Roundhouse Digital LTD.

("Roundhouse" or the "Company")

Ethereum Purchase

Roundhouse (AQSE: ETHL), an artificial intelligence technology company with an Ethereum-denominated treasury, is pleased to announce that it has purchased 346.6 Ethereum ("ETH") as part of the Company's digital asset treasury strategy with the sole purpose of supporting the Company's core revenue generating operations of providing AI and technology services.

Details of the purchase:

- Number of ETH purchased: 346.6
- Average price paid per ETH (US\$): \$2,020

Summary of Roundhouse's cryptocurrency treasury holdings, as at the date of this announcement:

- Number of ETH held: 468.8
- Aggregate average price paid per ETH (US\$): \$2,395

Matthew Lodge, CEO of Roundhouse commented:

"We are pleased to announce our first ETH purchase since our listing on AQSE in January. As disclosed in the admission prospectus, we have established an ETH denominated digital asset treasury, with the core purpose of supporting Roundhouse's AI and technology operations which are already generating revenue, our primary objective is to grow the Company's core business through continued investment in these operations, while also expanding the treasury in a disciplined manner."

About the Company:

Roundhouse is a technology company specialising in artificial intelligence agent deployment infrastructure. Our business model combines active operational services in artificial intelligence with complementary strategic treasury management capabilities, positioning us as a comprehensive technology services provider. The Company operates as a hybrid business model combining an active operating business, in the technology space, primarily as an

artificial intelligence service provider which will be the Company's primary revenue driver while also establishing an Ethereum denominated strategic treasury reserve. The Company has taken this dual approach to ensure that the Company's primary operations of being a technology company maintains its operational independence while optimising capital allocation for long-term value creation. The Company intends to achieve this by providing the following services: AI infrastructure services, platform licensing, and consulting.

Important Notice:

The Company holds cryptocurrencies or cryptoassets. Whilst the Board of Directors of the Company considers holding cryptocurrencies to be in the best interests of the Company, the Board remains aware that the financial regulator in the UK (the Financial Conduct Authority or FCA) considers investment in cryptocurrencies to be high risk. At the outset, it is important to note that an investment in the Company is not an investment in cryptocurrencies, either directly or by proxy and shareholders will have no direct access to the Company's holdings. However, the Board of Directors consider cryptocurrencies to be an appropriate store of value and potential growth and therefore appropriate for the Company. Accordingly, the Company is and intends to continue to be materially exposed to cryptocurrencies.

The Company is neither authorised nor regulated by the FCA, and the purchase of certain cryptocurrencies are generally unregulated in the UK. As with most other investments, the value of cryptocurrencies can go down as well as up, and therefore the value of the Company's cryptocurrencies holdings can fluctuate. The Company may not be able to realise its cryptocurrencies holdings for the same as it paid to acquire them or even for the value the Company currently ascribes to its cryptocurrencies positions due to market movements. Neither the Company nor investors in the Company's shares are protected by the UK's Financial Ombudsman Service or the Financial Services Compensation Scheme.

Cryptocurrencies may present special risks to the Company's financial position. These risks include (but are not limited to): (i) the value of cryptocurrencies can be highly volatile, with value dropping as quickly as it can rise. Investors in cryptocurrencies must be prepared to lose all money invested in cryptocurrencies; (ii) the cryptocurrencies market is largely unregulated. There is a risk of losing money due to risks such as cyber-attacks, financial crime and counterparty failure; (iii) the Company may not be able to sell its cryptocurrencies at will. The ability to sell cryptocurrencies depends on various factors, including the supply and demand in the market at the relevant time. Operational failings such as technology outages, cyber-attacks and comingling of funds could cause unwanted delay; and (iv) cryptoassets are characterised in some quarters by high degrees of fraud, money laundering and financial crime. Prospective investors in the Company are encouraged to do their own research before investing.
