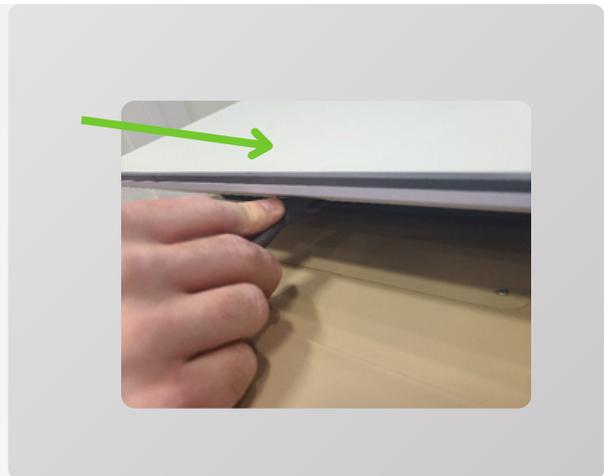

Step 5

Place Starlink on top of magnetic lid for use.

Step 6

Plug antenna cable into Starlink antenna. Press lightly here when inserting cable and you should hear a "click" when properly seated.

NOTE: The cable only fits one way and is fragile. Do not force.

Step 7

Take black 10 foot power cable from inside of case. Attach it to the port on the outside of the case and plug into power supply
