6 November 2026

Roundhouse AI Ltd
("Roundhouse" or the "Company")

Dashboard extended to Solana

Roundhouse (AIM: RHAI), a company building the trusted data layer for the autonomous AI agent economy, announces that its Dashboard now records x402 payments from more data sources, adding Solana alongside Base and Ethereum.

x402 payments settled on Solana are now recorded on the Roundhouse Dashboard alongside payments on Base and Ethereum, both of which are already live.

The Dashboard is live at https://roundhouseai.io.

Market coverage

According to DefiLlama, as at 4 November 2026, Base and Solana together accounted for approximately 98% of cumulative x402 payment volume by value since May 2025. (https://defillama.com/protocol/x402)

What this means

x402 is an open standard that lets AI agents pay for online services directly, in a similar way to a card payment built into the web. Each payment is settled on a public blockchain. The Roundhouse Dashboard already covers Ethereum and Base. Solana is the third largest public blockchain by stablecoin supply, with around US$15 billion of US dollar stablecoins in circulation on the network (https://defillama.com/stablecoins/chains).

Roundhouse's Dashboard is a searchable record of these payments, comparable to the files a credit bureau keeps. Each additional network brings more AI agent activity into that record, which increases the coverage of the Company's data and of the products built on it.

Key figures (Solana figures: 30 days to 2 November 2026; running totals read 4 November 2026, 10:31 UK)

- x402 payments recorded on Solana: 821,915
- Value of x402 payments recorded on Solana: US$341,261
- AI agents recorded on Solana: 1,425 (distinct paying wallets)
- Total x402 payments recorded across all networks covered: 202,089,780 (running total, Base, Ethereum and Solana)
- Total value recorded across all networks covered: US$45,581,431 (running total, Base, Ethereum and Solana)

- Share of cumulative x402 payment volume by value on Base and Solana: approximately 98% (DefiLlama, since May 2025, as at 4 November 2026)
- Networks covered: 3 (Base, Ethereum, Solana)

Matthew Lodge, Chief Executive Officer of Roundhouse AI, commented: "AI agents pay for services wherever those services live, so a record of what they have paid has to follow them across networks. We already cover Base and Ethereum. Adding Solana is the next big step towards a more complete picture of the market. It brings more of the AI agent economy into one place - Roundhouse."

About Reach announcements

This is a Reach announcement. Reach is an investor communication service aimed at assisting listed and unlisted (including AIM quoted) companies to distribute media only / non-regulatory news releases into the public domain. Information required to be notified under the AIM Rules for Companies, Market Abuse Regulation or other regulation would be disseminated as an RNS regulatory announcement and not on Reach.

Distribution: Distribution: This announcement is not authorised for distribution into North America or any other jurisdiction where to do so would constitute a violation of the relevant laws or regulations of that jurisdiction.

About Roundhouse AI

Roundhouse AI Ltd (AIM: RHAI) is building the trusted data layer for the AI agent economy. Its x402 Facilitator and Indexed Reputation Graph capture and verify the payments AI agents make, giving businesses, investors and the agents themselves a neutral record of who is paying, who is getting paid and what it costs. That data will power Agent Reputation Scores and the aGDP Index. The Dashboard is live at roundhouseai.io, where anyone can explore the open data.
