

Your organization is potentially losing Medicare dollars that are rightfully yours.

Office Ally can help you recoup them.

The Benefits of Office Ally Medicare Underpayment Recovery

1. A 99.89% recovery success rate across all clients for 20+ years
2. \$1+ billion in total Medicare underpayments recovered
3. \$3,700+ average recovery per claim
4. No upfront fees or ongoing data file transfers required

Stop Leaving Medicare Dollars on the Table

More than 40 percent of Medicare discharges are coded as transfers to post-acute care facilities, making them eligible for review under DRG payment rules. According to CMS data, 1 to 3 percent of these transfers are incorrectly coded. That may seem small, but when applied to more than \$1 trillion in Medicare spending, it represents a significant revenue opportunity, particularly for hospitals operating on thin margins. Office Ally's Medicare Underpayment Recovery (MUR) solution helps hospitals uncover missed payments that may be eligible for adjustment.

Maximize Reimbursement Without Adding Work

MUR reviews 100 percent of inpatient discharges across all 280+ MS-DRGs subject to the Post-Acute Care Transfer (PACT) rule. We identify and correct underpaid claims using a fully managed process that does not add to your team's workload.

Built on Experience and Automation

With more than 20 years of experience, Office Ally uses proprietary technology to deliver consistent, accurate reviews at scale. MUR scans every qualifying claim, applying the same logic across large volumes to identify missed revenue opportunities. Our underpayment audit system evaluates claims against specific criteria, not just traditional Medicare or managed care claims, to ensure no eligible underpayment is overlooked. This approach avoids the inconsistencies and higher costs often associated with traditional approaches.

Make Every Dollar Count

As operating margins continue to shrink, hospitals need every eligible dollar. MUR creates a compliant, repeatable revenue stream from underpaid Medicare claims without disrupting your internal processes. It is a smart way to support your bottom line with revenue you have already earned.

Learn how MUR can help your hospital identify missed Medicare payments and improve your revenue recovery.

Explore More Revenue Recovery Tools

At Office Ally, we believe revenue recovery is more than just identifying Medicare underpayments. It should support financial performance at every stage of the patient journey. In addition to MUR, we offer solutions like Insurance Discovery, which identifies missed active coverage to convert self-pay accounts. **Verify360** delivers real-time eligibility and benefits verification across payers and connects seamlessly to **Insurance Discovery** when no coverage is found, helping prevent claim rejections before they happen. **MAPS** offers a centralized platform for managing self-pay activity, uncovering reimbursement opportunities and improving collections, all in one place.
